

Curricula, Scheme of Study and Syllabi

Program

BS Information Technology (BSIT)

Offered at University of the Punjab, Lahore & Sub-Campuses

Department

Department of Information Technology

Faculty

Faculty of Computing & Information Technology

Version: 1.2.4

Date: 08-08-2024

University of the Punjab, Lahore

Contents

1. Introduction.....	5

Digital Logic Design	16
Digital Logic Design Lab.....	17
Programming Fundamentals	18
Programming Fundamentals Lab	19
Computer Networks	20
Object Oriented Programming.....	21
Object Oriented Programming Lab	22
Computer Organization and Assembly Language	23
Database Systems	24
Database Systems Lab	25
Software Engineering	26
Data Structures	27
Data Structures Lab	28
Operating Systems.....	29
Information Security	30
Artificial Intelligence	31
Analysis of Algorithms.....	32
2) Mathematics & Supporting.....	33

Multivariable Calculus	33
Probability and Statistics	34
Linear Algebra	35
Technical and Business Writing	36
3) <i>Math Deficiency</i>	37
Math Deficiency - I.....	37
Math Deficiency - II	38
4) <i>Domain (IT) Core</i>	39
Web Technologies	39
System & Network Administration	40
Database Administration & Management.....	41
Parallel & Distributed Computing	42
Cyber Security	43
Information Technology Infrastructure	44
5) <i>Domain (IT) Elective</i>	45
Software Project Management.....	45
Mobile Application Development	46
Machine Learning	47
Software Quality Engineering	48
Software Construction & Development	49
Global IT Services and Workspace	50
Cloud Computing.....	51
6) <i>General Education</i>	52
Applications of Information & Communication Technologies	52
Applications of Information & Communication Technologies Lab.....	54
Applied Physics.....	55
Functional English.....	56
Expository Writing.....	57
Calculus and Analytical Geometry.....	58
Islamic Studies	59
Ideology and Constitution of Pakistan	62
Discrete Structures	63
Civics and Community Management.....	64
Introduction to Management.....	65
Professional Practices.....	66
Entrepreneurship	67
7) <i>University Elective</i>	68
Introduction to Economics	68
Introduction to Psychology	69

Introduction to Marketing	70
Introduction to Sociology	71
Financial Accounting	72
Organizational Behavior	73

1. Introduction

IT has been a key player in digitizing our lives. From daily routine jobs to the most sophisticated financial applications, IT provides the necessary enabling environment. IT infrastructure in an organization is as important as its other physical and human resources. The Department of Information Technology (DIT) aims to provide state-of-the-art training to its students in the field of IT so that they are considered competitive both in national and international markets.

2. Vision

To be a globally recognized institution known for innovation in education and research.

3. Mission

To rigorously train students in the field of Information Technology (IT) and affiliated disciplines, so that they can serve humanity with skill, knowledge and high character, and be a source of pride to humanity.

4. Program Introduction

The Bachelor of Science in Information Technology (BSIT) program at the DIT has been designed in accordance with the guidelines provided by the National Computing Education Accreditation Council (NCEAC) constituted by the Higher Education Commission (HEC) of Pakistan. With the cutting-edge training imparted to the DIT students, the curriculum prepares DIT students not only for higher education and market jobs, but also for self-initiated ventures that may translate into successful startups.

5. Program Education Objectives (PEOs)

The program education objectives of the BSIT program are to

PEO1: Technical Proficiency and Innovation

Prepare students to innovate, develop, deploy, analyze, and administer information technology artifacts to solve social and business problems. Graduates will demonstrate technical proficiency by applying theoretical concepts and practical skills to create innovative solutions, enhance problem-solving abilities through critical and computational thinking, and maintain a strong foundation for careers in academia, industry, and further studies.

PEO2: Collaborative, Ethical, and Professional Responsibility

Foster a sense of professional and ethical responsibilities in graduates, enabling them to understand the impact of technology on society at large. Graduates will work effectively in teams, demonstrating leadership and collaboration skills in multi-disciplinary settings,

addressing ethical, legal, societal, and cultural issues, and committing to professional ethics in their practice.

PEO3: Lifelong Learning and Communication Skills

Hone the skills that facilitate lifelong learning, integrating new tools and technologies, and improving students' problem-solving abilities. Graduates will engage in continuous professional development, adapt to emerging technologies, and effectively communicate complex ideas through oral and technical communication, preparing them for diverse roles in both private and public sectors.

5.1 Program Learning Outcomes (PLOs)

Computing programs prepare students to attain educational objectives by ensuring that students demonstrate achievement of the following outcomes (derived from Graduate Attributes define by Seoul Accord www.seoulaccord.org).

PLO1: Academic Education: To prepare graduates as computing professionals.

PLO2: Knowledge for Solving Computing Problems: Apply knowledge of computing fundamentals, knowledge of a computing specialization, and mathematics, science, and domain knowledge appropriate for the computing specialization to the abstraction and conceptualization of computing models from defined problems and requirements.

PLO3: Problem Analysis: Identify, formulate, research literature, and solve complex computing problems reaching substantiated conclusions using fundamental principles of mathematics, computing sciences, and relevant domain disciplines.

PLO4: Design/Development of Solutions: Design and evaluate solutions for complex computing problems, and design and evaluate systems, components, or processes that meet specified needs with appropriate consideration for public health and safety, cultural, societal, and environmental considerations.

PLO5: Modern Tool Usage: Create, select, adapt and apply appropriate techniques, resources, and modern computing tools to complex computing activities, with an understanding of the limitations.

PLO6: Individual and Team Work: Function effectively as an individual and as a member or leader in diverse teams and in multi-disciplinary settings.

PLO7: Communication: Communicate effectively with the computing community and with society at large about complex computing activities by being able to comprehend and write effective reports, design documentation, make effective presentations, and give and understand clear instructions.

PLO8: Computing Professionalism and Society: Understand and assess societal, health, safety, legal, and cultural issues within local and global contexts, and the consequential responsibilities relevant to professional computing practice.

PLO9: Ethics: Understand and commit to professional ethics, responsibilities, and norms of professional computing practice.

PLO10: Life-long Learning: Recognize the need, and have the ability, to engage in independent learning for continual development as a computing professional.

5.2 PLO to PEO Mapping

Following is the PEOs to PLOs mapping for BS Information Technology Program

No.	Program Learning Outcomes (PLOs)	PEO-1	PEO-2	PEO-3
1	Academic Education	√		
2	Knowledge for solving Computing Problems	√		
3	Problem Analysis	√		
4	Design/ Development of Solutions	√		
5	Modern Tool Usage	√		
6	Individual and Teamwork		√	√
7	Communication		√	
8	Computing Professionalism and Society		√	
9	Ethics		√	
10	Life-long Learning			√

5.3 Bloom's Taxonomy for Program Learning Outcomes (PLOs)

Bloom's Taxonomy classifies various outcomes and skills (PLOs) into six levels, as shown in the table below. These levels can be used to structure the learning outcomes, lessons, and assessments of a course. Each level of Bloom's Taxonomy corresponds to one or more PLOs.

Level	Description	Key Words
Remembering	Can the students <u>recall</u> or <u>remember</u> the information?	know, describe, identify, label, list, match, memorize, recall
Understand	Can the students <u>explain</u> ideas or concepts?	classify, describe, cite, discuss, generalize, illustrate, restate (in own words), summarize
Applying	Can the students <u>use</u> the information in a new way?	assess, choose, solve, demonstrate, dramatize, demonstrate, establish, extend, illustrate,
Analyzing	Can the students <u>distinguish</u> between different parts?	analyze, appraise, categorize, compare, identify, contrast, criticize, differentiate, recognize
Creating	Can the students <u>create</u> new product or point of view?	adapt, incorporate, individualize, integrate, intervene, invent, model,

		modify, communicate, construct, create, design, develop, formulate, generate, reconstruct, reinforce,
Evaluating	Can the students <u>justify</u> a stand or decision?	appraise, argue, choose, compare, conclude, contrast, criticize, interpret, judge, justify, predict, rate

6. Admission Eligibility Criteria

- Years of Study completed: 12 Years
- Study Program/Subject: Intermediate of Computer Science (ICS), FSc Pre-engineering, FSc Pre-medical, FSc Pre-medical with Additional Mathematics, Intermediate with Mathematics and Physics, Intermediate with Mathematics and Computer Science, Intermediate with Mathematics and Statistics, A-Levels (with relevant subjects), Diploma of Associate Engineer (DAE) in relevant discipline.
- Percentage/CGPA: 50% marks required with the exception of DAE where 60% marks are required for admission.
- Entry Test (if applicable) with minimum requirement: There is no compulsory entry test requirement. However, owing to the large number of applicants DIT conducts an entry test to select students as per number of available seats.
- Any other (if applicable)

7. Duration of the Program and Degree Awarding Criteria

The BS Information Technology program spans 8 semesters over 4 years and requires the completion of 134 credit hours. To qualify for the degree, students must achieve a minimum CGPA of 2.0. Additionally, a final year project is mandatory. Other requirements, such as a comprehensive examination, may apply if specified.

8. Categorization of Courses

8.1 Nomenclature of Course Categories and Course Codes

C	Code	Description	Courses	Cr. Hrs.	
0	MD	Math Deficiency	2	6*	(6,0)*
1	CC	Computing Core	18	46	(30,48)
2	DI	Domain (IT) Core	6	18	(12,18)
3,4	EI	Domain (IT) Elective	7	21	(16,15)
5	MS	Mathematics & Supporting Courses	4	12	(12,0)
6,9	GE	General Education Courses	12	30	(28,6)
7	UE	Elective Supporting Courses	1	3	(3,0)
8	HQ	Quran Translation	8	4	(4,0)
Total			54	134	(105,29)

Course Coding Scheme:

Code-YCS

Code = CC / EI / MS / GE / HQ

Y = Year of Offering (Earliest) = 1, 2, 3, 4

C = Course Category Code = 0, 1, ..., 9

S = Serial Number (Resets with Year) = 0, 1, ..., 9

Lab Codes: Code-YCS-L

8.2 Comparison with HEC/NCEAC Recommendation

Note: Basics courses represent Math and Supporting and General Education courses as per HEC/NCEAC approved curriculum based on HEC Undergraduate Policy 2023.

CC = Computing Core, DI = Domain Core (IT), EI = Domain Elective (EI)

MS = Mathematics & Supporting, GE = General Education, UE = University

Elective, MD = Math Deficiency, HQ = Quran Translation

Semester	Number of Courses		Category (Credit Hours)								Semester Load Cr. Hrs. (Cont. Hrs.)
			Core Courses		Basic Courses		Domain Electives (EI)	Others			
	TH	LAB	CC	DI	MS	GE		UE	MD	HQ	
1	7	3	3	0	0	13	0	0	3*	0.5	16.5 (13.5,9)
2	6	2	7	0	0	6	0	3	3*	0.5	16.5 (14.5,6)
3	6	3	14	0	0	3	0	0	0	0.5	17.5 (14.5,9)
4	7	3	10	0	6	2	0	0	0	0.5	18.5 (15.5,9)
5	7	3	6	6	3	2	0	0	0	0.5	17.5 (14.5,9)
6	7	3	0	0	0	2	15	0	0	0.5	17.5 (14.5,9)
7	5	5	2	6	0	0	6	0	0	0.5	14.5 (8.5,18)
8	5	3	4	6	3	2	0	0	0	0.5	15.5 (9.5,18)
PU	50	25	46	18	12	30	21	3	6*	4	134 (105,87)
HEC Guidelines	50	25	46	18	12	30	21	3	6*	4	134
Difference (HEC &) PU	0		0		0		0	0	0	0	0

* These Math courses will be Non-Credit courses with only Pass/Fail grade assigned to the students.

The courses with lab are counted as 2 separate courses.

8.3 Category-wise List of Courses

COMPUTING CORE: 46 (30,48)					
Sr.	Sem.	Code	Course Title	Prerequisite	Cr. Hrs. (Cont. Hrs.)
1	1	CC-110	Digital Logic Design		2 (2,0)
2	1	CC-110-L	Digital Logic Design Lab		1 (0,3)
3	2	CC-112	Programming Fundamentals		3 (3,0)
4	2	CC-112-L	Programming Fundamentals Lab		1 (0,3)
5	2	CC-214	Computer Networks		3 (2,3)
7	3	CC-211	Object Oriented Programming	Programming Fundamentals	3 (3,0)
8	3	CC-211-L	Object Oriented Programming Lab	Programming Fundamentals	1 (0,3)
9	3	CC-210	Computer Organization & Assembly Language	Digital Logic Design	3 (2,3)
10	3	CC-215	Database Systems		3 (3,0)
11	3	CC-215-L	Database Systems Lab		1 (0,3)
12	3	CC-212	Software Engineering		3 (3,0)
13	4	CC-213	Data Structures	Object Oriented Programming	3 (3,0)
14	4	CC-213-L	Data Structures Lab	Object Oriented Programming	1 (0,3)
15	4	CC-311	Operating Systems		3 (2,3)
16	4	CC-312	Information Security		3 (2,3)
18	5	CC-310	Artificial Intelligence	Data Structures	2 (2,3)
19	5	CC-313	Analysis of Algorithms	Data Structures	3 (3,0)
20	7	CC-411	Final Year Project – I		2 (0,6)
21	8	CC-412	Final Year Project – II	Final Year Project - I	4 (0,12)
MATHEMATICS & SUPPORTING: 12 (12, 0)					
Sr.	Sem.	Code	Course Title	Prerequisite	Cr. Hrs. (Cont. Hrs.)
1	4	MS-253	Multivariable Calculus	Calculus and Analytical Geometry	3 (3,0)
2	4	MS-251	Probability and Statistics		3 (3,0)
3	5	MS-252	Linear Algebra		3 (3,0)
4	8	MS-254	Technical and Business Writing		3 (3,0)
MATH DEFICIENCY: 6 (6,0)*					
Sr.	Sem.	Code	Course Title	Prerequisite	Cr. Hrs. (Cont. Hrs.)
1	1	MD-001	Math Deficiency – I		3 (3,0)*
2	2	MD-002	Math Deficiency – II		3 (3,0)*

* Non-Credit courses with only Pass/Fail grade assigned to the students.

GENERAL EDUCATION: 30 (28, 6)					
Sr.	Sem.	Code	Course Title	Prerequisite	Cr. Hrs. (Cont. Hrs.)
1	1	GE-160	Applications of Information & Communication Technologies		2 (2,0)
2	1	GE-160-L	Applications of Information & Communication Technologies Lab		1 (0,3)
3	1	GE-169	Applied Physics (Natural Science)		3 (2,3)
4	1	GE-163	Islamic Studies		2 (2,0)
5	1	GE-168	Ideology and Constitution of Pakistan		2 (2,0)
6	1	GE-190	Functional English		3 (3,0)
7	2	GE-191	Expository Writing		3 (3,0)
8	2	GE-167	Discrete Structures (Quantitative Reasoning-1)		3 (3,0)
9	3	GE-162	Calculus and Analytical Geometry (Quantitative Reasoning-2)		3 (3,0)
10	4	GE-192	Introduction to Management (Social Science)		2 (2,0)
11	5	GE-262	Professional Practices (Arts and Humanities)		2 (2,0)
12	6	GE-362	Entrepreneurship		2 (2,0)
13	8	GE-363	Civics and Community Management		2 (2,0)

INFORMATION TECHNOLOGY CORE: 18 (12, 6)					
Sr.	Sem.	Code	Course Title	Prerequisite	Cr. Hrs. (Cont. Hrs.)
1	5	DI-322	Web Technologies		3 (2,3)
2	5	DI-328	Parallel & Distributed Computing	Operating Systems	3 (2,3)
3	7	DI-323	System and Network Administration	Operating Systems	3 (2,3)
4	7	DI-324	Database Administration and Management	Database Systems	3 (2,3)
5	8	DI-325	Cyber Security	Data Structures	3 (2,3)
6	8	DI-327	Information Technology Infrastructure		3 (2,3)

IT TECHNICAL ELECTIVE: 21 (16, 15)					
SEVEN COURSES (NON-EXHAUSTIVE/ETENSIBLE LIST OF COURSES)					
Sr.	Sem.	Code	Course Title	Prerequisite	Cr. Hrs. (Cont. Hrs.)
1	6	EI-330	Software Project Management		3 (3,0)
2	6	EI-333	Mobile Application Development	Object Oriented Programming	3 (2,3)
3	6	EI-335	Machine Learning	Artificial Intelligence	3 (2,3)
4	6	EI-425	Software Quality Engineering		3 (3,0)
5	6	EI-331	Software Construction & Development	Programming Fundamentals	3 (2,3)
6	7	EI-236	Global IT Services and Workspace		3 (2,3)
7	7	EI-339	Cloud Computing		3 (2,3)
-	-	-	-	-	-

UNIVERSITY ELECTIVE: 3 (3, 0)					
ANY ONE COURSE FROM THE FOLLOWING NON-EXHAUSTIVE LIST OF COURSES					
Sr.	Sem.	Code	Course Title	Prerequisite	Cr. Hrs. (Cont. Hrs.)
1	-	UE-171	Introduction to Economics		3 (3,0)
2	-	UE-271	Introduction to Psychology		3 (3,0)
3	-	UE-272	Introduction to Marketing		3 (3,0)
4	-	UE-273	Introduction to Sociology		3 (3,0)
5	-	UE-274	Financial Accounting		3 (3,0)
6	-	UE-373	Organizational Behavior		3 (3,0)

9. Scheme of Studies and Semester-wise Workload

Semester - I						
Sr.	Code	Course Title	Pre-Requisite	Domain	Cr. Hrs.	Cont. Hrs.
1	GE-160	Applications of Information & Communication Technologies		GE	2	(2,0)
2	GE-160-L	Applications of Information & Communication Technologies Lab		GE	1	(0,3)
3	GE-169	Applied Physics		GE	3	(2,3)
4	CC-110	Digital Logic Design		CC	2	(2,0)
5	CC-110-L	Digital Logic Design Lab		CC	1	(0,3)
6	GE-163	Islamic Studies		GE	2	(2,0)
7	GE-168	Ideology and Constitution of Pakistan		GE	2	(2,0)
8	GE-190	Functional English		GE	3	(3,0)
9	MD-001	Math Deficiency - I		MD	3*	(3,0)*
10	HQ-001	Quran Translation - I		HQ	0.5	(0.5,0)
Credit Hours (Semester - I)					16.5	(13.5,9)
Semester - II						
Sr.	Code	Course Title	Pre-Requisite	Domain	Cr. Hrs.	Cont. Hrs.
1	CC-112	Programming Fundamentals		CC	3	(3,0)
2	CC-112-L	Programming Fundamentals Lab		CC	1	(0,3)
3	CC-214	Computer Networks		CC	3	(2,3)
4	GE-167	Discrete Structures		GE	3	(3,0)
5	GE-191	Expository Writing		GE	3	(3,0)

7	MD-002	Math Deficiency - II		MD	3*	(3,0)*
8	HQ-002	Quran Translation - II		HQ	0.5	(0.5,0)
Credit Hours (Semester - II)					16.5	(14.5,6)
Semester - III						
Sr.	Code	Course Title	Pre-Requisite	Domain	Cr. Hrs.	Cont. Hrs.
1	CC-211	Object Oriented Programming	Programming Fundamentals	CC	3	(3,0)
2	CC-211-L	Object Oriented Programming Lab	Programming Fundamentals	CC	1	(0,3)
3	CC-210	Computer Organization & Assembly Language	Digital Logic Design	CC	3	(2,3)
4	CC-215	Database Systems		CC	3	(3,0)
5	CC-215-L	Database Systems Lab		CC	1	(0,3)
6	CC-212	Software Engineering		CC	3	(3,0)
7	GE-162	Calculus & Analytical Geometry		GE	3	(3,0)
8	HQ-003	Quran Translation - III		HQ	0.5	(0.5,0)
Credit Hours (Semester - III)					17.5	(14.5,9)

