

As a **Cloud Development Specialist**, you will be part of a team developing cloud-native products for semiconductor and life-sciences verticals. This is a very rewarding opportunity to learn software application engineering at scale.

We at GoSaaS are always looking for talented, motivated, independent, and collaborative engineers who are team players and eager to grow as individuals. We only hire the best. We encourage you to apply only if you meet the job requirements.

Must-Have Skills:

- Bachelor's degree in Computer Science or Electrical Engineering from a reputed university
- A good grasp of the Cloud PaaS offerings
- Excellent programming and analytical abilities.
- Proficient with at least one programming language (Java, C++, Javascript/Node JS or Python) and the ability to learn others quickly.
- Good knowledge of HTML, CSS. Knowledge of frontend frameworks like React or Angular JS is a plus.
- Working knowledge of Git and CI/CD
- Self-driven, excellent communication skills, strong desire to excel and ability to work independently.

Nice to have

- Exposure to MERN stack
