

As a **Senior Full-stack JS developer**, you will contribute to the growth and scaling of the engineering team to help deliver a great user experience by engaging directly with our customers on a need basis, proposing technical solutions, and developing it with the help of other team members to build new features across all areas of the product.

We at GoSaaS are always looking for talented, motivated, independent, and collaborative engineers who are team players and eager to grow as individuals. We only hire the best. We encourage you to apply only if you meet the job requirements.

Must-Have skills

- 2 to 3 years of JavaScript experience
- Solid knowledge of Node JS, React, and Redux principals
- Proficient in React.Js, Node.JS, JavaScript, Type-script
- Hands-on experience with Databases (Optimized query writing, stored procedures, functions)
- Familiar with AWS (SQS, Lambda, S3, Code pipeline)
- Experience with unit testing, release procedures, coding design and documentation protocol as well as change management procedures
- Familiar with micro-services architecture
- Demonstrated organizational, analytical and interpersonal skills
- Utilizing and applying robust analytic thinking with the ability to identify, debug, and resolve technical issues.
- Must demonstrate initiative and effective independent decision-making skills
- Ability to manage tasks independently and take ownership of responsibilities
- Attention to detail, and ability to deliver in a fast paced environment
- Ability to communicate technical information clearly and articulately
- In-depth understanding of the systems development life cycle