Semester - IV

Sr.	Code	Course Title	Pre-Requisite	Domain	Cr. Hrs.	Cont. Hrs.
1	CC-213	Data Structures	Object Oriented Programming	CC	3	(3,0)
2	CC-213-L	Data Structures Lab	Object Oriented Programming	CC	1	(0,3)
3	CC-311	Operating Systems		CC	3	(2,3)
4	CC-312	Information Security		CC	3	(2,3)
5	MS-253	Multivariable Calculus	Calculus & Analytical Geometry	MS	3	(3,0)
6	MS-251	Probability and Statistics		MS	3	(3,0)
7	GE-192	Introduction to Management		GE	2	(2,0)
8	HQ-004	Quran Translation - IV		HQ	0.5	(0.5,0)
Credit Hours (Semester - IV)					18.5	(15.5,9)

Semester - V

Sr.	Code	Course Title	Pre-Requisite	Domain	Cr. Hrs.	Cont. Hrs.
1	CC-310	Artificial Intelligence	Data Structures	CC	3	(2,3)
2	CC-313	Analysis of Algorithms	Data Structures	CC	3	(3,0)
3	DI-322	Web Technologies	Programming Fundamentals	DI	3	(2,3)
4	DI-328	Parallel & Distributed Computing	Operating Systems	DI	3	(2,3)
5	MS-252	Linear Algebra		MS	3	(3,0)
6	GE-262	Professional Practices		GE	2	(2,0)
7	HQ-005	Quran Translation - V		HQ	0.5	(0.5,0)
Credit Hours (Semester - V)					17.5	(14.5,9)

Semester - VI

Sr.	Code	Course Title	Pre-Requisite	Domain	Cr. Hrs.	Cont. Hrs.
1	EI-330	Software Project Management		EI	3	(3,0)
2	EI-333	Mobile Application Development	Object Oriented Programming	EI	3	(2,3)
3	EI-335	Machine Learning	Artificial Intelligence	EI	3	(2,3)
4	EI-425	Software Quality Engineering		EI	3	(3,0)
5	EI-331	Software Construction & Development	Programming Fundamentals	EI	3	(2,3)
6	GE-362	Entrepreneurship		GE	2	(2,0)
7	HQ-006	Quran Translation - VI		HQ	0.5	(0.5,0)
Credit Hours (Semester - VI)					17.5	(14.5,9)

Semester - VII						
Sr.	Code	Course Title	Pre-Requisite	Domain	Cr. Hrs.	Cont. Hrs.
1	CC-411	Final Year Project – I		CC	2	(0,6)
2	DI-324	Database Administration and Management	Database Systems	DI	3	(2,3)
3	DI-323	System and Network Administration	Operating Systems	DI	3	(2,3)
4	EI-236	Global IT Services and Workspace		EI	3	(2,3)
5	EI-339	Cloud Computing		EI	3	(2,3)
6	HQ-007	Quran Translation – VII		HQ	0.5	(0.5,0)
Credit Hours (Semester - VII)					14.5	(8.5,18)
Semester - VIII						
Sr.	Code	Course Title	Pre-Requisite	Domain	Cr. Hrs.	Cont. Hrs.
1	CC-412	Final Year Project – II	Final Year Project - I	CC	4	(0,12)
2	DI-327	Information Technology Infrastructure		DI	3	(2,3)
4	DI-325	Cyber Security	Information Security	DI	3	(2,3)
6	MS-254	Technical and Business Writing		MS	3	(3,0)
7	GE-363	Civics and Community Management		GE	2	(2,0)
8	HQ-008	Quran Translation – VIII		HQ	0.5	(0.5,0)
Credit Hours (Semester - VIII)					15.5	(9.5,18)
Total Credit Hours					134	(111,87)

Research Thesis / Project /Internship

Final Year Project (6 credit hours, VII & VIII semesters)

10. Course Outlines

Course outlines of all major categories are shared below (next page).

1) Computing Core

Course Title	Digital Logic Design		
Course Code	CC-110		
Credit Hours	3 (2,1)		
Category	Computing core		
Prerequisite	None		
Co-Requisite	None		
Follow-up	CC-210 Computer Organization & Assembly Language		
Course Introduction	The course introduces the concept of digital logic, gates and the digital circuits. Further, it focuses on the design and analysis combinational and sequential circuits. It also serves to familiarize the student with the logic design of basic computer hardware components.		
Course Learning Outcomes (CLOs)	At the end of the course, the students will be able to:	BT	PLO
	CLO1: Acquire the basic knowledge of logic gates and digital logic circuits	C1 (Acquire)	1
	CLO2: Understand the working of the fundamental digital circuits used in digital systems and computers.	C2 (Understand)	1,2
	CLO3: Designing a digital circuit for implementing a given scenario.	C3 (Apply)	3,4
Syllabus	<p>Topics: Introduction to Digital Systems, Number Systems, Introduction to Boolean Algebra, Basic theorems and properties of Boolean Algebra, Boolean Functions, Logic Gates, NAND and NOR Implementation, Representation of Function in Sum of Minterms or Product of Maxterms, Simplification of Boolean function using Karnaugh Map, Don't care Conditions, The Tabulation Method, Introduction to Combinational Logic, Design of Adders, Design of Subtractors, Code Convertors, Analysis Procedure of Combinational Circuits, Binary Parallel Adders, Decimal Adders, Magnitude Comparator, Decoders and its applications, Multiplexers, Demultiplexers, Encoders, ROM, Programmable Logic Array (PLA), Introduction to Sequential Circuits, Basic Flip Flop, Clocked RS Flip Flop, Clocked D Flip Flop, Clocked JK Flip Flop, Clocked T Flip Flop, Analysis of Clocked Sequential Circuits, State Reduction and Assignment, Flip Flop Excitation tables, Design Procedure, Design of Counters, Design with State Equations, Introduction to Registers, Shift Registers, Ripple Counters, Synchronous Counters, Timing Sequences, Memory Unit, Random Access Memory. Introduction Programmable Logic Devices (CPLD, FPGA), Lab Assignments using tools such as Verilog HDL/VHDL, MultiSim.</p>		
Suggested Instructional/ Reading Material	<ol style="list-style-type: none"> 1. M. Morris Mano, Digital Logic and Computer Design, 1st Edition, Pearson, 1979, ISBN: 0132145103. 2. Thomas L. Floyd, Digital Fundamentals, 10th Edition, Prentice Hall, 2008, ISBN: 0132359235. 3. Fundamental of Digital Logic with Verilog Design, Stephen Brown, 2/e 		

Course Title	Digital Logic Design Lab		
Course Code	CC-110-L		
Credit Hours	1 (0,3)		
Category	Computing core		
Prerequisite	None		
Co-Requisite	None		
Follow-up	CC-210 Computer Organization & Assembly Language		
Course Introduction	The course introduces the concept of digital logic, gates and the digital circuits. Further, it focuses on the design and analysis combinational and sequential circuits. It also serves to familiarize the student with the logic design of basic computer hardware components.		
Course Learning Outcomes (CLOs)	At the end of the course, the students will be able to:	BT	PLO
	CLO1: Acquire the basic knowledge of Digital Electronic Trainer	C1 (Acquire)	1
	CLO2: Understand the pin configuration and working of commonly used ICs for digital circuit design	C2 (Understand)	1,2
	CLO3: Designing a digital circuit for implementing a given scenario.	C3 (Apply)	3,4
Syllabus	Topics: Familiarization with Digital Electronic Trainer, Implementation of logic gates using ICs, Illustration of basic properties and theorems Boolean algebra using circuit design, Implementation of given Boolean functions, Half Adder, Full Adder, Half Subtractor, Full Subtractor, Design of 7-Segment Display, BCD To 7-Segment Display, Decoder, Multiplexer, Demultiplexer, Implementation of Boolean function(s) using Decoder and Multiplexer, Magnitude Comparator, D Latch and Flip-Flop Operation, Latching BCD Data for Displaying On 7- Segment Display, JK Flip-Flop Operation, Random Access Memories

Course Title	Programming Fundamentals		
Course Code	CC-112		
Credit Hours	3 (3,0)		
Category	Computing Core		
Prerequisite	None		
Co-Requisite	None		
Follow-up	CC-211: Object Oriented Programming, DI-322: Web Technologies, EI-338: Enterprise Systems, DI-327: Information Technology Infrastructure		
Course Introduction	This course provides fundamental concepts of programming to freshmen. The course is prerequisite to many other courses, therefore, students are strongly advised to cover all contents and try to achieve CLOs to the maximum possible level.		
Course Learning Outcomes (CLOs)	At the end of the course, the students will be able to:	BT	PLO
	CLO1: Understand basic problem-solving steps and logic constructs.	C2 (Understand)	1,2
	CLO2: Apply basic programming concepts.	C3 (Apply)	3,4
	CLO3: Design and implement algorithms to solve real world problems.	C3 (Solve)	3,4
Syllabus	<p>Introduction to Problem Solving, Algorithms, Programming, and C Language: Problem Solving, a brief review of Von-Neumann Architecture., The C Programming Language, Pseudo-code, Concept of Variable, Data types in Pseudo-code, The C Standard Library and Open Source, Input/Output, Arithmetic expressions, Assignment statement, Operator precedence, Concept of Integer division, Flowchart and its notations, Typical C Program Development Environment, Role of Compiler and Linker, Test Driving C Application. Introduction to C Programming: A Simple C Program: Printing Text, Adding Two Integer, Memory Concepts, Arithmetic in C, Operators. Decision Making: Equality and Relational Operators. Structured Program Development: The if, if...else, while Nested Control Statements. Program Control: for, switch, do...while, break, continue, Logical Operators. Functions: Modularizing Program in C, Math Library Functions, Function Definitions and Prototypes, Function-Call Stack and Stack Frames, Stack rolling and unrolling, Headers, Passing Arguments by Value and by Reference, Random Number Generation, Scope Rules, Recursion, Recursion vs Iteration. Arrays: Defining Arrays, Character Arrays, Static and Automatic Local Arrays, Passing Arrays to Function, Sorting and Searching Arrays, Multidimensional and Variable Length Arrays. Pointers: Pointer Definitions and Initialization, Pointer Operators, Passing Arguments to Function by Reference, Using the const and sizeof Operator, Pointer Expressions and Arithmetic, Pointers and Arrays, Array of Pointers, Function Pointers. Characters and Strings: Strings and Characters, Character Handling Library, String Functions, Library Functions. Formatted Input/Output: Streams, Formatted Output with printf, Formatted Input with scanf. Structures: Defining Structures, Accessing Structure Member, Structures and Functions, typedef, Unions. Bit Manipulation and Enumeration: Bitwise Operators, Bit Fields, Enumeration Constants. File Processing: Files and Streams, Creating, Reading and Writing data to a Sequential and a Random-Access File. Preprocessor: #include, #define, Conditional Compilation, #error and #pragma, # and ## Operators, Predefined Symbolic Constants, Assertions. Other Topics: Variable Length Argument List, Using Command Line Arguments, Compiling Multiple-Source-File Programs, Program Termination with exit and atexit, Suffixes for Integer and Floating-Point Literals, Signal Handling, Dynamic Memory Allocation calloc and realloc, goto. Advance Topics: Self-Referential Structures, Linked Lists. Efficiency of Algorithms, Selection and Insertion Sort.</p>

Course Title	Computer Networks		
Course Code	CC-214		
Credit Hours	3 (2,3)		
Category	Computing Core		
Prerequisite	None		
Co-Requisite	None		
Follow-up	None		
Course Introduction	This course provides fundamental concepts related to computer networks. After completion of the course, the students will be able to understand Computer Networks basics, network types, layered communication models and protocols.		
Course Learning Outcomes (CLOs)	At the end of the course, the students will be able to:	BT	PLO
	CLO1: Describe the key terminologies and technologies of computer networks	C2 (Describe)	1
	CLO2: Explain the services and functions provided by each layer in the Internet protocol stack	C2 (Explain)	1
	CLO3: Identify various internetworking devices and protocols and their functions in a networking	C4 (Identify)	1,2
	CLO4: Analyze working and performance of key technologies, algorithms and protocols	C4 (Analyze)	3
	CLO5: Build Computer Network on various Topologies.	C5 (Build)	4,5
Syllabus	<p>Introduction: Protocols architecture, basic concepts of networking, network topologies.</p> <p>Layered Architecture: Physical layer functionality, data link layer functionality, multiple access techniques, circuit switching and packet switching, LAN technologies, wireless networks, MAC addressing, networking devices, network layer protocols, IPv4 and IPv6, IP addressing, subnetting, CIDR, routing protocols, transport layer protocols, ports and sockets, connection establishment, flow and congestion control, application layer protocols, latest trends in computer networks.</p> <p>Lab Topics: Introduction to Wireshark, HTTP GET/response interaction, DNS role in the Internet infrastructure, TCP segments sent and received in transferring, UDP transport protocol, IP investigate the IP protocol, NAT behavior of the NAT protocol, DHCP examine the DHCP packets captured, ICMP capturing the packets generated by the Ping program, Ethernet and ARP investigate the Ethernet protocol and the ARP protocol, 802.11 Wireless investigate the 802.11 wireless network protocol, SSL investigate the Secure Sockets Layer (SSL) protocol</p>

Title	Object Oriented Programming		
Code	CC-211		
Credit Hours	3 (3,0)		
Category	Computing Core		
Prerequisite	CC-112 Programming Fundamentals		
Co-Requisite	None		
Follow-up	CC-213 Data Structures, CC-310 Artificial Intelligence, DI-328 Parallel and Distributed Computing, EI-333 Mobile Application Development		
Course Introduction	The course aims to focus on object-oriented concepts, analysis and software development. The basic concept of OOP is covered in this course.		
Course Learning Outcomes (CLOs)	At the end of the lab, the students will be able to:	BT	PLO
	CLO1: Understand principles of object-oriented paradigm.	C2 (Understand)	1
	CLO2: Identify the objects & their relationships to build object-oriented solution	C4 (Identify)	2,3,4
	CLO3: Model a solution for a given problem using object-oriented principles	C3 (Apply)	4
	CLO4: Examine an object-oriented solution	C4 (Examine)	4
Syllabus	<p>Introduction to Object-oriented Design, History and Advantages of Object-oriented Design. Introduction to OOP and C++: Brief description of C++ concepts, Introduction to OOP. Introduction to Classes Objects and Member Functions: Encapsulation and Abstraction, Class and Object, Getter/Setter Functions, Access Specifiers, Constructors, Overloaded Constructor, Default Constructor, Destructor. Functions: Inline Functions, Function Overloading. Class Templates array: Function Templates, Class Templates array, Vectors and Multidimensional Array, Reference to private Data Members, Default Member wise Assignment, const Objects, const Member Functions. Composition and Aggregation: Object Composition and Aggregation, Class Separation using header. Friend Classes and Functions: Friend Functions, Friend Classes. static Members: "this" pointer, static Data Members, static Member Functions. Copy Constructor: Default Copy Constructor. Operator Overloading: Overloaded Operators of Standard Library, Operator Overloading, Overloading Binary Operators, Overloading Unary Operators, Overloading ++ Operator, Overloading – Operator, Dynamic Memory Management, Operators as Members vs Non-Members, Conversion between Types, Explicit Constructor and Conversion Operators, Overloading the Function call Operator. Stream I/O: Introduction, Streams, Streams Input, Streams Output, Object Streams, data and object serialization using object streams. Inheritance: Introduction, Base and Derived Classes, Relationships between Base and Derived Classes, Constructors in Derived Classes, Destructor in Derived Classes, public protected and private Inheritance. Polymorphism: Relationship among Objects in Inheritance, Virtual Functions, Virtual Destructors, Pure Virtual Functions, Abstract and Concrete Classes. File Processing: Files and Streams, create a Sequential File, read a Sequential File, update a Sequential File, Random Access File, create a Random-Access File, read a Random-Access File, update a Random-Access File, Exception Handling: Flow of Control, Rethrowing an Exception, Constructor Destructor and Exception handling. Generic Programming Concepts: Custom Templates, Class Templates, Function Templates, Arguments to Templates, Overloading Function Templates. Standard Library: Containers, Iterators, Adapters, Sequence Containers, Associative Containers, Container Adapters, Minimum Iterator Requirements, Lambda Expressions, Function Objects.</p>

Course Title	Computer Organization and Assembly Language		
Course Code	CC-210		
Credit Hours	3 (2,3)		
Category	Computing core		
Prerequisite	CC-110 Digital Logic Design		
Co-Requisite	None		
Follow-up	None		
Course Introduction	The main objective of this course is to introduce the organization of computer systems and usage of assembly language for optimization and control. Emphasis should be given to expose the low-level logic employed for problem solving while using assembly language as a tool. At the end of the course the students should be capable of writing moderately complex assembly language subroutines and interfacing them to any high-level language.		
Course Learning Outcomes (CLOs)	At the end of the course, the students will be able to:	BT	PLO
	CL01: Acquire the basic knowledge of computer organization computer architecture and assembly language	C1 (Acquire)	1
	CL02: Understand the concepts of basic computer organization, architecture, and assembly language techniques	C2 (Understand)	2
	CL03: Solve the problems related to computer organization and assembly language	C3 (Apply)	3,4,5
Syllabus	<p>Topics: Introduction to computer systems, Information is bits + context, Evolution of Intel Microprocessor, Introduction to Assembly Language, Computer Organization, Storage devices hierarchy, The Components of a Microcomputer System, Instruction Cycle, Memory Architecture, Memory Representation & Hierarchy, Data, Address, Control Busses, Processor architecture: the Y86 instruction set architecture, logic design and the Hardware Control Language (HCL), sequential Y86 implementations, general principles of pipelining, pipelined Y86 implementations, Intel 8086 family of Microprocessors, Organization of Intel 8088/8086 Processor, Machine-level representation of programs: a historical perspective, program encodings, data formats, accessing information, arithmetic and logical operations, control, procedures, array allocation and access, heterogeneous data structures, putting it together: understanding pointers, Registers and their categories Function of Registers, Memory Addressing, Real Mode Memory Structure, Memory Segmentation (Segment/Offset Scheme), Computer Instructions for Basic computer (Memory Reference, Register Reference and I/O instructions), Addressing modes, Instruction Cycle, Timing and Decoding, RTL of the instructions, Complete flow chart for the Basic Computer Operation, Addressing Modes, Design of the CPU of a basic computer</p> <p>Lab Topics: Assembly Language Syntax, using the gdb debugger, Program data, Variables, Variables, Program Structure, Machine-level representation of programs: a historical perspective, program encodings, data formats, accessing information, arithmetic and logical operations, control, Memory Models, Data Segments, Stack Segment, Code Segment, Variants of MOV instruction, Some Basic Instructions, XCHG, ADD, SUB, INC, DEC, NEG, Input and Output Instructions, The Processor Status and Flags Register, Flow Control Instructions, Unconditional Jump, Various Conditional Jumps, Looping Structures, Logic Instructions, AND, OR, XOR, NOT, TEST, Shift Instructions, Rotate Instructions, Procedures to Input Binary, Decimal, Hexadecimal Numbers, Procedures to output Binary, Decimal, Hexadecimal Numbers, The Stack, PUSH and POP Instructions, CALL and RET instructions, MUL instruction, DIV instruction, Related Programming examples, XLAT instruction, String Instructions, MOVS, MOVSB/W, LOADSB/W, STOSB/W, SCASB/W, CMPSB/W, Procedures, File Operations, Reading a File, Writing a File</p>		
Suggested Instructional/ Reading Material	<ol style="list-style-type: none"> 1. Course Title	Database Systems		
Course Code	CC-215		
Credit Hours	3 (3,0)		
Category	Computing Core		
Prerequisite	None		
Co-Requisite	None		
Follow-up	DI-324: Database Administration and Management		
Course Introduction	The course aims to introduce basic database concepts, different data models, data storage and retrieval techniques and database design techniques. The course primarily focuses on relational data model and DBMS concepts		
Course Learning Outcomes (CLOs)	At the end of the course, the students will be able to:	BT	PLO
	CLO1: To understand the basic concepts of database systems and Database System environment.	C2 (Understand)	1
	CLO2: To develop strong concepts of data modeling techniques	C2 (Understand)	1,2
	CLO3: Understanding of database design phases and techniques for performance improvement	C2 (Understand)	1,2
	CLO4: To understand the concept of transaction management, concurrency control, database recovery, and distributed databases	C2 (Understand)	1,2
	CLO5: To learn SQL and develop expertise in writing SQL queries	C3 (Apply)	3,4,5
	CLO6: To develop the fundamental knowledge of PL/SQL, stored procedures, and database triggers	C3 (Apply)	3,4,5
	CLO7: To be able to design a database system for small business organizations	C5 (Design)	3,4,5,7
Syllabus	<p>File Systems and Databases: Introduction, A File system Critique, Database Systems, Database approach vs file-based system, database architecture, three level schema architecture, data independence, Database Models. Introduction to RDBMS: Logical view of Data; Entities and Attributes, Tables and their Characteristics, Keys; relational data model, attributes, schemas, tuples, domains, relation instances, keys of relations, integrity constraints. Relational Algebra: Relational Database Operators, selection, projection, Cartesian product, types of joins. Entity Relationship (E-R) Modeling: Basic Modeling Concepts, entity sets, attributes, relationship, entity-relationship diagrams, Normalization of Database Tables: Objectives, Forms, Normalization and Database Design, functional dependencies, normal forms, Denormalization, Structured Query Language (SQL): Introduction, DDL Commands, Joins and subqueries in SQL, Grouping and aggregation in SQL, DML Commands, DCL Commands, Complex Queries and SQL Functions, Procedural SQL; Triggers, Stored procedures. Database Design: The System Development Life Cycle (SDLC), The Database Life Cycle (DBLC), Database Design Strategies, Transaction Management and Concurrency Control: Introduction, Transaction Properties and Types, Concurrency Control Issues, Database Recovery Management. DDBS: Evolution, Components, Distributed processing and distributed databases, Distributed database transparency features. Distributed database design, Data fragmentation, Data replication, NoSQL systems.</p>

Course Title	Database Systems Lab		
Course Code	CC-215-L		
Credit Hours	1 (0,3)		
Category	Computing Core		
Prerequisite	None		
Co-Requisite	None		
Follow-up	DI-324: Database Administration and Management		
Course Introduction	The course aims to introduce the Structured Query Language (SQL). It covers the set of commands related to Data Retrieval, Data Definition Language (DDL), Data Manipulation Language (DML), Data Control Language (DCL). It will followed up by procedural flavor of SQL (PL/SQL).		
Course Learning Outcomes (CLOs)	At the end of the lab, the students will be able to:	BT	PLO
	CLO1: To learn SQL and develop expertise in writing SQL queries	C3 (Apply)	3,4,5
	CLO2: To develop the fundamental knowledge of PL/SQL, stored procedures, and database triggers	C3 (Apply)	3,4,5
	CLO3: To be able to design a database system for small business organizations	C5 (Design)	3,4,5,7
Syllabus	<p>Introduction to SQL environment: Writing Basic SQL Statements; SELECT Statement: Arithmetic Expressions, Operator Precedence, Null Value, Column Alias, Concatenation Operator, FROM Clause: Table list, Table Alias. Restricting and Sorting Data; WHERE Clause: Comparison operators, Logical operators, ORDER BY clause, Display table Structure.</p> <p>Single row functions: character functions, number functions, date functions, type conversion functions. Multi row Functions: Sum, Average, Standard deviation, Variance, Subgrouping of data, Group by Clause, use of Having clause. Join: Cross product, natural join, Equi-join, Non equi-join, left outer-join, right outer-join, self-join. Subquery: use of subquery, subquery syntax, Multiple Column Subqueries, pairwise comparison, Non-pair wise comparison, Null Value in a subquery, Subquery in From Clause. Creating and Altering SQL tables: Create table statement, Defining Constraints, Column Level and Table Level, NOT NULL Constraint, UNIQUE Key Constraint, PRIMARY Key Constraint, FOREIGN Key Constraint, CHECK Constraint, Alter table statement, drop statement, Data Manipulation: Insert, Update, Delete statements. SQL Objects: Views, Sequences, Indexes. User Management: Create user, user privileges, user groups, Grant, Revoke statements.</p> <p>Introduction to Procedural SQL (PL/SQL), Sections of a PL/SQL block, Variable declaration and initialization, SELECT statement in PL/SQL, Arithmetic expressions, Selection, Repetition, Exception Handling, Cursors, Stored Procedures and Functions, Introduction to Database Triggers</p>		
Suggested Instructional/ Reading Material	<ol style="list-style-type: none"> 1. Introduction to Oracle 9i: SQL 2. Michael McLaughlin, Oracle Database 11g PL/SQL Programming, 1st Edition, McGraw-Hill Education, 2008, ISBN: 0071494456. 3. Jason Price, Oracle Database 11g SQL, McGraw Hill. ISBN: 0071498508. 		

Course Title	Software Engineering		
Course Code	CC-212		
Credit Hours	3 (3,0)		
Category	Computing Core		
Prerequisite	None		
Co-Requisite	None		
Follow Up	None		
Course Learning Outcomes (CLOs)	At the end of the course, the students will be able to:	BT	PLO
	CLO1: Describe various software engineering processes and activates	C1 (Describe)	1
	CLO2: Apply the system modeling techniques to model a medium size software system	C3 (Apply)	1,2
	CLO3: Apply software quality assurance and testing principles to medium size software systems	C3 (Apply)	2,3
Syllabus	Introduction: Nature of Software, Overview of Software Engineering, Professional software development, Software engineering practice, Software process structure, Software Process Models: Waterfall Model, Incremental Model, Prototyping Model, Spiral Model, RAD Model. Agile Software Development: Agile process models, Agile development techniques. Introduction to Project Management, Introduction to Requirements Engineering, Functional and non-functional requirements. Analysis Model: Context models, Interaction models, Structural models, behavioral models, model driven engineering, Data modeling, Functional Modeling, Behavioral Modeling. Software Design: Data Design, Architectural Design, Component Level Design, User Interface Design. Object Oriented Analysis & Design Basics: Introduction to UML, UML Diagrams. Use Case Modeling, Rational Rose overview, Use case modeling in Rational Rose. Domain Model: Identifying business classes, Domain Model Associations, Domain Model Attributes, Implementation of Sequence Diagram and Domain model in Rational Rose. Interaction Diagram: Sequence diagrams, Collaboration Diagrams, Implementation of Sequence and Collaboration diagrams in Rational Rose. Design Class Diagram, Mapping Design to Code. Software Testing Fundamentals. Design patterns, Software testing and quality assurance. Software evolution. Project Management: Project planning, configuration management. Software Process improvement.

Co-Requisite	None		
Follow-up	CC-313 Analysis of Algorithms, DI-325 Cyber Security, CC-311 Operating Systems		
Course Introduction	The course is designed to teach students structures and schemes, which allow them to write programmer to efficiently manipulate, store, and retrieve data. Students are exposed to the concepts of time and space complexity of computer programs.		
Course Learning Outcomes (CLOs)	At the end of the course, the students will be able to:	BT	PLO
	CLO1: Implement various data structures and their algorithms and apply them in implementing simple applications	C3 (Apply)	1,2
	CLO2: Analyze simple algorithms and determine their complexities.	C4 (Analyze)	3
	CLO3: Apply the knowledge of data structure to other application domains	C3 (Apply)	3,4
	CLO4: Design new data structures and algorithms to solve problems	C6 (Design)	4,5
Syllabus	<p>Algorithm Specification: Properties of Algorithm, examples, performance, analysis, measurement, and Big Oh notation. Introduction to ADTs: Array and Polynomial as an ADT, Sparse Matrices, and Representation of Arrays. The Stack ADT: Linked list and array implementations, Expressions, Postfix Notation, and Infix to postfix conversion. The Queue ADT: Linked and array implementations of circular and double ended queue. Recursion: Recursive Definition and Processes, Writing Recursive Programs. Divide and Conquer Algorithms, Self-Referencing Classes and Dynamic Memory Allocation, Garbage Collection. Linked List: Singly Linked Lists, Circular Lists, Linked Stacks and Queues (Double Ended List), Doubly Linked Lists. Trees: Introduction to Trees, Logical construction and Traversing of Binary Trees, Implementation of Binary Trees (Insertion and Traversing), Searching and deletion in Binary Trees, Binary Search Tree, Introduction to Balanced and AVL Trees. Heaps: Heaps and Heaps as Priority Queues, Double Ended Priority Queue. Searching: Linear Search, Binary Search, and Types of Indexing. Hashing: Hash Functions: Division, Open Addressing; Overflow Handling: Chaining; Introduction to advanced topics: B-Trees, M-Way Trees, Generalized List etc. Sorting: Selection, Insertion, Merge, Quick, Bubble, Heap, Shell, Radix, and Bucket sorts. Graphs: Graph terminology, Adjacency List and Adjacency Matrix and Adjacency list representation of Graph; Elementary Graph Operations: Breadth First Search and Depth First Search, Spanning Trees (BFSST, DFSST), topological order, shortest path.</p>

Course Title	Operating Systems		
Course Code	CC-311		
Credit Hours	2 (2,0)		
Category	Computing Core		
Prerequisite	None		
Co-Requisite	None		
Follow-up	DI-323: System and Network Administration		
Course Introduction	To help students gain a general understanding of the principles and concepts governing the functions of operating systems and acquaint students with the layered approach that makes design, implementation and operation of the complex OS possible.		
Course Learning Outcomes (CLOs)	At the end of the course, the students will be able to:	BT	PLO
	CLO1: Understand the characteristics of different structures of the Operating Systems and the core functions of the Operating Systems	C2 (Understand)	1,2
	CLO2: Analyze and evaluate the algorithms of the core functions of the Operating Systems and explain the major performance issues with regard to the core functions	C4 (Analyze)	3
	CLO3: Demonstrate the knowledge in applying system software and tools available in modern operating systems.	C3 (Demonstrate)	3,4
Syllabus	<p>Introduction: Operating systems basics, system calls, process concept and scheduling, inter-process communication, multithreaded programming, multithreading models, threading issues. Process Scheduling: Algorithms, thread scheduling, multiple-processor scheduling, synchronization, critical section, synchronization hardware, synchronization problems, deadlocks, detecting and recovering from deadlocks. Memory Management: swapping, contiguous memory allocation, segmentation & paging, virtual memory management, demand paging, thrashing, memory-mapped files. File Systems: file concept, directory and disk structure, directory implementation, free space management, disk structure and scheduling, swap space management. System Protection: Virtual machines, operating system security.</p> <p>Interacting with Linux Operating System: Virtualization and Hypervisors. Installation of VMWare and Ubuntu, Installation G++ the C++ Compiler on Ubuntu VMWare, Basic commands of Linux, Working with VIM editor, Compiling and executing a C/C++ program in VIM, File System Architecture: Schematic view of a standard UNIX file system. File System Mounting: Introduction to the concept of file system mounting, Linux configuration files related to file system mounting. File Permissions: standard file permissions. Use of chmod and chown commands. Device files: Seven File Types in Linux and the concept of device files. Terminal Attributes: Overview of Terminal Devices and current attributes of the terminal driver. Hard and Soft Links. Managing services using systemd: Introduction to Linux system daemon. Shell commands to manage services using systemctl. Booting process of a Linux system.</p> <p>Linux Shell Programming: Linux System Call Interface, Use of GNU gcc compiler, Implementation of process scheduling algorithms, Process Creation and Termination: getpid(), getppid(), fork(), exit(), wait() and execl() system calls. File management in Linux. Concept of PPFDT. Concept of input, output and error redirection. Inter Process Communication: Linux IPC tools, Pipes, FIFOS and Sockets. Use of pipes and fifos on a Linux terminal. Signals: Signal delivery and execution of a signal handler. Synchronous and Asynchronous signals. Threads and Scheduling: Writing multi-threaded C programs using library calls from the POSIX pthread library like pthread_create(), pthread_join(), and pthread_exit(), Socket programming using threads in Linux, Implementation of process synchronization techniques</p>

Course Title	Information Security		
Course Code	CC-312		
Credit Hours	3 (2,3)		
Category	Computing Core		
Prerequisite	None		
Co-Requisite	None		
Follow-up	None		
Course Introduction	This course provides a broad overview of the threats to the security of information systems, the responsibilities and basic tools for information security, and the levels of training and expertise needed in organizations to reach and maintain a state of acceptable security. It covers concepts and applications of system and data security. Areas of particular focus include secure network design, implementation and transition issues, and techniques for responding to security breaches.		
Course Learning Outcomes (CLOs)	At the end of the course, the students will be able to:	BT	PLO
	CLO1: Explain key concepts of information security such as design principles, cryptography, risk management, and ethics.	C2 (Explain)	1,2
	CLO2: Discuss legal, ethical, and professional issues in information security.	C2 (Discuss)	1,2
	CLO3: Apply various security and risk management tools for achieving information security and privacy.	C3 (Apply)	3,4,5
	CLO4: Identify appropriate techniques to tackle and solve problems in the discipline of information security.	C4 (Identify)	3,4,5
Syllabus	Information security foundations, security design principles; security mechanisms, symmetric and asymmetric cryptography, encryption, hash functions, digital signatures, key management, authentication and access control; software security, vulnerabilities and protections, malware, database security; network security, firewalls, intrusion detection; security policies, policy formation and enforcement, risk assessment, cybercrime, law and ethics in information security, privacy and anonymity of data.		
Suggested Instructional/ Reading Material	<ol style="list-style-type: none"> 1. M. Whitman and H. Mattord, Principles of Information Security, 6th edition. 2. William Stallings, Computer Security: Principles and Practice, 3rd edition. 3. Dieter Gollmann, Computer Security, 3rd edition. 4. William Easttom, Computer Security Fundamentals, 3rd edition. 		

Course Title	Artificial Intelligence		
Course Code	CC-310		
Credit Hours	3 (2,3)		
Category	Computing core		
Prerequisite	CC-213: Data Structures		
Co-Requisite	None		
Follow-up	None		
Course Introduction	Artificial Intelligence has emerged as one of the most significant and promising areas of computing. This course focuses on the foundations of AI and its basic techniques like Symbolic manipulations, Pattern Matching, Knowledge Representation, Decision Making and Appreciating the differences between Knowledge, Data and Code. AI programming language Python has been proposed for the practical work of this course.		
Course Learning Outcomes (CLOs)	At the end of the course, the students will be able to:	BT	PLO
	CL02: Understand the fundamental concepts in the field of artificial intelligence	C2 (Understand)	1,2
	CL03: Implement artificial intelligence techniques and case studies	C3 (Apply)	3,4,5
	CL03: Understand and apply the Object-oriented concepts in the programming languages.	C4 (Identify)	1,2,3
Syllabus	<p>An Introduction to Artificial Intelligence and its applications towards Knowledge Based Systems; Symbolic AI: the physical symbol system hypothesis. Search: exhaustive & heuristic search techniques. Introduction to Reasoning and Knowledge Representation, Problem Solving by Searching (Informed searching, Uninformed searching, Heuristics, Local searching, Minmax algorithm, Alpha beta pruning, Game-playing); Case Studies: General Problem Solver, Eliza, Student, Macsyma; Learning from examples; ANN and Natural Language Processing; Recent trends in AI and applications of AI algorithms, Game playing, Genetic algorithms, Introduction to Machine Learning for AI, Decision Trees, Bayesian classification, Artificial Neural Networks, Computer Vision.</p> <p>Lab Topics: Introduction to Python programming, variables, expressions, operands and operators, loops, control structures, debugging, error messages, functions, strings, lists, object-oriented constructs and basic graphics in the languages. Logic programming: knowledge representation & search in the context of logic programming. Reasoning in logic programming: unification, horn clause logic, and resolution, Knowledge Representation Schemas: Logic, frames, semantic nets, scripts; problems in knowledge representation. Expert systems.</p>

Course Title	Analysis of Algorithms		
Course Code	CC-313		
Credit Hours	3 (3,0)		
Category	Computing Core		
Prerequisite	CC-213: Data Structures		
Co-Requisite	None		
Follow Up	None		
Course Introduction	Detailed study of the basic notions of the design of algorithms and the underlying data structures. Several measures of complexity are introduced. Emphasis on the structure, complexity, and efficiency of algorithms.		
Course Learning Outcomes (CLOs)	At the end of the course, the students will be able to:	BT	PLO
	CLO1: Explain what is meant by “best”, “expected”, and “worst” case behavior of an algorithm.	C2 (Explain)	1,2
	CLO2: Identify the characteristics of data and/or other conditions or assumptions that lead to different behaviors.	C3 (Identify)	1,2
	CLO3: Determine informally the time and space complexity of simple algorithms.	C3 (Determine)	2,3
	CLO4: List and contrast standard complexity classes.	C1 (Know)	1.2
	CLO5: Use big O, Omega, Theta notation formally to give asymptotic upper bounds on time and space complexity of algorithms.	C3 (Apply)	3,4
	CLO6: Use of the strategies (brute-force, greedy, divide-and-conquer, and dynamic programming) to solve an appropriate problem.	C3 (Apply)	3,4
	CLO7: Solve problems using graph algorithms, including single source and all-pairs shortest paths, and at least one minimum spanning tree algorithm.	C3 (Apply)	3,4
	CLO8: Trace and/or implement a string-matching algorithm.	C3 (Apply)	3,4
Syllabus	Topics: Role of Algorithm in Computing, Analysis on nature of input and size of input , Designing Algorithms, Growth of Functions, Asymptotic Notations, Big-O, Big Ω , Big Θ , little-o, little- ω , loop invariants, Brute Force Approach, Divide-and-conquer approach; Sorting Algorithm analysis, Merge, Quick Sort, Greedy approach; Recursion and recurrence relations, Time Complexity of Recursive Algorithms, Algorithm Design Techniques, Dynamic Programming, Greedy Algorithms, String Matching, Search trees; Heaps; Hashing; Graph algorithms, sparse graphs, DFS, BFS, Minimum Spanning Trees, Shortest Path Algorithms, NP Completeness, Polynomial Time Algorithm, Polynomial Time verification.		
Suggested Instructional/ Reading Material	<ol style="list-style-type: none"> 1. Thomas H. Cormen, Charles E. Leiserson, Ronald L. Rivest and Clifford Stein, Introduction to Algorithms, 3rd Edition, The MIT Press, 2009, ISBN-10: 0262033844, ISBN-13: 978-0262033848 2. Algorithm Design, (1st edition, 2013/2014), Jon Kleinberg, Eva Tardos 3. Algorithms, (4th edition, 2011), Robert Sedgwick, Kevin Wayne 		

2) Mathematics & Supporting

Course Title	Multivariable Calculus		
Course Code	MS-253		
Credit Hours	3 (3,0)		
Category	Mathematics & Supporting		
Prerequisite	GE-162: Calculus and Analytical Geometry		
Co-Requisite	None		
Follow Up	None		
Course Learning Outcomes (CLOs)	At the end of the course, the students will be able to:	BT	PLO
	CL01: Know the concepts and applications of multivariable calculus	C1 (Know)	1
	CL02: Describe scalar and vector products related techniques.	C2 (Describe)	1
	CL03: Identify and solve problems related to differentiation and integration.	C3 (Apply)	1,3
	CL04: Know the concepts of divergence, curl, vector fields and related theorems.	C1 (Know)	1
Syllabus	<p>Topics: Motivation and applications of the course, Rectangular coordinates in 3-space, spheres, cylindrical surfaces, Vectors, Scalar (dot) products, projections, Vector (cross) products, Parametric Equations of Lines, Planes in 3-space, Quadric surfaces, Spherical and cylindrical coordinates, Introduction to vector-valued functions, Calculus of vector-valued functions, Change of parameter, Arc length, Unit tangent, normal, and binormal vectors, Curvature, Functions of two or more variables, Limits, Continuity, Partial derivatives, Differentiability, Local Linearity, Differentials, The Chain rule, Directional derivatives and Gradients, Tangent planes and normal vectors, Maxima and minima of functions of two variables, Lagrange multipliers, Double integral, Double integrals over Nonrectangular Regions, Double integrals in Polar Coordinates, Parametric surfaces, Surface area, Triple integrals, Triple Integrals in Cylindrical and Spherical Coordinates, Divergence and Curl of vector valued functions, Line integrals, Conservative Vector Fields, Green's Theorem, Surface integrals, application of surface integrals(Flux), Divergence Theorem, Stokes' theorem.</p>		
Suggested Instructional/ Reading Material	Howard Anton, Irl C. Bivens and Stephen Davis, Calculus, 11 th Edition, Wiley, 2016, ISBN-10: 1119228581, ISBN-13: 978-1119228585.		

Course Title	Probability and Statistics		
Course Code	MS-251		
Credit Hours	3 (3,0)		
Category	Mathematics & Supporting		
Prerequisite	None		
Co-Requisite	None		
Follow-up	None		
Course Learning Outcomes (CLOs)	At the end of the course, the students will be able to:	BT	PLO
	CLO1: Know the concept and applications of probability and statistics.	C1 (Know)	1
	CLO2: Describe expectation and distributions	C2 (Describe)	1
	CLO3: Solve single sample and one- and two- sample estimation.	C3 (Apply)	1,3
	CLO4: Use regression techniques.	C3 (Apply)	1,3
Syllabus	<p>Introduction: Statistics and Data Analysis, Statistical Inference, Samples, Populations, and the Role of Probability. Sampling Procedures, Discrete and Continuous Data, Statistical Modeling, Types of Statistical Studies. Probability: Sample Space, Events, Counting Sample Points, Probability of an Event, Additive Rules, Conditional Probability, Independence, and the Product Rule, Bayes' Rule. Random Variables and Probability Distributions. Mathematical Expectation: Mean of a Random Variable, Variance and Covariance of Random Variables, Means and Variances of Linear Combinations of Random Variables, Chebyshev's Theorem. Probability Distributions: Discrete Probability Distributions, Continuous Probability Distributions. Fundamental Sampling Distributions: Sampling Distributions and Data Descriptions, Random Sampling, Sampling Distributions, Sampling Distribution of Means and the Central Limit Theorem. Sampling Distribution of S^2, t-Distribution, F-Quantile and Probability Plots. Single Sample & One- and Two-Sample Estimation Problems: Single Sample & One- and Two-Sample Tests of Hypotheses. The Use of P-Values for Decision Making in Testing Hypotheses (Single Sample & One- and Two-Sample Tests). Regression: Linear Regression and Correlation, Least Squares and the Fitted Model, Multiple Linear Regression and Certain, Nonlinear Regression Models, Linear Regression Model Using Matrices, Properties of the Least Squares Estimators.</p>		
Suggested Instructional/ Reading Material	<ol style="list-style-type: none"> 1. Dimitri P. Bertsekas, John Tsitsiklis, Introduction to probability, Athena Scientific, 2nd Edition, 2008, ISBN: 978-1886529236. 2. Jay L. Course Title	Linear Algebra		
Course Code	MS-252		
Credit Hours	3 (3,0)		
Category	Mathematics & Supporting		
Prerequisite	None		
Co-Requisite	None		
Follow-up	None		
Course Learning Outcomes (CLOs)	At the end of the course, the students will be able to:	BT	PLO
	CLO1: Know the concept and application of leaner algebra.	C1 (Know)	1
	CLO2: Describe geometry of vector spaces and optimization.	C2 (Describe)	1
	CLO3: Perform matrix algebra.	C3 (Apply)	1,3
Syllabus	<p>Linear Equations in Linear Algebra: Systems of Linear Equations, Row Reduction and Echelon Forms, Vector Equations, The Matrix Equation $Ax = b$, Solution Sets of Linear Systems, Applications of Linear Systems, Linear Independence, Introduction to Linear Transformations, The Matrix of a Linear Transformation, Linear Models in Business, Science, and Engineering. Matrix Algebra: Matrix Operations, The Inverse of a Matrix, Characterizations of Invertible Matrices, Partitioned Matrices, Matrix Factorizations, Applications to Computer Graphics, Subspaces of R^n, Dimension and Rank. Determinants: Introduction to Determinants, Properties of Determinants, Cramer's Rule, Volume, and Linear Transformations. Vector Spaces: Vector Spaces and Subspaces, Null Spaces, Column Spaces, and Linear Transformations, Linearly Independent Sets; Bases, Coordinate Systems, The Dimension of a Vector Space, Rank, Change of Basis. Eigenvalues and Eigenvectors: Eigenvectors and Eigenvalues, The Characteristic Equation, Diagonalization, Eigenvectors and Linear Transformations, Complex Eigenvalues, Discrete Dynamical Systems. Orthogonality and Least Squares: Inner Product, Length, and Orthogonality, Orthogonal Sets, Orthogonal Projections, The Gram-Schmidt Process, Least-Squares Problems, Applications to Linear Models, Inner Product Spaces, Applications of Inner Product Spaces. Symmetric Matrices and Quadratic Forms: Diagonalization of Symmetric Matrices, Quadratic Forms, Constrained Optimization, The Singular Value Decomposition, Applications to Image Processing and Statistics. The Geometry of Vector Spaces: Affine Combinations, Affine Independence, Convex Combinations, Hyperplanes. Optimization: Matrix Games, Linear Programming—Geometric Method, Linear Programming—Simplex Method, Duality.</p>

Course Title	Technical and Business Writing		
Course Code	MS-254		
Credit Hours	3 (3,0)		
Category	Mathematics & Supporting		
Prerequisite	None		
Co-Requisite	None		
Follow-up	None		
Course Learning Outcomes (CLOs)	At the end of the course, the students will be able to:	BT	PLO
	CLO1: Understanding of technical reporting.	C2 (Understand)	1,6,7,10
	CLO2: Organizing information and generation of solution	C3 (Apply)	1,6,7,10
	CLO3: Writing Proposals and Reports	C3 (Demonstrate)	1,6,7,10
Syllabus	<p>Overview of technical reporting, use of library and information gathering, administering questionnaires, reviewing the gathered information; Technical exposition; topical arrangement, exemplification, definition, classification and division, causal analysis, effective exposition, technical narration, description and argumentation, persuasive strategy, Organizing information and generation solution: brainstorming, organizing material, construction of the formal outline, outlining conventions, electronic communication, generation solutions. Polishing style: paragraphs, listening sentence structure, clarity, length and order, pomposity, empty words, pompous vocabulary, document design: document structure, preamble, summaries, abstracts, table of contents, footnotes, glossaries, cross-referencing, plagiarism, citation and bibliography, glossaries, index, appendices, typesetting systems, creating the professional report; elements, mechanical elements and graphical elements. Reports: Proposals, progress reports, Leaflets, brochures, handbooks, magazines articles, research papers, feasibility reports, project reports, technical research reports, manuals and documentation, thesis. Electronic documents, Linear versus hierarchical structure documents, Business Letters; Proposals and Business Plans; Writing Proposals and Reports; Short Reports; Long Formal Reports; Specification Documents; Review of Language; Writing Technical Research Reports; Documentation and Research Citation; Job Application and Resumes.</p>

3) Math Deficiency

Course Title	Math Deficiency - I		
Course Code	MD-001		
Credit Hours	3* (3,0)		
Category	Math Deficiency		
Prerequisite	None		
Co-Requisite	None		
Follow Up	Math Deficiency-II		
Course Learning Outcomes (CLOs)	At the end of the course, the students will be able to:	BT	PLO
	CLO1: Know the concepts and applications of sets, relations, functions, systems of equations, trigonometric functions and matrix algebra	C1 (Know)	1
	CLO2: Describe system of linear equations, matrix algebra, trigonometry and related techniques.	C2 (Describe)	1
	CLO3: Solve problems related to system of linear equations, matrix algebra, and trigonometry.	C3 (Apply)	1,3
	CLO4: Know the general form of Conic, polar coordinate and parametric equations.	C1 (Know)	1
Syllabus	<p>Sets: Definition, various types of set representation and operations. Relation and Function: Graphical transformation of one and two dimensional functions, Properties of functions, composition and inverses of functions, domain and range of the functions, Maximum and minimum values of functions, increasing and decreasing functions, zeros and intercept of functions, piecewise functions, continuity and Discontinuity of functions, Polynomials and rational functions, Polynomial long division and Synthetic division, Solution of rational functions, Absolute valued function, properties of absolute valued functions, Asymptotes (Horizontal, vertical and oblique), Exponential functions and their properties, Logs functions and their properties. Systems of Equations: Systems of Two Equations and Two Unknowns, Systems of Three Equations and Three Unknowns. Matrix Algebra: Addition, subtraction and multiplication. Row Operations and Row Echelon Forms, Augmented Matrices, Determinant of Matrices (2 x 2 and higher order matrices), Cramer's Rule, Inverse Matrices. Series and Sequences. Trigonometry: Angles in Radians and Degrees, Right Triangle Trigonometry, Law of Cosines & Sines, Area of Triangle, Graphs of Other Trigonometric Functions , Graphs of Inverse Trigonometric Functions, Basic Trigonometric Identities (Pythagorean, Sum and Difference, Double, Half, and Power Reducing), Trigonometric Equations. General Form of a Conic: Parabolas, Circles, Ellipses, Hyperbolas, Degenerate Conics. Polar and Parametric Equations: Polar and Rectangular Coordinates.</p>		
Suggested Instructional/ Reading Material	<ol style="list-style-type: none"> 1. Textbook of Algebra and Trigonometry Class XI is published by Punjab Textbook Board (PTB) Lahore, Pakistan. 2. Calculus and Analytic Geometry, MATHEMATICS 12 (Mathematics FSc Part 2 or HSSC-II), Punjab Text Book Board Lahore, Pakistan 3. Gilbert, S. S., B. C. Andy and B. Andrew, B. 2005. Linear Algebra and Its Applications. 4th Ed. Thomson Brooks/Cole, Belmont, CA, USA. 		

Course Title	Math Deficiency - II		
Course Code	MD-002		
Credit Hours	3* (3,0)		
Category	Math Deficiency		
Prerequisite	None		
Co-Requisite	None		
Follow Up	Calculus and analytic Geometry		
Course Learning Outcomes (CLOs)	At the end of the course, the students will be able to:	BT	PLO
	CLO1: Know the concepts and applications of complex number, sequences, series, permutations and combinations, integration and differentiation	C1 (Know)	1
	CLO2: Describe functions, limit, continuity chain rule and related techniques.	C2 (Describe)	1
	CLO3: Identify and solve problems related to differentiation and integration.	C3 (Apply)	1,3
Syllabus	<p>Complex Numbers: Complex Numbers, Arithmetic with Complex Numbers (Add, subtract, multiply and divide complex numbers), Trigonometric Polar Form of Complex Numbers, De Moivre's Theorem and nth Roots, Recursion. Sequences and Series: Sigma Notation, Arithmetic Series, Geometric Series (Sum infinite and finite geometric series and categorize geometric series). Counting with Permutations and Combinations. Basic Probability. Binomial Theorem. Limit: Notation, Graphs to Find Limits, Tables to Find Limits, Substitution to Find Limits, Rationalization to Find Limits, One Sided Limits and Continuity. Rate of Change: Instantaneous Rate of Change, Tangent Lines and Rates of Change. Derivatives: The Derivative Function, Introduction to Techniques of Differentiation, The Product and Quotient Rules, Derivatives of Trigonometric Functions, The Chain Rule, Derivatives of Logarithmic Functions, Derivatives of Exponential and Inverse Trigonometric Functions. Increase, Decrease, and Concavity, Relative Extrema, Absolute Maxima and Minima. Integrals: An Overview of the Area Problem, Area Under a Curve, The Indefinite Integral, Integration by Substitution, The Definition of Area as a Limit; Sigma Notation, The Definite Integral.</p>		
Suggested Instructional/ Reading Material	<ol style="list-style-type: none"> 1. Textbook of Algebra and Trigonometry Class XI is published by Punjab Textbook Board (PTB) Lahore, Pakistan. 2. Calculus and Analytic Geometry, MATHEMATICS 12 (Mathematics FSc Part 2 or HSSC-II), Punjab Text Book Board Lahore, Pakistan 3. Mark J. Christensen, Computing for Calculus, 1st Edition, Academic Press, (1st January 1981), 240 pages, ISBN: 9781483271088. 4. Lay, L. D. 2015. Probability and Statistics for Engineering and the Sciences, 9th Ed. Cengage Learning, Boston, MA, USA. 5. Howard, Anton, Irl Bivens, Stephen Davis, Calculus, 11th Ed, 2011, John Wiley & Sons, Inc. (1318 Pages) 		

4) Domain (IT) Core

Course Title	Web Technologies		
Course Code	DI-322		
Credit Hours	3 (2,3)		
Category	Domain Core		
Prerequisite	CC-112: Programming Fundamentals		
Co-Requisite	None		
Follow Up	EI-338: Enterprise Systems		
Course Learning Outcomes (CLOs)	At the end of the course, the students will be able to:	BT	PLO
	CLO1: Know web application architecture and, languages and application.	C1 (Know)	1
	CLO2: Describe various approaches to web application development.	C2 (Describe)	1
	CLO3: Develop web applications.	C3 (Apply)	1,3
Syllabus	<p>Introduction: Web Applications, TCP/IP Application Services. Web Servers: Basic Operation, Virtual hosting, Chunked transfers, Caching support, Extensibility. SGML, HTML5, CSS3. XML Languages and Applications: Core XML, XHTML, XHTML MP. Web Services: SOAP, REST, WML, XSL. Operations, Processing HTTP Requests, Processing HTTP Responses, Cookie Coordination, Privacy and P3P, Complex HTTP Interactions, Dynamic Content Delivery. Server Configuration. Server Security. Web Browsers Architecture and Processes: Active Browser Pages: JavaScript, DHTML, AJAX. JSON. Approaches to Web Application Development: Programing in any Scripting language. Search Technologies, Search Engine Optimization. XML Query Language, Semantic Web, Future Web Application Framework.</p> <p>Implementation on compiler of all the concepts/topics discussed in the course which includes, Introduction to Java, Variables, data types, Control Structures, Methods, Classes, Interfaces, Method Overloading and Overriding, Revision of Object oriented programming courses in Java, GUI development, Event Handling, Database Connectivity, Exception Handling, File handling, HTML, CSS, Java Script, Server side Programming in Java, Http Request and Response, Servlets, Servlet Life Cycle, Java Beans, MVC.</p>		
Suggested Instructional/ Reading Material	<ol style="list-style-type: none"> 1. Paul J. Deitel and Harvey Deitel, Java How to Program, 11th Edition, Pearson, 2017, ISBN-10: 0134743350, ISBN-13: 978-0134743356. 2. Marty Hall and Larry Brown, Core Servlets and Java Server Pages, 2nd Edition, Pearson, 2017, ISBN-10: 8131701638, ISBN-13: 978-8131701638. 		

Course Title	System & Network Administration		
Course Code	DI-323		
Credit Hours	3 (2,3)		
Category	Domain Core		
Prerequisite	CC-311: Operating Systems		
Co-Requisite	None		
Follow-up	None		
Course Learning Outcomes (CLOs)	At the end of the course, the students will be able to:	BT	PLO
	CLO1: Know components and environments of System Administration.	C1 (Know)	1
	CLO2: Perform operating system and network, installation and management.	C3 (Demonstrate)	3.4.5
	CLO3: Manage servers, traffic, access points.	C3 (Apply)	3.4.5
Syllabus	<p>Introduction: System Administration (SA), SA Components, Server Environment (Microsoft and Linux), Reliable Products, Server Hardware Costing, Maintenance Contracts and Spare Parts, Maintaining Data Integrity, Client Server OS Configuration, Providing Remote Console Access. Comparative Analysis of OS: Important Attributes, Key Features, Pros and Cons. Configuring Local Services and Managing Basic System Issues. Administer Users and Groups. System and Network Management: Software Management. Managing Network Services and Network Monitoring Tools. Boot Management and Process Management. IP Tables and Filtering. Securing Network Traffic. Advanced File Systems and Logs. Bash Shell Scripting. Configuring Servers (FTP, NFS, Samba, DHCP, DNS and Apache).</p> <p>Configuration of Hyper-V, Virtual Box & VMware: Linux Installation and Verification: Configuring Local Services and Managing Basic System Issues. Administer Users and Groups. Review of computer networks lab, Server Environment (Microsoft and Linux).</p> <p>Installation and Configuration: Client Server OS Configuration, Installation and configuration of servers, Linux Installation and Verification, Installation of Activity Directory on Domain Controller, Manage and Active Directory Forest and domain. Active Directory & Domain Controller & Its's Configuration, Active Directory User & Computer Management (Groups, Organizational Unit & Users),</p> <p>Managing Network Services: Network Monitoring Tools. Boot Management and Process Management. IP Tables and Filtering. Securing Network Traffic. Advanced File Systems and Logs. Bash Shell Scripting. Managing Servers: FTP, NFS, Samba, DHCP, DNS and Apache. Configuring Local Services and Managing Basic System Issues. Administer Users and Groups. Domain controller. Installation and Configuration of Wireless Access Points: Installation and configuration if wireless Router, Manageable and non-manageable Cisco switches, Concept and configuration of VLAN, Switch modes and operations, Setting up WAN on simulator, Identifying necessary devices to build a WAN, Learning static and dynamic routing protocols, Understanding and implementing RIP (Routing Information Protocol). Understanding and implementing IGRP, ACL's configuration on routers. Quota Management System (Quota Templates Soft Quota & Hard Quota), Internet Information Services Configuration (IIS), Configuration & Deploying Websites on IIS, World Wide Web Publishing Service of IIS, Configuration of FTP and Apache Server</p>

Course Title	Database Administration & Management		
Course Code	DI-324		
Credit Hours	3(2,3)		
Category	Domain Core		
Prerequisite	CC-215: Database Systems		
Co-Requisite	None		
Follow-up	None		
Course Introduction	Introduction to advanced data models such as object relational, object oriented. File organization concepts, Transactional processing and Concurrency control techniques, Recovery techniques, Query processing and optimization, Database Programming, Integrity and security, Database Administration, Physical database design and tuning, Distributed database systems, Emerging research trends in database systems.		
Course Learning Outcomes (CLOs)	At the end of the course, the students will be able to:	BT	PLO
	CLO1: Know about Oracle Architectural Components.	C1 (Know)	1
	CLO2: Managing Control Files and Redo Log Files, Tablespaces, users, indexes, data integrity and roles.	C3 (Demonstrate)	3.4.5
	CLO3: Configure archives, backups and recovery.	C3 (Apply)	3.4.5
Syllabus	<p>Oracle Architectural Components: Introduction to Enterprise Database Systems, Responsibilities of Database Administrator. Oracle Server; Oracle Instance; Physical Structure. Creating Database and Data dictionary: Creation Prerequisites; Creating Database; Starting Instance. Data Dictionary; Data Dictionary Contents. Dynamic Performance Views. Managing Control Files and Redo Log Files: Control File; Control File Contents; Multiplexing Control File; Using Redo Log Files; Structure of Redo Log File; Adding Redo Log Groups and Members; s. Managing Tablespaces: Database Storage Hierarchy; Kinds of Tablespaces; Managing Data files. Storage Structure and Relationships: Adding Data files and other Operations with Data files; Types of Segments. Managing Undo Data: Undo Segment; Read Consistency; Automatic undo Management; Managing Tables. Managing Users: Creating Users; Managing Users; Creating Tables; Managing Tables. Managing Indexes: types of Indexes; Creation and Management of Indexes. Maintaining Data Integrity: Types of Constraints; Managing Constraints. Managing Privileges: System Privileges; Object Privileges. Managing Roles: Assign and Revoke Roles and Roles Management. Network overview, Configuring Listener; Sessions. Client Side Configuration: Host Naming Method; Local Naming Method; Net Assistant; Configurations of Different Methods. Usage and Configuration of Oracle Shared Server: Server Configuration; Dedicated Server Process; Shared Server Process. Backup and Recovery: overview, Instance and Media Recovery, Categories of Failure; Defining Backup and Recovery Strategy. Configuration of Archive log mode: Switching to Archive Log Mode; Archive Process. User Managed Backups: User Managed backups and Issues. User Managed Complete Recovery: How To recover a Database Manually Using Manual Backups. User Managed Incomplete Recovery: How to DO an Incomplete Recovery. Import/Export: Different export and import modes.</p>

Course Title	Parallel & Distributed Computing		
Course Code	DI-328		
Credit Hours	3 (2,3)		
Category	Domain Core		
Prerequisite	CC-311: Operating Systems		
Co-Requisite	None		
Follow-up	None		
Course Introduction	The demand of huge computation and storage resources has been increasing exponentially. The course provides the methods for dealing with the emerging challenges of enhancing the power of the computational resources. This course will introduce topics related to parallel and distributed computing and also expose students to the latest tools and technologies.		
Course Learning Outcomes (CLOs)	At the end of the course, the students will be able to:	BT	PLO
	CLO1: Learn about parallel and distributed computers.	C1 (Know)	1
	CLO2: Write portable programs for parallel or distributed architectures using Message-Passing Interface (MPI) library.	C3 (Demonstrate)	3.4.5
	CLO3: Analyze complex problems with shared memory programming with openMP.	C4 (Analyze)	3
Syllabus	Asynchronous/synchronous computation/communication, concurrency control, fault tolerance, GPU architecture and programming, heterogeneity, interconnection topologies, load balancing, memory consistency model, memory hierarchies, Message passing interface (MPI), MIMD/SIMD, multithreaded programming, parallel algorithms & architectures, parallel I/O, performance analysis and tuning, power, programming models (data parallel, task parallel, process-centric, shared/distributed memory), scalability and performance studies, scheduling, storage systems, synchronization, and tools (Cuda, Swift, Globus, Condor, Amazon AWS, OpenStack, Cilk, gdb, threads, MPICH, OpenMP, Hadoop, FUSE).		
Suggested Instructional/ Reading Material	<ol style="list-style-type: none"> 1. Distributed Systems: Principles and Paradigms, A. S. Tanenbaum and M. V. Steen, Prentice Hall, 2nd Edition, 2007 2. Distributed and Cloud Computing: Clusters, Grids, Clouds, and the Future Internet, KHwang, J Dongarra and GC. C. Fox, Elsevier, 1st Ed. 		

Course Title	Cyber Security		
Course Code	DI-325		
Credit Hours	3 (2,3)		
Category	Domain Core		
Prerequisite	CC-312: Information Security		
Co-Requisite	None		
Follow-up	None		
Course Learning Outcomes (CLOs)	At the end of the course, the students will be able to:	BT	PLO
	CLO1: To develop knowledge about forensic law, standards, regulations and ethical values	C2 (Understand)	1,2
	CLO2: To be able to conduct digital forensics for multiple platforms and applications by various tools	C3 (Apply)	3.4.5
	CLO3: To be able to generate reports based on digital forensic tools for security systems and platforms	C3 (Apply)	3.4.5
Syllabus	Topics: Basic security concepts, Information security terminology, Malware classifications, Types of malware. Server side web applications attacks. Cross-site scripting, SQL Injection, Cross-site request forgery, Planning and policy, Network protocols and service models. Transport layer security, Network layer security, Wireless security, Cloud & IoT security.		
Suggested Instructional/ Reading Material	<ol style="list-style-type: none"> 1. Mark Ciampa, Security+ Guide to Network Security Fundamentals, 4th Edition. 2. Randall J. Boyle, Corporate Computer Society, 3rd Edition. 		

Course Title	Information Technology Infrastructure		
Course Code	DI-327		
Credit Hours	3 (2,3)		
Category	Domain Core		
Prerequisite	None		
Co-Requisite	None		
Follow-up	None		
Course Learning Outcomes (CLOs)	At the end of the course, the students will be able to:	BT	PLO
	CLO1: Define and explain, non-functional attributes of IT infrastructure.	C2 (Explain)	1,2
	CLO2: Describe various objects of an IT infrastructure including networking, operating systems, an end user devices.	C2 (Describe)	1,2
	CLO3: Understand and explain fundamentals of an Enterprise and Industries artifacts.	C2 (Understand)	1,2
	CLO4: Knowledge of Enterprise Resource Planning. C1(Knowledge)	C1(Knowledge)	1
	CLO5: Know emerging trends potential and applications of data storage technologies.	C1(Knowledge)	1.5
Syllabus	<p>IT Infrastructure: Definition, Non-functional Attributes. Availability Concepts: Sources of Unavailability, Availability Patterns. Performance. Security Concepts. Data centers. Servers: Availability, Performance, Security. Networking: Building Blocks, Availability, Performance, Security. Storage: Availability, Performance, Security. Virtualization: Availability, Performance, Security. Operating Systems: Building Blocks, Implementing Various OSs, OS availability, OS Performance, OS Security. End User Devices: Building Blocks, Device Availability, Performance, Security. IT Infrastructure Management: Service Delivery Processes. Service Support Processes. Ethics, Trends, organizational and technical issues related to IT infrastructure. Fundamentals of an Enterprise and Industries artifacts. Introduction to Enterprise Resource Planning (ERP): ERP Implementation life cycle methodologies and strategy. Business processes, architecture, User Interface Designs and their modeling. ERP Security, workflows, data integration, applications migration and data migration. Study of Business Modules: Human Resource, Procurement, Sales and Distribution, Material Management, and Manufacturing. Concepts and tools of designing and implementing an ERP system. Emerging Trends: special topics such as Supply Chain Management (SCM), Customer Relationship Management (CRM), Business Intelligence (BI).</p>

5) Domain (IT) Elective

Course Title	Software Project Management		
Course Code	EI-330		
Credit Hours	3 (3,0)		
Category	Domain Elective		
Prerequisite	None		
Co-Requisite	None		
Follow Up	None		
Course Introduction	This course provides an introduction to the key concepts, methods, and best practices needed to effectively manage software projects. Through a combination of lectures, case studies, and interactive discussions, students will gain insights into the entire software development lifecycle, from ideation to deployment, while emphasizing time management, budgeting, stakeholder communication, and risk management.		
Course Learning Outcomes (CLOs)	At the end of the course, the students will be able to:	BT	PLO
	CLO1: Articulate the various phase in project management stages of SDLC and recognize the importance of each phase in the context of project management.	C2 (Explain)	1,2
	CLO2: Allocate and manage project resources, including human capital, time, and budget, to maximize efficiency and effectiveness.	C3 (Apply)	1,2,3,4
	CLO3: Identify potential project risks, assess their impact, and devise strategies to mitigate or respond to these risks.	C4 (Identify)	3,4
	CLO4: Implement modern project management tools and software to aid in task tracking, collaboration, and project monitoring.	C3 (Apply)	3,4,5
	CLO5: Determine the criteria for project success and employ evaluation techniques post-project to assess outcomes and derive lessons for future projects.	C4 (Differentiate)	3,4
Syllabus	<p>Introduction: Project Management. The Project Management Process Groups. Scope triangle, The S curve. Five Phases of Project Management Life Cycle: Defining, planning, executing, controlling, closing, Scope of project, Project Work Breakdown Structure (WBS), Project Time Management. Estimate Activity Duration: Causes of variation in activity duration, five methods of Estimating Activity Duration. Project Networks: Critical Path Method (CPM), Build the project network, Analysis of the project network, Project Evaluation Review Technique (PERT), Activity on Arrow, Activity on Node, GANTT Chart, Using MS-Project to draw GANTT chart and project Networks. Project Proposal: Purpose of the project proposal, Contents of the project proposal, Format of the Project Proposal. Staffing and Personnel Planning: Personnel Plan, Team structures, Democratic decentralized, Controlled Decentralized, Controlled Centralized, Coordination and communication issues, Maslow's need theory of motivation, Software Project Team Roles and Responsibilities, Risk Identification, Analysis and Management. Project Management: Integration Management. Scope Management. Cost Management. Quality Management. Human Resource Management. Communications Management. Risk Management. Procurement Management. Management Tools. Configuration Management: Change Management and Control, baselines, Version Control, Earned Value Analysis for Project Monitoring and Control. Examples of Earned Value Analysis, Project Quality Assurance Plans, SQA Process Project Quality Standards, Project Documents.</p>		
Suggested Instructional/ Reading Material	<ol style="list-style-type: none"> 1. Guide to the Project Management Body of Knowledge (PMBOK® Guide), 6th Edition, Project Management Institute, 2017, ISBN-10: 1628251840. 2. Course Title	Mobile Application Development		
Course Code	EI-333		
Credit Hours	3 (2,3)		
Category	Domain Elective		
Prerequisite	CC-211: Object Oriented Programming		
Co-Requisite	None		
Follow-up	None		
Course Learning Outcomes (CLOs)	At the end of the course, the students will be able to:	BT	PLO
	CLO1: Explain characteristics of mobile application.	C2 (Explain)	1,2
	CLO2: Use Android platform for application development.	C3 (Apply)	1,2,3
	CLO3: Identify potential and applications of data storage technologies.	C4 (Identify)	1,2,3
	CLO4: Use Android Native Development Kit in a mobile application development.	C3 (Apply)	3,4,5
Syllabus	<p>Introduction: Mobile Computing Domain, Comparison of different Mobile Platforms, Revision of Java. Android Platform: Dalvik Virtual Machine, Android Constructs (Activity, Intent, Content Provider, Service, Broadcast Receiver), Activity Lifecycle, Project Structure, Manifest File, Emulators (AVD), Debugging (DDMS), R.java, Inter Activity Communication (Intent), Event Handlers, Layout XML, @ Sign, Layouts, Adapters, Dynamic Lists, Holder Pattern, Menus and dialogs, Menu, Menu Group, Menu Item, Icon Menu, Sub Menu, Context Menu, Sub Menu, Dynamic Menu, Using XML Files for Menus, Services, Intents. Data Storage: Key Value Sets, Files, Intro to SQLite, Web Service Integration, JSON, HTTPClient, Graphics, Widgets & Notifications, Multimedia and telephony API, Android Native Development Kit (NDK).</p>

Title	Machine Learning		
Code	EI-335		
Credit Hours	3 (2,3)		
Category	Domain Elective		
Prerequisite	None		
Co-Requisite	None		
Follow-up	EI-436: Applications of Machine Learning		
Course Introduction	Machine learning is one of the fastest growing areas of computer science, with far-reaching applications. The aim of this course is to: a) Present the basic machine learning concepts; b) Present a range of machine learning algorithms along with their strengths and weaknesses; c) Apply machine learning algorithms to solve problems of moderate complexity.		
Course Learning Outcomes (CLOs)	At the end of the course, the students will be able to:	BT	PLO
	CLO1: Understand the key concepts and principles of machine learning algorithms and their applications in various domains.	C2 (Understand)	1,2
	CLO2: Demonstrate proficiency in implementing and fine-tuning supervised and unsupervised ML models to solve moderately complex problems.	C3 (Demonstrate)	1,2,3
	CLO3: Selection and evaluation of appropriate evaluation metrics to assess the performance and generalization of ML models.	C3 (Differentiate)	1,2,3
	CLO4: Effectively preprocess and transform data	C3 (Apply)	2,3,4
	CLO5: Apply machine learning techniques to analyze and extract insights from large datasets	C3 (Apply)	2,3,4,5
	CLO6: Gain practical experience in designing and conducting experiments, analyzing model results, and iteratively improving model performance	C3 (Apply)	2,3,4,5
Syllabus	<p>Topics: Machine learning course begins with foundational concepts, such as understanding supervised and unsupervised learning, feature engineering, and model evaluation techniques. As the course progresses, students delve into various supervised machine learning algorithms, including linear and nonlinear regression, logistic regression, decision trees, random forest, support vector machines, and neural networks. For each of the aforementioned algorithms, students learn about their hypothesis functions, cost functions, optimization functions and regularization techniques to avoid overfitting. The topics related to unsupervised machine learning are also part of the course. The students learn clustering techniques such as k-mean's clustering, and dimensionality reduction algorithms like principal component analysis and auto-encoders.</p> <p>Implementation of the theoretical concepts using Python, Different libraries and frameworks such as NumPy, Pandas, Scikit Learn and TensorFlow, Libraries for supervised and unsupervised machine learning algorithms such as linear and nonlinear regression, logistic regression, decision trees, random forest, support vector machines, neural networks (forward and backward propagation), k-mean's clustering, and dimensionality reduction algorithms like principal component analysis and auto-encoders. Publicly available datasets are used for practical demonstration of the aforementioned algorithms.</p>

Course Title	Software Quality Engineering		
Course Code	EI-425		
Credit Hours	3 (3,0)		
Category	Domain Elective		
Prerequisite	CC-212: Software Engineering		
Co-Requisite	None		
Follow Up	None		
Course Introduction	This course is designed to introduce students to the core principles, methods, and practices of Software Quality Assurance. Through a blend of theory and hands-on exercises, learners will gain a deeper understanding of what it takes to ensure software products meet the required standards of quality before they reach the end-user.		
Course Learning Outcomes (CLOs)	At the end of the course, the students will be able to:	BT	PLO
	CLO1: Recognize the importance and business value of high-quality software.	C4 (Recognize)	1,2,3
	CLO2: Differentiate between various software testing methods and strategies.	C4 (Differentiate)	1,2,3
	CLO3: Implement best practices in defect detection, reporting, and management.	C3 (Apply)	3,4,5
	CLO4: Use essential tools for automating tests and managing defects.	C3 (Apply)	3,4,5
	CLO5: Understand the SQA role in modern software development methodologies.	C2 (Understand)	1,2
Syllabus	Introduction to Software Quality Assurance; Software Quality in Business Context; QA, QC and QE; Product Quality and Process Quality; Software Quality Measurement and Metrics; Personal Software Process; Walkthroughs and Inspections; Software Configuration Management; Quality System Documentation; Software Testing Techniques; Software Testing Strategies; Automated Testing; Capability Maturity Model; CMM-Integration, People-CMM; ISO; Six Sigma; Testing Tools, Trends and Perspectives.		
Suggested Instructional/ Reading Material	<ol style="list-style-type: none"> 1. Course Title	Software Construction & Development		
Course Code	EI-331		
Credit Hours	3 (2,3)		
Category	Domain Elective		
Prerequisite	CC-211: Object Oriented Programming		
Co-Requisite	None		
Follow-up	None		
Course Introduction	The demand of huge computation and storage resources has been increasing exponentially. The course provides the methods for dealing with the emerging challenges of enhancing the power of the computational resources. This course will introduce topics related to parallel and distributed computing and also expose students to the latest tools and technologies.		
Course Learning Outcomes (CLOs)	At the end of the course, the students will be able to:	BT	PLO
	CLO1: Understand the role of design and its major activities within the OO software development process, with focus on the Unified process.	C1 (Remember)	1.2.3
	CLO2: Develop Object-oriented design models and refine them to reflect implementation details.	C3 (Apply)	4
	CLO3: Evaluate different architectures for a medium size software.	C4 (Analyze)	3
Course Learning Outcomes (CLOs)	CLO4: Implement design model using an object-oriented programming language.	C4 (Analyze)	4.5
	Course Description Software development process, Software engineering process infrastructure, Software engineering process improvement, Systems engineering life cycle models, Process implementation, Levels of process definition, Life cycle model characteristics, Individual and team software process, Lehman's Laws, code salvaging, and configuration management. Martin Fowler's refactoring concepts and their application to small projects. Apply Michael Feathers' "legacy code" concepts. Exception handling, making methods robust by having them check their inputs sent from calling objects. Software configuration management, Release management, Software configuration management processes, Software deployment processes, Distribution and backup, Evolution processes and activities, Basic concepts of evolution and maintenance, Working with legacy systems, Refactoring, Error handling, exception handling, and fault tolerance. Personal reviews (design, code, etc.), Peer reviews (inspections, walkthroughs, etc.).

Course Title	Global IT Services and Workspace		
Course Code	EI-236		
Credit Hours	3 (2,3)		
Category	IT Elective		
Prerequisite	Programming Fundamentals		
Co-Requisite	None		
Follow Up	None		
Course Introduction	This course is designed to prepare students in the Associate Degree Program in Information Technology for global IT services and employment, equipping them with the necessary knowledge and skills to leverage their programming, web and mobile development, databases, and software engineering expertise in the global market. It covers global IT services, remote working, freelancing, self-employment, and lifelong learning, including relevant processes, procedures, tools, methods, techniques, legislation, rules, ethics, and critical considerations. Additionally, it explores Free and Open Source Software (FOSS) and entrepreneurship, providing insights into FOSS impact, benefits, and challenges, as well as guiding students in starting and managing IT businesses. This course bridges the gap between academic learning and real-world IT practices, preparing students for successful careers in the global IT market.		
Course Learning Outcomes (CLOs)	At the end of the course, the students will be able to:	BT	PLO
	CLO1: Analyze the structure and dynamics of the global IT market, identifying key players, service models, and emerging trends.	C4 (Analyze)	1, 2, 8
	CLO2: Apply and evaluate effective remote working models and freelancing practices, utilizing appropriate tools and platforms to manage virtual workspaces and teams.	C3 (Apply)	5, 6, 7
	CLO3: Demonstrate proficiency in using essential communication, collaboration, and project management tools, as well as version control systems and cloud services, to facilitate global IT employment.	C3 (Apply)	4, 5
	CLO4: Assess and apply ethical, legal, and regulatory considerations in global IT work, including data protection laws, intellectual property rights, and cross-border legal issues.	C6 (Evaluate)	8, 9
	CLO5: Explain the benefits and challenges of Free and Open Source Software (FOSS), and develop entrepreneurial skills by creating business plans, managing clients, and understanding the essentials of starting and running an IT business.	C3 (Apply)	4, 10
Course Description	Comprehensive overview of global IT services, service models, key players, and emerging trends in the market. Remote working and freelancing, platforms, tools, and techniques for setting up remote workspaces and managing virtual teams. Communication and project management tools, version control systems, and cloud services. Agile and Scrum methodologies, DevOps practices, and CI/CD pipelines. Ethical, legal, and regulatory aspects of global IT work, data protection laws, intellectual property rights, and cross-border legal issues. Free and Open Source Software (FOSS), benefits, challenges, major projects, and legal considerations. Entrepreneurship, starting an IT business, business planning, personal branding, marketing, client management, and financial management for freelancers and entrepreneurs. Lifelong learning, online learning platforms and obtaining professional certifications.

Course Title	Cloud Computing		
Course Code	EI-339		
Credit Hours	3 (2,3)		
Category	Domain Elective		
Prerequisite	CC-214: Computer Networks		
Co-Requisite	None		
Follow-up	None		
Course Introduction	Nowadays cloud computing becomes popular for individuals' users as well as for the business community. It provides on-demand huge computation and storage resources which is attractive for a large number of users mainly due to pay-per-usage charging model. This course will introduce topics related to Cloud Computing and also expose students to the latest tools and technologies used in Cloud Computing. The aim of this course is to provide an in-depth knowledge of Cloud Computing topics. The course would also expose students to important methods and tools used Cloud Computing.		
Course Learning Outcomes (CLOs)	At the end of the course, the students will be able to:	BT	PLO
	CLO1: Explain Cloud computing, virtualization, Docker and scalable web applications.	C2 (Explain)	1,2
	CLO2: Familiarize with Load Balancing AWS ELB, Nginx, Ipvadm, Ldirectord.	C1 (Know)	1,2
	CLO3: Demonstrate the use of NoSQL, MongoDB and DynamoDB, Revision, MapReduce	C3 (Apply)	3,4,5
	CLO4: Explain Big Data transformation methods.	C2 (Explain)	2,4,5
Syllabus	Introduction To Cloud Computing, Introduction To Cloud Computing (Cont.), AWS Services, EC2 hands, Accessing AWS S3 , Virtualization , Containerization/Dockers, Scalable Web Application in The Cloud, Scalable Web Application in The Cloud (Cont.), Load Balancing AWS ELB, Nginx, Ipvadm, Ldirectord, Web Application Deployment Models, Introduction to Big Data, Introduction to Big Data (Cont.), Introduction to NoSQL, MongoDB and DynamoDB, Revision, MapReduce, Distributed Systems, Consistency and Fault Tolerance in Distributed Systems, Big Data Transformation Methods , Blockchain, Practical Considerations in Cloud Computing, Future of the Cloud Computing and Big Data

Brownley; Foundations for Analytics with Python from Non-Programmer to Hacker. 		

6) General Education

Course Title	Applications of Information & Communication Technologies		
Course Code	GE-160		
Credit Hours	3 (2,1)		
Category	General Education		
Prerequisite	None		
Co-Requisite	None		
Follow Up	None		
Course Introduction	This course is designed to provide students with an exploration of the practical applications of Information and Communication Technologies (ICT) and software tools in various domains. Students will gain hands-on experience with a range of software applications, learning how to leverage ICT to solve daily life problems, enhance productivity and innovate in different fields. Through individual and interactive exercises and discussions, students will develop proficiency in utilizing software for communication, creativity, and more.		
Course Learning Outcomes (CLOs)	At the end of the course, the students will be able to:	BT	PLO
	CLO1: Explain the fundamental concepts, components, and scope of ICT.	C2 (Explain)	1,2
	CLO2: Identify uses of various ICT platforms and tools for different purposes.	C4 (Identify)	1,2,3
	CLO3: Apply ICT platform and tools for different purposes to address basic needs in different domains of daily, academic, and professional life.	C3 (Apply)	3,4,5
	CLO4: Understand the ethical and legal considerations in use of ICT platforms and tools.	C2 (Understand)	1,2,3
Syllabus	<p>Introduction to ICT Components of ICT (basics of hardware, software, ICT platforms, networks, local and cloud data storage, etc.), Scope of ICT (use of ICT in education, business, governance, healthcare, digital media and entertainment, etc.), Emerging technologies and future trends.</p> <p>Basic ICT Productivity Tools: Effective use of popular search engines to explore WWW, Formal communication tools and etiquettes (Gmail, Microsoft Outlook, etc.) Microsoft Office Suites (Word, Excel, PowerPoint), Google Workspace (Google Docs, Sheets, Slides), Google Drive, Dropbox (cloud storage and file sharing), Google Drive (Cloud storage with Google Docs integration) and Microsoft OneDrive (Cloud storage with Microsoft integration), Evernote (Note-taking and organization applications) and OneNote (Microsoft's digital notebook for capturing and organizing ideas), Video conferencing (Google Meet, Microsoft Teams, Zoom, etc.), social media applications (LinkedIn, Facebook, Instagram, etc.)</p> <p>ICT in Education: Working with learning management systems (Moodle, Canvas, Google Classrooms, etc.), Sources of online education courses (Coursera, edX, Udemy, Khan Academy, etc.), Interactive multimedia and virtual classrooms</p> <p>ICT in Health and Well-being: Health and fitness tracking devices and applications (Google Fit, Samsung Health, Apple Health, Xiaomi Mi Band, Runkeeper, etc.), Telemedicine and online health consultations (OLADOC, Sehat Kahani, Mahram, etc.)</p> <p>ICT in Personal Finance and Shopping: Online banking and financial management tools (JazzCash, Easypaisa, Zong PayMax, 1Link and MNET, Keenu Wallet, etc.), E-commerce platforms.</p> <p>Digital Citizenship and Online Etiquette: Intellectual property and copyright issues, Ensuring originality in content creation by avoiding plagiarism and unauthorized use of information sources, Content accuracy and integrity (ensuring that the content share through ICT platforms is free from misinformation, fake news, and manipulation).</p>		
Practical Requirements	1. Guided tutorials and exercises to ensure that students are proficient in commonly used software applications such as word processing software (e.g., Microsoft Word), presentation software, (e.g., Microsoft PowerPoint), spreadsheet software (e.g., Microsoft Excel) among such other tools. Students may be assigned practical tasks that require them to create documents, presentations, and spreadsheets etc.		

	<p>2. Assigning of tasks that involve creating, managing, and organizing files and folders on both local and cloud storage systems. Students will practice file naming conventions, creating directories, and using cloud storage solutions (e.g., Google Drive, OneDrive).</p> <p>3. The use of online learning management systems (LMS) where students can access course materials, submit assignments, participate in discussion forums, and take quizzes or tests. This will provide students with the practical experience with online platforms commonly used in education and the workplace.</p>
<p>Suggested Instructional/ Reading Material</p>	<ol style="list-style-type: none"> 1. "Discovering Computers" by Vermaat, Shaffer, and Freund. 2. Deborah Morley and Charles S. Parker, Understanding Computers: Today and Tomorrow, 16th edition, Cengage Learning, 2016, ISBN-13: 978-1337251853 3. "Computing Essentials" by Morley and Parker. 4. "GO! Course Title	Applied Physics		
Course Code	GE-169		
Credit Hours	3 (2,3)		
Category	General Education		
Prerequisite	None		
Co-Requisite	None		
Follow Up	None		
Course Introduction	The primary objective of the course is to teach student calculus based general physics, particularly basic concepts of electrostatics, electricity, magnetism and optics. To equip the learner with the basic philosophy of different physical phenomenon. To make them able to solve to given physical problems related to the subject. To lay strong foundations of their basic scientific knowledge.		
Course Learning Outcomes (CLOs)	At the end of the course, the students will be able to:	BT	PLO
	CLO1: To understand the fundamental concepts of Physics.	C2 (Understand)	1,2
	CLO2: To understand about charges and their interactions.	C2 (Understand)	1,2
	CLO3: To develop strong concepts of numerical techniques related to vectors and electrostatics and magnetism.	C2 (Understand)	1,2
	CLO4: To develop the relation between electricity and magnetism.	C4 (Analyze)	1,2,3
Syllabus	<p>Electric force: Introduction to electric force, its applications and related problems, conservation of charge, charge quantization, Electric fields due to point charge and lines of force. Ring of charge, Disk of charge, A point charge in an electric field, Dipole in a n electric field, The flux of vector field, The flux of electric field, Gauss' Law, Application of Gauss' Law, Spherically symmetric charge distribution, A charged isolated conductor. Electric potential energy: Electric potentials, Calculating the potential from the field and related problem Potential due to point and continuous charge distribution, Potential due to dipole, equipotential surfaces, Calculating the field from the potential. Electric current: Current density, Resistance, Resistivity and conductivity, Ohm's law and its applications, The Hall effect, The magnetic force on a current, The Biot- Savart law, Line of B, Two parallel conductors, Amperes' s Law, Solenoid, Toroids, Faraday's experiments, Faraday's Law of Induction, Lenz's law, Motional emf. Induced electric field, Induced electric fields. Electromagnetics: The basic equation of electromagnetism, Induced Magnetic field, The displacement current, Reflection and Refraction of light waves, Total internal reflection, Two source interference, Double Slit interference, related problems, Interference from thin films, Diffraction and the wave theory, related problems, Single-Slit Diffraction, related problems, Polarization of electromagnetic waves, Polarizing sheets, related problems.</p>

Young, Roger A. Freedman, A. Lewis, Sears, University Physics, 11th Ed., Benjamin-Cummings Pub. Co., 2004, ISBN: 978-0805391794. 3. D. Halliday, R. Resnick, J. Walker, Fundamentals of Physics, 6th Ed., Wiley, 2010, ISBN: 978-0470469118. 		

Title	Functional English		
Code	GE-190		
Credit Hours	3 (3,0)		
Category	General Education		
Prerequisite	None		
Co-Requisite	None		
Follow-up	GE-191 Expository Writing		
Course Introduction	This course is designed to equip students with essential language skills for effective communication in diverse real-world scenarios. It focuses on developing proficiency in English language usage: word choices, grammar and sentence structure. In addition, the course will enable students to grasp nuanced messages and tailor their communication effectively through application of comprehension and analytical skills in listening and reading. Moreover, the course encompasses a range of practical communication aspects including professional writing, public speaking, and everyday conversation, ensuring that students are equipped for both academic and professional spheres. An integral part of the course is fostering a deeper understanding of the impact of language on diverse audiences. Students will learn to communicate inclusively and display a strong commitment to cultural awareness in their language use. Additionally, the course will enable them to navigate the globalized world with ease and efficacy, making a positive impact in their functional interactions.		
Course Learning Outcomes (CLOs)	At the end of the course, the students will be able to:	BT	PLO
	CLO1: Apply enhanced English communication skills through effective use of word choices, grammar and sentence structure.	C4 (Apply)	1,6,7,10
	CL2: Comprehend a variety of literary / non-literary written and spoken texts in English.	C2 (Understand)	1,6,7,10
	CLO3: Effectively express information, ideas and opinions in written and spoken English.	C2 (Explain)	1,6,7,10
	CLO4: Recognize inter-cultural variations in the use of English language and to effectively adapt their communication style and content based on diverse cultural and social contexts.	C4 (Identify)	1,6,7,10
Course Description	Foundations of Functional English: Vocabulary building (contextual usage, synonyms, antonyms and idiomatic expressions), Communicative grammar (subject-verb-agreement, verb tenses, fragments, run-ons, modifiers, articles, word classes, etc.), Word formation (affixation, compounding, clipping, back formation, etc.), Sentence structure (simple, compound, complex and compound-complex), Sound production and pronunciation. Comprehension and Analysis: Understanding purpose, audience and context, Contextual interpretation (tones, biases, stereotypes, assumptions, inferences, etc.), Reading strategies (skimming, scanning, SQ4R, critical reading, etc.), Active listening (overcoming listening barriers, focused listening, etc.). Effective Communication: Principles of communication (clarity, coherence, conciseness, courteousness, correctness, etc.), Structuring documents (introduction, body, conclusion and formatting), Inclusivity in communication (gender-neutral language, stereotypes, cross-cultural communication, etc.), Public speaking (overcoming stage fright, voice modulation and body language), Presentation skills (organization content, visual aids and engaging the audience), Informal communication (small talk, networking and conversational skills), Professional writing (business e-mails, memos, reports, formal letters, etc.)		
Practical Requirements	As part of the overall learning requirements, students will also be exposed to relevant simulations, role-plays and real-life scenarios and will be required to apply skills acquired throughout the course in the form of a final project.		
Suggested Instructional / Reading Material	<ol style="list-style-type: none"> 1. "Understanding and Using English Grammar" by Betty Schramper Azar. 2. "English Grammar in Use" by Raymond Murphy. 3. "The Blue Book of Grammar and Punctuation" by Jane Straus. 4. "English for Specific Purposes: A Learning-Centered Approach" by Tom Hutchinson and Alan Waters. 5. "Cambridge English for Job-hunting" by Colm Downes. 6. "Practical English Usage" by Michael Swan. 7. "Reading Literature and Writing Argument" by Missy James and Alan P. Merickel. 8. "Improving Reading: Strategies, Resources, and Common Core Connections" by Jerry Johns and Susan Lenski. 9. "Comprehension: A Paradigm for Cognition" by Walter Kintsch. 10. "Communication Skills for Business Professionals" by J.P. Verma and Meenakshi Raman. 		

Title	Expository Writing		
Code	GE-191		
Credit Hours	3 (3,0)		
Category	General Education		
Prerequisite	GE-190: Functional English		
Co-Requisite	None		
Follow-up	MS-254: Technical and Business Writing		
Course Introduction	Expository Writing is a sequential undergraduate course aimed at refining writing skills in various contexts. Building upon the foundation of the pre-requisite course, Functional English, this course will enhance students' abilities of producing clear, concise and coherent written texts in English. The course will also enable students to dissect intricate ideas, to amalgamate information and to express their views and opinions through well-organized essays. The students will further be able to refine their analytical skills to substantiate their viewpoints using credible sources while adhering to established ethical writing norms. Additionally, the course will highlight the significance of critical thinking enabling students to produce original and engaging written texts.		
Course Learning Outcomes (CLOs)	At the end of the course, the students will be able to:	BT	PLO
	CLO1: Understand the essentials of the writing process integrating pre-writing, drafting, editing and proof reading to produce well-structured essays.	C2 (Understand)	1,6,7,10
	CLO2: Demonstrate mastery of diverse expository types to address different purposes and audiences.	C3 (Apply)	1,6,7,10
	CLO3: Uphold ethical practices to maintain originality in expository writing.	C3 (Demonstrate)	1,6,7,9
Syllabus	<p>Introduction to Expository Writing: Understanding expository writing (definition, types, purpose and applications), Characteristics of effective expository writing (clarity, coherence and organization), Introduction to paragraph writing. The Writing Process: Pre-writing techniques (brainstorming, free-writing, mind-mapping, listing, questioning and outlining etc.), Drafting (three stage process of drafting techniques), Revising and editing (ensuring correct grammar, clarity, coherence, conciseness etc.), Proof reading (fine-tuning of the draft), Peer review and feedback (providing and receiving critique). Essay Organization and Structure: Introduction and hook (engaging readers and introducing the topic), Thesis statement (crafting a clear and focused central idea), Body Paragraphs (topic sentences, supporting evidence and transitional devices), Conclusion (types of concluding paragraphs and leaving an impact), Ensuring cohesion and coherence (creating seamless connections between paragraphs). Different Types of Expository Writing: Description, Illustration, Classification, Cause and effect (exploring causal relationships and outcomes), Process analysis (explaining step-by-step procedures), Comparative analysis (analyzing similarities and differences). Writing for Specific Purposes and Audiences: Different types of purposes (to inform, to analyze, to persuade, to entertain etc.), Writing for academic audiences (formality, objectivity, and academic conventions), Writing for public audiences (engaging, informative and persuasive language), Different tones and styles for specific purposes and audiences. Ethical Considerations: Ensuring original writing (finding credible sources, evaluating information etc.), Proper citation and referencing (APA, MLA, or other citation styles), Integrating quotes and evidences (quoting, paraphrasing, and summarizing), Avoiding plagiarism (ethical considerations and best practices)</p>		
Practical Requirements	As part of the overall learning requirements, students will be required to build a writing portfolio having a variety of expository texts and present the same at the end of the course showcasing proficiency in expository writing.		
Suggested Instructional / Reading Material	<ol style="list-style-type: none"> "The St. Martin's Guide to Writing" by Rise B. Axelrod and Charles R. Cooper. "They Say / I Say: The Moves That Matter in Academic Writing" by Gerald Graff and Cathy Birkenstein. "Writing Analytically" by David Rosenwasser and Jill Stephen. "Style: Lessons in Clarity and Grace" by Joseph M. Williams and Joseph Bizup. "The Elements of Style" by William Strunk Jr. and E.B. White. "Good Reasons with Contemporary Arguments" by Lester Faigley and Jack Selzer. "Writing to Learn; How to Write – and Think – Clearly About Any Subject at All" by William Zinsser. "The Norton Field Guide to Writing" by Richard Bullock, Maureen Daly Goggin, and Francine Weinberg. "The Art of Styling Sentences" by Ann Longknife and K.D. Sullivan. "Writing Today" by Richard Johnson-Sheehan and Charles Paine. 		

Course Title	Calculus and Analytical Geometry		
Course Code	GE-162		
Credit Hours	3 (3,0)		
Category	General Education		
Prerequisite	None		
Co-Requisite	None		
Follow Up	MS-253: Multivariable Calculus		
Course Learning Outcomes (CLOs)	At the end of the course, the students will be able to:	BT	PLO
	CLO1: Know the concepts and applications of calculus and analytical geometry.	C1 (Know)	1
	CLO2: Describe functions, limit, continuity chain rule and related techniques.	C2 (Describe)	1
	CLO3: Identify and solve problems related to differentiation and integration.	C3 (Apply)	1,3
	CLO4: Know the concepts analytical geometry.	C1 (Know)	1
Syllabus	Motivation and applications of the course. Introduction to limits: Limits and Continuity, Techniques of finding limits, Indeterminate forms of limits, Introduction to functions: Continuous and discontinuous functions and their applications, Differential calculus: Concept and idea of differentiation, Geometrical and Physical meaning of derivatives, Rules of differentiation, Techniques of differentiation, Rates of change, Tangents and Normal lines, Chain rule, implicit differentiation, linear approximation, Applications of differentiation: Extreme value functions, Mean value theorems, Maxima and Minima of a function for single-variable, Concavity. Integral calculus: Concept and idea of Integration, Indefinite Integrals, Techniques of integration, Riemann sums and Definite Integrals, Applications of definite integrals, Improper integral, Applications of Integration; Area under the curve. Analytical Geometry: Straight lines in R ³ , Equations for planes.		
Suggested Instructional/ Reading Material	<ol style="list-style-type: none"> Howard Anton, Irl C. Bivens and Stephen Davis, Calculus, 11th Edition, Wiley, 2016, ISBN-10: 1119228581, ISBN-13: 978-1119228585. Thomas and Finney, Calculus and Analytic Geometry, 9th Edition, ISBN-13: 978-0201531749, ISBN-10: 0201531747. 		

Syllabus	<p>5- خلافتِ راشدہ</p> <p>1- خلفائے راشدین (حضرت ابو بکر صدیقؓ، حضرت عمر فاروقؓ، حضرت عثمان غنیؓ، حضرت علی المرتضیٰؓ) کے شخص احوال</p> <p>2- عہدِ خلافتِ راشدہ کے اہم خصائص</p> <p>6- فقہِ اسلامی</p> <p>1- فقہِ اسلامی کے مکتبہ (حنبل، شافعی، مالکی، حنبلی، حنفی، اجماع، قیاس، اجتہاد)</p> <p>2- ائمہ اربعہ کا تعارف (امام ابو حنیفہؒ، امام مالکؒ، امام شافعیؒ، امام احمد بن حنبلؒ)</p> <p>7- اسلام کی سماجی تعلیمات</p> <p>1- خاندان کا تعارف و اہمیت</p> <p>2- اسلام میں عورت کا مقام</p> <p>3- اسلام کا تصور حقوق العباد</p> <p>4- اسلام کی اخلاقی تعلیمات</p> <p>8- اسلام اور جدید دنیا</p> <p>1- عالمگیریت اور اس کے مسائل و تقاضے</p> <p>2- اسلاموفوبیا</p> <p>3- کثیرتبی معاشرہ Pluralistic Society اور اسلامی تعلیمات</p>

Title	Ideology and Constitution of Pakistan		
Code	GE-168		
Credit Hours	2 (2,0)		
Category	General Education		
Prerequisite	None		
Co-Requisite	None		
Follow-up	None		
Course Introduction	This course is designed to provide students with a fundamental exploration of the ideology and the constitution of Pakistan. The course focuses on the underlying principles, beliefs, and aspirations that have been instrumental in shaping the creation and development of Pakistan as a sovereign state. Moreover, the course will enable students to understand the core provisions of the Constitution of the Islamic Republic of Pakistan concerning the fundamental rights and responsibilities of Pakistan citizens to enable them function in a socially responsible manner.		
Course Learning Outcomes (CLOs)	At the end of the course, the students will be able to:	BT	PLO
	CLO1: Demonstrate enhanced knowledge of the basis of the ideology of Pakistan with special reference to the contributions of the founding father of Pakistan.	C3 (Demonstrate)	1,10
	CLO2: Demonstrate fundamental knowledge about the Constitution of Pakistan 1973 and its evolution with special reference to state structure.	C3 (Demonstrate)	1,10
	CLO3: Explain about the guiding principles on rights and responsibilities of Pakistan citizens as enshrined in the Constitution of Pakistan 1973.	C2 (Understand)	1,3,10
Syllabus	<p>1. Introduction to the Ideology of Pakistan: Definition and significance of ideology, Historical contest of the creation of Pakistan (with emphasis on socio-political religious and cultural dynamics of British India between 1857 till 1947), Contributions of founding fathers of Pakistan of Pakistan in the freedom movement including but not limited to Allama Muhammad Iqbal, Muhammad Ali Jinnah., etc. Contributions of women and students in the freedom movement for separate homeland for Muslims of British India. Two-Nation Theory: Evolution of the Two-Nation Theory (Urdu-Hindi controversy, Partition of Bengal, Simla Deputation 1906, Allama Iqbal's Presidential Address 1930, Congress Ministries 1937 Lahore Resolution 1940). Introduction to the Constitution of Pakistan: Definition and importance of a constitution, Ideological factors that shaped the Constitution(s) of Pakistan (Objectives Resolution 1949). Constitution and State Structure: Structure of Government (executive, legislature, and judiciary), Distribution of powers between federal and provincial governments, 18th Amendment and its impact on federalism. Fundamental Right, Principles of Policy and Responsibilities: Overview of fundamental rights guaranteed to citizens by the Constitution of Pakistan 1973 (Articles 8-28), Overview of Principles of Policy (Articles 29-40), Responsibilities of the Pakistan citizens (Article 5). Constitutional Amendments: Procedures for amending the Constitution, Notable Constitutional amendments and their implications</p>		
Suggested Instructional / Reading Material	<ol style="list-style-type: none"> 1. "The Idea of Pakistan" by Stephen P. Cohen. 2. "Ideology of Pakistan" by Javed Iqbal. 3. "The Struggle for Pakistan" by I.H. Qureshi. 4. "Pakistan the Formative Phase" by Khalid Bin Sayeed. 5. "Pakistan: Political Roots and Development" by Safdar Mahmood. 6. "Ideology of Pakistan" by Sharif-ul-Mujahid. 7. "The Struggle for Pakistan: A Muslim Homeland and Global Politics" by Ayesha Jala. 8. "Jinnah, Pakistan and Islamic Identity: The Search for Saladin" by Akbar S. Ahmed. 9. "The Making of Pakistan: A Study in Nationalism" by K.K. Aziz. 10. "Pakistan: A New History" by Lan Talbot. 11. "Pakistan in the Twentieth Century: A Political History" by Lawrence Ziring. 12. "The Constitution of Pakistan 1973". Original. 13. "Constitutional and Political Development of Pakistan" by Hamid Khan. 14. "The Parliament of Pakistan" by Mahboob Hussain. 15. "Constitutional Development in Pakistan" by G.W. Choudhury. 16. "Constitution-Making in Pakistan: The Dynamics of Political Order" by G.W. Choudhury.

Follow-up	None		
Course Learning Outcomes (CLOs)	At the end of the course, the students will be able to:	BT	PLO
	CLO1: Understand the key concepts of Discrete Structures such as Sets, Permutations, Relations, Graphs and Trees etc.	C2 (Understand)	1,3
	CLO2: Apply formal logic proofs and/or informal, but rigorous, logical reasoning to real problems, such as predicting the behavior of software or solving problems such as puzzles.	C3 (Apply)	1,3
	CLO3: Apply discrete structures into other computing problems such as formal specification, verification, databases, artificial intelligence, and cryptography.	C3 (Apply)	1,2,3,4
	CLO4: Differentiate various discrete structures and their relevance within the context of computer science, in the areas of data structures and algorithms, in particular	C4 (Differentiate)	1,2,3,4
Course Description	<p>Mathematical Reasoning: Propositional and predicate logic. Propositional Logic: Logical operators, translations between symbolic expressions and formal English expression, logical equivalences. Predicate Logic: Quantifiers, Nested quantification, equivalences, translations between symbolic forms and formal English. Rules of Inference: Proof methods and strategies, Direct proof, Proof by contraposition, proof by induction, proof by implication, Existence proof, Uniqueness proofs, trivial proofs, vacuous proofs. Sets: Notations, set operations, Venn diagrams, countable and uncountable sets, relations, equivalence relations and partitions, partial orderings, recurrence relations, functions, mappings. Functions: Injective, surjective, bijective, special types of functions, function composition, inverse functions, recursive functions, compositions, number theory, sequences, series, counting, inclusion and exclusion principle, pigeonhole principle, permutations and combinations. Integers and Divisibility: Division theorem, modular arithmetic, LCM, GCD, Euclidean and Extended Euclidean method, finding solutions to congruence. Primes: Fundamental theorem of arithmetic, characterizations of primes, Mersenne primes. Induction: Weak induction, strong induction. Recursion and Recurrences: Formulation of recurrences, closed formulas, Counting: product rule, sum rule, principle of inclusion-exclusion, combinations and permutations, binomial coefficients, Pascal's identity and Pascal's triangle, binomial theorem, pigeonhole principle. Relations: Reflexive, symmetric, transitive, antisymmetric, equivalence relations and equivalence classes, partial orders. Graph Theory: Terminologies, elements of graph theory, planar graphs, graph coloring, Euler graph, Hamiltonian path, rooted trees, traversals, handshaking lemma and corollary, special families of graphs, isomorphism, planarity, Eulerian and Hamiltonian graphs, trees.</p>

Kolman, Busby & Ross, Discrete Mathematical Structures, 4th Edition. 5. Ralph P. Grimaldi, Discrete and Combinatorial Mathematics: An Applied Introduction, 5th Edition. 		

Title	Civics and Community Management		
Code	GE-363		
Credit Hours	2		
Category	General Education		
Prerequisite	None		
Co-Requisite	None		
Follow-up	None		
Course Introduction	This course is designed to provide students with fundamental knowledge about civics, citizenship, and community engagement, Students will learn about the essentials of civil society, government, civic responsibilities, inclusivity, and effective ways to participate in shaping the society which will help them apply theoretical knowledge to the real-world situations to make a positive impact on their communities.		
Course Learning Outcomes (CLOs)	At the end of the course, the students will be able to:	BT	PLO
	CLO1: Demonstrate fundamental understanding of civics, government, citizenship and civil society.	C3 (Demonstrate)	1
	CLO2: Understand the concept of community and recognize the significance of community engagement for individuals and groups.	C2 (Understand)	1,3,6,7,9,10
	CLO3: Recognize the importance of diversity and inclusivity for societal harmony and peaceful co- existence.	C4 (Identify)	1,6,7,9,10
Syllabus	<p>Introduction to Civics and Citizenship: Definition of civics, citizenship, and civic engagement, Historical evolution of civic participation, Types of citizenship: active, participatory, digital, etc., The relationship between democracy and citizenship. Civics and Citizenship: Concepts of civics, citizenship, and civic engagement, Foundations of modern society and citizenship, Types of citizenship: active, participatory, digital, etc., State, Government and Civil Society: Structure and functions of government in Pakistan, the relationship between democracy and civil society, right to vote and importance of political participation and representation. Rights and Responsibilities: Overview of fundamental rights and liberties of citizens under Constitution of Pakistan 1973, Civic responsibilities and duties, Ethical considerations in civic engagement (accountability, non-violence, peaceful dialogue, civility, etc.) Community Engagement: Concept, nature and characteristics of community, Community development and social cohesion, Approaches to effective community engagement, Case studies of successful community driven initiatives. Advocacy and Activism: Public discourse and public opinion, Role of advocacy in addressing social issues, Social action movements. Digital Citizenship and Technology: The use of digital platforms for civic engagement, Cyber ethics and responsible use of social media, Digital divides and disparities (access, usage, socioeconomic, geographic, etc.) and their impacts on citizenship. Diversity, Inclusion and Social Justice: Understanding diversity in society (ethnic, cultural, economic, political etc.), Youth, women and minorities' engagement in social development, Addressing social inequalities and injustices in Pakistan, Promoting inclusive citizenship and equal rights for societal harmony and peaceful co-existence.</p>		
Suggested Instructional / Reading Material	<ol style="list-style-type: none"> 1. "Civics Today: Citizenship, Economics, & You" by McGraw-Hill Education 2. "Citizenship in Diverse Societies" by Will Kymlicka and Wayne Norman. 3. "Engaging Youth in Civic Life" by James Youniss and Peter Levine. 4. "Digital Citizenship in Action: Empowering Students to Engage in Online Communities" by Kristen Mattson. 5. "Globalization and Citizenship: In the Pursuit of a Cosmopolitan Education" by Graham Pike and David Selby. 6. "Community Engagement: Principles, Strategies, and Practices" by Becky J. Feldpausch and Susan M. Omilian. 7. "Creating Social Change: A Blueprint for a Better World" by Matthew Clarke and Marie-Monique Steckel. 		

Title	Introduction to Management		
Code	GE-192		
Credit Hours	2 (2,0)		
Category	General Education		
Prerequisite	None		
Co-Requisite	None		
Follow-up	None		
Course Introduction	This course is designed to provide a comprehensive overview of organizational management. It covers the diverse roles of managers, the crucial interplay between an organization's mission, its goals, and its detailed objectives, and the impact of both internal and external environmental factors on organizations and how they strategize in response. Students will gain empirical insights into organizational processes, behaviors, and their foundational theories. Emphasis will be placed on honing critical thinking, particularly in addressing ethical dilemmas, global perspectives, and diversity within management functions. Finally, this course sheds light on the intricacies of organizational design and structural challenges, providing a holistic grasp of management dynamics.		
Course Learning Outcomes (CLOs)	At the end of the course, the students will be able to:	BT	PLO
	CLO1: Understand and apply management principles and concepts as they apply to business situations.	C2 (Understand)	1,3,6,7,9,10
	CLO2: Understand the role of management in making business decisions.	C2 (Understand)	1,3,6,7,9,10
	CLO3: Understand efficiently and effectively working in any kind of organization.	C2 (Understand)	1,3,6,7,9,10
Course Description	<p>Managing and the Managers Job: The management process, kinds of managers, basic managerial roles and skills, and the nature of managerial work. The Environment and Culture of Management: The external and internal environment, the organization's cultures, organization-environment relationship. Planning and Decision Making: Decision making and planning process, organizational goals and levels of planning, various levels of strategies, rational perspectives on decision making, behavioral aspects of decision making, group and team decision making in organizations. The Organizing Process: Designing Jobs, grouping jobs, establishing reporting relationships, distributing authority, coordinating activities. Managing Change and Innovation: Forces for change, steps in the change process, understanding and overcoming resistance to change, the innovation process. Leadership and Influence Process: Different approaches to leadership, political behavior in organizations. The Controlling Process: The purpose of control, steps in the control process; operational, structural, and strategic control, managing total quality and productivity. The Ethical and Social Environment: Individual ethics in organization, emerging ethical issues, social responsibility and organizations.</p>

Course Title	Professional Practices		
Course Code	GE-262		
Credit Hours	2 (2,0)		
Category	General Education		
Prerequisite	None		
Co-Requisite	None		
Follow-up	None		
Course Introduction	A computing graduate as a professional has some responsibilities with respect to society. This course develops student understanding of historical, social, economic, ethical, and professional issues related to the discipline of computing. It identifies key sources for information and opinions about professionalism and ethics. Students analyze, evaluate, and assess ethical and professional computing case studies.		
Course Learning Outcomes (CLOs)	At the end of the course, the students will be able to:	BT	PLO
	CLO1: Trace the historical evolution of the computing profession and its impact on society.	C1 (Knowledge)	1,8
	CLO2: Describe the interplay between computing technologies and societal shifts, acknowledging both positive and negative implications.	C2 (Describe)	1,8,9,10
	CLO3: Recognize and explain the core ethical principles that guide the computing profession.	C4 (Identify)	1,8,9,10
	CLO4: Explain the responsibilities of computing professionals in their interactions with society and individuals.	C2 (Explain)	1,8,9,10
	CLO5: Analyze and critically evaluate real-world case studies in computing, assessing them from both ethical and professional viewpoints.	C4 (Analyze)	1,8,9,10
Course Description	Historical, social, and economic context of computing (software engineering, computer science, and information technology); definitions of computing (software engineering, computer science, and information technology) subject areas and professional activities; professional societies; professional ethics; professional competency and life-long learning; uses, misuses, and risks of software; information security and privacy; business practices and the economics of software; intellectual property and software law (cyber law); social responsibilities; software-related contracts; software house organization. Intellectual property rights, The Framework of Employee Relations Law and Changing Management Practices, Human Resource Management and IT, Health and Safety at Work, Software Liability, Liability and Practice, Computer Misuse, and the Criminal Law, Regulation, and Control of Personal Information. Overview of the British Computer Society Code of Conduct, IEEE Code of Ethics, ACM Code of Ethics and Professional Conduct, and the ACM/IEEE Software Engineering Code of Ethics and Professional Practice. Accountability and Auditing, Social Application of Ethics.

Course Title	Entrepreneurship		
Code	GE-362		
Credit Hours	2 (2,0)		
Category	General Education		
Prerequisite	None		
Co-Requisite	None		
Follow-up	None		
Course Introduction	This course is designed to promote entrepreneurial spirit and outlook among students, encouraging them to think critically, identify opportunities, and transform their ideas into successful ventures. It aims at imparting them with the requisite knowledge; skills and abilities, enabling them seize the identified opportunities for initiating of business (including requirements for registration and incorporation with regulators such as SECP and others), market research, opportunity identification, business planning, financial literacy for managing finances and securing funding, marketing and sales, team building and innovation, overall, the course is geared towards personal growth and professional development for pursuing innovative ideas, availing opportunities and initiating start-ups.		
Course Learning Outcomes (CLOs)	At the end of the course, the students will be able to:	BT	PLO
	CLO1: Knowledge of fundamental entrepreneurial concepts, skills and process	C1 (Knowledge)	1
	CLO2: Understanding of different personal, social and financial aspects associated with entrepreneurial activities	C2 (Understand)	1,3,10
	CLO3: Basic understanding of regulatory requirements to set up an enterprise in Pakistan, with special emphasis on exports	C2 (Understand)	1,3,10
	CLO4: Ability to apply knowledge, skills and abilities acquired in the course to develop a feasible business plan for implementation	C5 (Create)	4,5,6,10
Course Description	<p>Introduction: Definition and concept of entrepreneurship, Why to become an entrepreneur? Entrepreneurial process, Role of entrepreneurship in economic development. Entrepreneurial Skills: Characteristics and qualities of successful entrepreneurs (including stories of successes and failures), Areas of essential entrepreneurial skills and abilities such as creative and critical thinking innovation and risk taking. Opportunity Recognition and Idea Generation: Opportunity identification, evaluation and exploitation, Innovative ideas generation techniques for entrepreneurial ventures. Marketing and sales: Four P's of Marketing, Developing a marketing strategy, Branding. Financial Literacy: Basic concepts of income, savings and investments, Basic concepts of assets, liabilities and equity, Basic concepts of revenue and expenses, Overview of cash-flows, Overview of banking products including Islamic modes of financing, Sources of funding for startups (angel financing, debt financing, equity financing etc.) Team Building for Startups: Characteristics and features of effective teams, Team building and effective leadership for startups. Regulatory Requirements to Establish Enterprises in Pakistan: Types of enterprises (e.g., sole proprietorship; partnership; private limited companies etc.), Intellectual property rights and protection, Regulatory requirements to register an enterprise in Pakistan, with special emphasis on exports firms, Taxation and financial reporting obligation.</p>		
Practical Requirements	As part of the overall learning requirements, students shall be tasked with creating and presenting a comprehensive business plan at the end of the course for a hypothetical or real business idea. This practical exercise shall allow them to apply the knowledge, skills and abilities acquired in the course to develop a feasible business plan and where possible explore the possibility of implementing the plan with support and assistance from established business-persons and entrepreneurs.		
Suggested Instructional/ Reading Material	<ol style="list-style-type: none"> 1. B. R. Barringer, and R. D. Ireland, Entrepreneurship: Successfully Launching New Ventures, 6th Edition, Prentice Hall, 2019, ISBN: 978-0134729534. 2. "Entrepreneurship: Theory, Process, and Practice" by Donald F. Kuratko. 3. "New Venture Creation: Entrepreneurship for the 21st Century" by Jeffrey A. Timmons, Stephen Spinelli Jr., and Rob Adams. 4. "Entrepreneurship: A Real-World Approach" by Rhonda Abrans. 5. "The Lean Startup: How Today's Entrepreneurs use Continuous Innovation to Create Radically Successful Businesses" by Eric Ries. 6. "Effectual Entrepreneurship" by Stuart Read, Saras Sarasvathy, Nick Dew, Robert Wiltbank, and Anne-Valcric Ohlsson. 		

7) University Elective

Course Title	Introduction to Economics		
Course Code	UE-171		
Credit Hours	3 (3,0)		
Category	Economy Related University Elective		
Prerequisite	None		
Co-Requisite	None		
Follow Up	None		
Course Learning Outcomes (CLOs)	At the end of the course, the students will be able to:	BT	PLO
	CLO1: Understand nature and scope of economics.	C2 (Understand)	1
	CLO2: Knowledge of market types, revenue curves, cost curves.	C1 (Knowledge)	1,3,10
	CLO3: Knowledge of central bank, monetary policy, global economics, free trade and protection.	C1 (Knowledge)	1,3,5,10
Syllabus	Nature and scope of economics, three basic economic problems, the economic role of Government, Theory of consumer behaviour, Analysis of market mechanism, Determinants of market forces, Theory of demand and supply, Determination of a value of a commodity, Elasticity of demand and supply, Types of markets, Revenue curves, Cost curves, Software industry analysis, Factor market analysis, Wage determination, problems of labour, capital, interests, entrepreneur & profit, National accounting, national income measurement, GDP, income and growth, National income application-standard of living, Trade development authority, Aggregate demand and supply, Taxation, efficiency, applications to international trade, costs of Taxes & subsidies, Money, finance and the concepts of open economy, Inflation & Unemployment, Types of States, Federal Budget, Role of Government-fiscal policy, Central Bank – Monetary Policy, Global Economics, Free Trade and Protection (WTO).		
Suggested Instructional/ Reading Material	1. Campbell R. McConnell, Stanley L. Brue and Sean Masaki Flynn, Economics, 21 st Edition, McGraw-Hill Education, 2017, ISBN-10: 1259723224, ISBN-13: 978-1259723223.		

Course Title	Introduction to Psychology		
Course Code	UE-271		
Credit Hours	3 (3,0)		
Category	Social Science Related University Elective		
Prerequisite	None		
Co-Requisite	None		
Follow Up	None		
Course Learning Outcomes (CLOs)	At the end of the course, the students will be able to:	BT	PLO
	CLO1: Differentiate between Psychologists, Psychoanalyst and Psychiatrist,	C4 (Differentiate)	1,10
	CLO2: Knowledge of important methods in Psychology.	C1 (Knowledge)	1,4,10
	CLO3: Knowledge of composite, cognitive Psychology and social cognition.	C1 (Knowledge)	1,4,10
Syllabus	Introduction to Psychology, Definition of the term Psychology, Psychology and Soul, Relationship of Psychology with Philosophy and deep roots of Psychology in Philosophy, Differentiate between Psychologists, Psychoanalyst and Psychiatrist, Different school of thought in Psychology, An overview of important methods in Psychology, Observational method, Clinical method, Development method, Introspection method, Different branches of Psychology, Child Psychology, Clinical Psychology, Applied Psychology, Individual Psychology, Criminal Psychology, Position of Sigmund Freud as the father of modern Psychology, Conscious / Unconscious / Subconscious, Psychodynamic theories, ID, Ego, Super Ego, Memory, Differentiate between STM and LTM, Forgetting, Causes of Forgetting, Disorders, Sleep and Behavioral disorders, Overview of composite Psychology, Perception, Various processes in Perception, Perception and its various characteristics, Attention, Attention as selective process, Internal and External determinants of attention, Intelligence and Intelligence test, Artificial Intelligence, Computer in any case cannot replace human mind, Cognitive Psychology, Learning, Various process and methods of learning, Nervous System, Definition and part, Types of Nerves, Mental Processes, Brain, Sensation, Types of Sensation, Personality and its Structure, Development, Basis and factors of Development, Social Psychology, Social Cognition, Impression Formation, Dream, Nature Of Dream, Dream as Supernatural Phenomena.		
Suggested Instructional/ Reading Material	1. Samuel E. Wood, Ellen Green Wood, Denise Boyd, The World of Psychology, 7 th Edition, Pearson, 2014, ISBN-13: 978-0205763733, ISBN-10: 0205763731.		

Course Title	Introduction to Marketing		
Course Code	UE-272		
Credit Hours	3 (3,0)		
Category	Social Science Related University Elective		
Prerequisite	None		
Co-Requisite	None		
Follow Up	None		
Course Introduction	This course is designed to provide students with a broad introduction to marketing concepts, to help them understand the factors that influence marketing decisions, and to focus their attention on the vital role of marketing in today's global economy.		
Course Learning Outcomes (CLOs)	At the end of the course, the students will be able to:	BT	PLO
	CLO1: Identify some of the basic approaches to formulating a marketing strategy in order to participate effectively when working with marketing policy coordinators.	C1 (Identify)	1, 6, 7
	CLO2: Use an understanding of marketing and the market driven enterprise to differentiate market.	C4 (Differentiate)	1, 3
	CLO3: Identify key stages of the market planning process in order to create marketing plans through development of key sections common to most plans.	C3 (Develop)	1, 3, 4
Course Description	Marketing in Changing World, Core marketing concepts, Creating Customer Value and Satisfaction, Strategic Planning and the Marketing Process, Micro and Macro Marketing Environment, Marketing Research and Information Systems, Consumer Markets and Consumer Buyer Behavior, Business Markets and Business Buyer Behavior, Marketing Segmentation, Targeting, and Positioning for Competitive Advantage Product and Services strategy, New Products Development and Product Life-Cycle Strategies, Pricing Products: Pricing Considerations and Approaches, Pricing Strategies, Distribution Channels and Logistics Management, Retailing and Wholesaling, Integrated Marketing Communication Strategy, Advertising, Sales Promotion and Public Relations, Personal Selling and Sales Management, Direct and Online Marketing, Competitive Strategies: Building Lasting Customer Relationships.		
Suggested Instructional/ Reading Material	7. Kotler P., Armstrong G., Agnihotri P. Y., and Ehsan Ul Haque. 2017. Principles of Marketing: A South Asian Perspective. 13th Ed. Pearson Education, India. 8. Sharp B. 2018. Marketing: Theory, Evidence, Practice. 2nd ed. Oxford University Press.		

Course Title	Introduction to Sociology		
Course Code	UE-273		
Credit Hours	3 (3,0)		
Category	Social Science Related University Elective		
Prerequisite	None		
Co-Requisite	None		
Follow Up	None		
Course Learning Outcomes (CLOs)	At the end of the course, the students will be able to:	BT	PLO
	CLO1: Explain role and importance of Sociology.	C2 (Explain)	1
	CLO2: Describe structural functional theory, social conflict theory, Sociobiology, Types of societies.	C2 (Describe)	1,3,4
	CLO3: Know the theory of Change.	C1 (Knowledge)	1,3,4
Syllabus	Introduction to Sociology, Society, basic concepts, Culture, Theories of culture, Structural functional theory, Social conflict theory, Sociobiology, Types of societies, Agrarian Societies, Industrial Societies, Postindustrial Societies, Limits of technology, Karl Marx: Society and Conflict, Max Weber: The Rationalization of Society, Emile Durkheim: Society and Function, Socialization, Agents of Socialization, Groups and Organizations, Formal Organizations, The Evolution of Formal Organizations, Scientific Management, The Changing nature of work, McDonaldization of Society, Crime, Deviance, The Functions of Deviance, Deviance and Inequality, Deviance, Race and Gender, Crime, Politics, Government, Social Movement, Collective Behavior and Social Movements, Social, Change: Traditional, Modern and Postmodern societies Culture and change, Conflict and change, Ideas and change, Demographic change, Dimensions of modernization, Theories of Modernity, Structural Functional Theory, Social Conflict Theory.		
Suggested Instructional/ Reading Material	1. Richard P. Appelbaum, Deborah Carr, Mitchell Duneier and Anthony Giddens , Essentials of Sociology, 6th Edition, W. W. Norton & Company, 2017, ISBN-10: 0393614298, ISBN-13: 978-0393614299.		

Course Title	Financial Accounting		
Course Code	UE-274		
Credit Hours	3 (3,0)		
Category	Social Science Related University Elective		
Prerequisite	None		
Co-Requisite	None		
Follow Up	None		
Course Introduction	This course is designed to introduce students to the knowledge of accounting required to help them understand the process of financial management required to develop modern accounting information systems.		
Course Learning Outcomes (CLOs)	At the end of the course, the students will be able to:	BT	PLO
	CLO1: Develop and understand the nature and purpose of financial statements in relationship to decision making.	C2 (Explain)	1, 3, 4
	CLO2: Develop the ability to use the fundamental accounting equation to analyze the effect of business transactions on an organization's accounting records and financial statements.	C4 (Analyze)	3
	CLO3: Develop the ability to use a basic accounting system to create (record, classify, and summarize) the data needed to solve a variety of business problems.	C3 (Operate)	4, 5
	CLO4: Develop the ability to use accounting concepts, principles, and frameworks to analyze and effectively communicate information to a variety of audiences.	C4 (Analyze)	3, 7
	CLO5: Develop the ability to use accounting information to solve a variety of business problems.	C3 (Solve)	3, 4
	CLO6: Develop the ability to interact well with team members.	C5 (Collaborate)	6, 7
Syllabus	Introduction to accounting; Accounting principles; Book keeping; Basics of financial statements; Adjustments to financial statements; The cash book; Bank reconciliation; Control accounts; Statement of cash flows; Financial activities; Property; Plant and equipment (PPE); Accounting errors; Accounting for partnerships; Balance sheet.		
Suggested Instructional/ Reading Material	1. Ghani, M. A. 2020. Principles of Accounting. Pak Imperial Book Depot, Lahore, Pakistan		

Course Title	Organizational Behavior		
Code	UE-373		
Credit Hours	3 (3,0)		
Category	Management Related University Elective		
Prerequisite	None		
Co-Requisite	None		
Follow-up	None		
Course Learning Outcomes (CLOs)	At the end of the course, the students will be able to:	BT	PLO
	CLO1: Understand of Organizational Change and Stress Management, Diversity in Organizations, Organization Culture.	C2 (Understand)	1,3,6,7
	CLO2: Describe Attitudes and Job Satisfaction, Emotions and Moods, Personality and Values, Perception and Individual Decision-making.	C2 (Describe)	1,3,6,7
	CLO3: Know the foundations of Group Behavior.	C1 (Knowledge)	1,3,6,7
Syllabus	Organizational behavior is a field of study that investigates the impact that individuals, groups, and structure have on behavior within organizations, for the purpose of applying such knowledge toward improving an organization's effectiveness. This course focuses on such topics as: Attitudes and Job Satisfaction, Emotions and Moods, Personality and Values, Perception and Individual Decision-making, Motivation Concepts and Applications, Foundations of Group Behavior, Understanding Work Teams, Communication, Leadership, Power and Politics, Organizational Change and Stress Management, Diversity in Organizations, Organization Culture.

1. Introduction

IT has been a key player in digitizing our lives. From daily routine jobs to the most sophisticated financial applications, IT provides the necessary enabling environment. IT infrastructure in an organization is as important as its other physical and human resources. The Department of Information Technology (DIT) aims to provide state-of-the-art training to its students in the field of IT so that they are considered competitive both in national and international markets.

2. Vision

To be a globally recognized institution known for innovation in education and research.

3. Mission

To rigorously train students in the field of Information Technology (IT) and affiliated disciplines, so that they can serve humanity with skill, knowledge and high character, and be a source of pride to humanity.

4. Program Introduction

The Bachelor of Science in Information Technology (BSIT) program at the DIT has been designed in accordance with the guidelines provided by the National Computing Education Accreditation Council (NCEAC) constituted by the Higher Education Commission (HEC) of Pakistan. With the cutting-edge training imparted to the DIT students, the curriculum prepares DIT students not only for higher education and market jobs, but also for self-initiated ventures that may translate into successful startups.

5. Program Education Objectives (PEOs)

The program education objectives of the BSIT program are to

PEO1: Technical Proficiency and Innovation

Prepare students to innovate, develop, deploy, analyze, and administer information technology artifacts to solve social and business problems. Graduates will demonstrate technical proficiency by applying theoretical concepts and practical skills to create innovative solutions, enhance problem-solving abilities through critical and computational thinking, and maintain a strong foundation for careers in academia, industry, and further studies.

PEO2: Collaborative, Ethical, and Professional Responsibility

Foster a sense of professional and ethical responsibilities in graduates, enabling them to understand the impact of technology on society at large. Graduates will work effectively in teams, demonstrating leadership and collaboration skills in multi-disciplinary settings,

addressing ethical, legal, societal, and cultural issues, and committing to professional ethics in their practice.

PEO3: Lifelong Learning and Communication Skills

Hone the skills that facilitate lifelong learning, integrating new tools and technologies, and improving students' problem-solving abilities. Graduates will engage in continuous professional development, adapt to emerging technologies, and effectively communicate complex ideas through oral and technical communication, preparing them for diverse roles in both private and public sectors.

5.1 Program Learning Outcomes (PLOs)

Computing programs prepare students to attain educational objectives by ensuring that students demonstrate achievement of the following outcomes (derived from Graduate Attributes define by Seoul Accord www.seoulaccord.org).

PLO1: Academic Education: To prepare graduates as computing professionals.

PLO2: Knowledge for Solving Computing Problems: Apply knowledge of computing fundamentals, knowledge of a computing specialization, and mathematics, science, and domain knowledge appropriate for the computing specialization to the abstraction and conceptualization of computing models from defined problems and requirements.

PLO3: Problem Analysis: Identify, formulate, research literature, and solve complex computing problems reaching substantiated conclusions using fundamental principles of mathematics, computing sciences, and relevant domain disciplines.

PLO4: Design/Development of Solutions: Design and evaluate solutions for complex computing problems, and design and evaluate systems, components, or processes that meet specified needs with appropriate consideration for public health and safety, cultural, societal, and environmental considerations.

PLO5: Modern Tool Usage: Create, select, adapt and apply appropriate techniques, resources, and modern computing tools to complex computing activities, with an understanding of the limitations.

PLO6: Individual and Team Work: Function effectively as an individual and as a member or leader in diverse teams and in multi-disciplinary settings.

PLO7: Communication: Communicate effectively with the computing community and with society at large about complex computing activities by being able to comprehend and write effective reports, design documentation, make effective presentations, and give and understand clear instructions.

PLO8: Computing Professionalism and Society: Understand and assess societal, health, safety, legal, and cultural issues within local and global contexts, and the consequential responsibilities relevant to professional computing practice.

PLO9: Ethics: Understand and commit to professional ethics, responsibilities, and norms of professional computing practice.

PLO10: Life-long Learning: Recognize the need, and have the ability, to engage in independent learning for continual development as a computing professional.

5.2 PLO to PEO Mapping

Following is the PEOs to PLOs mapping for BS Information Technology Program

No.	Program Learning Outcomes (PLOs)	PEO-1	PEO-2	PEO-3
1	Academic Education	√		
2	Knowledge for solving Computing Problems	√		
3	Problem Analysis	√		
4	Design/ Development of Solutions	√		
5	Modern Tool Usage	√		
6	Individual and Teamwork		√	√
7	Communication		√	
8	Computing Professionalism and Society		√	
9	Ethics		√	
10	Life-long Learning			√

5.3 Bloom's Taxonomy for Program Learning Outcomes (PLOs)

Bloom's Taxonomy classifies various outcomes and skills (PLOs) into six levels, as shown in the table below. These levels can be used to structure the learning outcomes, lessons, and assessments of a course. Each level of Bloom's Taxonomy corresponds to one or more PLOs.

Level	Description	Key Words
Remembering	Can the students <u>recall</u> or <u>remember</u> the information?	know, describe, identify, label, list, match, memorize, recall
Understand	Can the students <u>explain</u> ideas or concepts?	classify, describe, cite, discuss, generalize, illustrate, restate (in own words), summarize
Applying	Can the students <u>use</u> the information in a new way?	assess, choose, solve, demonstrate, dramatize, demonstrate, establish, extend, illustrate,
Analyzing	Can the students <u>distinguish</u> between different parts?	analyze, appraise, categorize, compare, identify, contrast, criticize, differentiate, recognize
Creating	Can the students <u>create</u> new product or point of view?	adapt, incorporate, individualize, integrate, intervene, invent, model,

		modify, communicate, construct, create, design, develop, formulate, generate, reconstruct, reinforce,
Evaluating	Can the students <u>justify</u> a stand or decision?	appraise, argue, choose, compare, conclude, contrast, criticize, interpret, judge, justify, predict, rate

6. Admission Eligibility Criteria

- Years of Study completed: 12 Years
- Study Program/Subject: Intermediate of Computer Science (ICS), FSc Pre-engineering, FSc Pre-medical, FSc Pre-medical with Additional Mathematics, Intermediate with Mathematics and Physics, Intermediate with Mathematics and Computer Science, Intermediate with Mathematics and Statistics, A-Levels (with relevant subjects), Diploma of Associate Engineer (DAE) in relevant discipline.
- Percentage/CGPA: 50% marks required with the exception of DAE where 60% marks are required for admission.
- Entry Test (if applicable) with minimum requirement: There is no compulsory entry test requirement. However, owing to the large number of applicants DIT conducts an entry test to select students as per number of available seats.
- Any other (if applicable)

7. Duration of the Program and Degree Awarding Criteria

The BS Information Technology program spans 8 semesters over 4 years and requires the completion of 134 credit hours. To qualify for the degree, students must achieve a minimum CGPA of 2.0. Additionally, a final year project is mandatory. Other requirements, such as a comprehensive examination, may apply if specified.

8. Categorization of Courses

8.1 Nomenclature of Course Categories and Course Codes

C	Code	Description	Courses	Cr. Hrs.	
0	MD	Math Deficiency	2	6*	(6,0)*
1	CC	Computing Core	18	46	(30,48)
2	DI	Domain (IT) Core	6	18	(12,18)
3,4	EI	Domain (IT) Elective	7	21	(16,15)
5	MS	Mathematics & Supporting Courses	4	12	(12,0)
6,9	GE	General Education Courses	12	30	(28,6)
7	UE	Elective Supporting Courses	1	3	(3,0)
8	HQ	Quran Translation	8	4	(4,0)
Total			54	134	(105,29)

Course Coding Scheme:

Code-YCS

Code = CC / EI / MS / GE / HQ

Y = Year of Offering (Earliest) = 1, 2, 3, 4

C = Course Category Code = 0, 1, ..., 9

S = Serial Number (Resets with Year) = 0, 1, ..., 9

Lab Codes: Code-YCS-L

8.2 Comparison with HEC/NCEAC Recommendation

Note: Basics courses represent Math and Supporting and General Education courses as per HEC/NCEAC approved curriculum based on HEC Undergraduate Policy 2023.

CC = Computing Core, DI = Domain Core (IT), EI = Domain Elective (EI)

MS = Mathematics & Supporting, GE = General Education, UE = University

Elective, MD = Math Deficiency, HQ = Quran Translation

Semester	Number of Courses		Category (Credit Hours)								Semester Load Cr. Hrs. (Cont. Hrs.)
			Core Courses		Basic Courses		Domain Electives (EI)	Others			
	TH	LAB	CC	DI	MS	GE		UE	MD	HQ	
1	7	3	3	0	0	13	0	0	3*	0.5	16.5 (13.5,9)
2	6	2	7	0	0	6	0	3	3*	0.5	16.5 (14.5,6)
3	6	3	14	0	0	3	0	0	0	0.5	17.5 (14.5,9)
4	7	3	10	0	6	2	0	0	0	0.5	18.5 (15.5,9)
5	7	3	6	6	3	2	0	0	0	0.5	17.5 (14.5,9)
6	7	3	0	0	0	2	15	0	0	0.5	17.5 (14.5,9)
7	5	5	2	6	0	0	6	0	0	0.5	14.5 (8.5,18)
8	5	3	4	6	3	2	0	0	0	0.5	15.5 (9.5,18)
PU	50	25	46	18	12	30	21	3	6*	4	134 (105,87)
HEC Guidelines	50	25	46	18	12	30	21	3	6*	4	134
Difference (HEC & PU)	0		0		0		0	0	0	0	0

* These Math courses will be Non-Credit courses with only Pass/Fail grade assigned to the students.

The courses with lab are counted as 2 separate courses.

8.3 Category-wise List of Courses

COMPUTING CORE: 46 (30,45)					
Sr.	Sem.	Code	Course Title	Prerequisite	Cr. Hrs. (Cont. Hrs.)
1	1	CC-110	Digital Logic Design		2 (2,0)
2	1	CC-110-L	Digital Logic Design Lab		1 (0,3)
3	2	CC-112	Programming Fundamentals		3 (3,0)
4	2	CC-112-L	Programming Fundamentals Lab		1 (0,3)
5	2	CC-214	Computer Networks		2 (2,0)
6	2	CC-214-L	Computer Networks Lab		1 (0,3)
7	3	CC-211	Object Oriented Programming	Programming Fundamentals	3 (3,0)
8	3	CC-211-L	Object Oriented Programming Lab	Programming Fundamentals	1 (0,3)
9	3	CC-210	Computer Organization & Assembly Language	Digital Logic Design	2 (2,0)
10	3	CC-210-L	Computer Organization & Assembly Language Lab	Digital Logic Design	1 (0,3)
11	3	CC-215	Database Systems		3 (3,0)
12	3	CC-215-L	Database Systems Lab		1 (0,3)
13	3	CC-212	Software Engineering		3 (3,0)
14	4	CC-213	Data Structures	Object Oriented Programming	3 (3,0)
15	4	CC-213-L	Data Structures Lab	Object Oriented Programming	1 (0,3)
16	4	CC-311	Operating Systems		2 (2,0)
17	4	CC-311-L	Operating Systems Lab		1 (0,3)
18	4	CC-312	Information Security		3 (2,3)
19	5	CC-310	Artificial Intelligence	Data Structures	2 (2,0)
20	5	CC-310-L	Artificial Intelligence Lab	Data Structures	1 (0,3)
21	5	CC-313	Analysis of Algorithms	Data Structures	3 (3,0)
22	7	CC-411	Final Year Project – I		2 (0,6)
23	8	CC-412	Final Year Project – II	Final Year Project - I	4 (0,12)
MATHEMATICS & SUPPORTING: 12 (12, 0)					
Sr.	Sem.	Code	Course Title	Prerequisite	Cr. Hrs. (Cont. Hrs.)
1	4	MS-253	Multivariable Calculus	Calculus and Analytical Geometry	3 (3,0)
2	4	MS-251	Probability and Statistics		3 (3,0)
3	5	MS-252	Linear Algebra		3 (3,0)
4	8	MS-254	Technical and Business Writing		3 (3,0)
MATH DEFICIENCY: 6 (6,0)*					
Sr.	Sem.	Code	Course Title	Prerequisite	Cr. Hrs. (Cont. Hrs.)
1	1	MD-001	Math Deficiency – I		3 (3,0)*
2	2	MD-002	Math Deficiency – II		3 (3,0)*

* Non-Credit courses with only Pass/Fail grade assigned to the students.

GENERAL EDUCATION: 30 (29, 3)					
Sr.	Sem.	Code	Course Title	Prerequisite	Cr. Hrs. (Cont. Hrs.)
1	1	GE-160	Applications of Information & Communication Technologies		2 (2,0)
2	1	GE-160-L	Applications of Information & Communication Technologies Lab		1 (0,3)
3	1	GE-169	Applied Physics (Natural Science)		3 (2,3)
4	1	GE-163	Islamic Studies		2 (2,0)
5	1	GE-168	Ideology and Constitution of Pakistan		2 (2,0)
6	1	GE-190	Functional English		3 (3,0)
7	2	GE-191	Expository Writing		3 (3,0)
8	2	GE-167	Discrete Structures (Quantitative Reasoning-1)		3 (3,0)
9	3	GE-162	Calculus and Analytical Geometry (Quantitative Reasoning-2)		3 (3,0)
10	4	GE-192	Introduction to Management (Social Science)		2 (2,0)
11	5	GE-262	Professional Practices (Arts and Humanities)		2 (2,0)
12	6	GE-362	Entrepreneurship		2 (2,0)
13	8	GE-363	Civics and Community Management		2 (2,0)

INFORMATION TECHNOLOGY CORE: 18 (15, 9)					
Sr.	Sem.	Code	Course Title	Prerequisite	Cr. Hrs. (Cont. Hrs.)
1	5	DI-322	Web Technologies		2 (2,0)
2	5	DI-322-L	Web Technologies Lab		1 (0,3)
3	5	DI-328	Parallel & Distributed Computing	Operating Systems	3 (2,3)
4	7	DI-323	System and Network Administration	Operating Systems	2 (2,0)
5	7	DI-323-L	System and Network Administration Lab	Operating Systems	1 (0,3)
6	7	DI-324	Database Administration and Management	Database Systems	2 (2,0)
7	7	DI-324-L	Database Administration and Management Lab	Database Systems	1 (0,3)
8	8	DI-325	Cyber Security	Data Structures	3 (2,3)
9	8	DI-327	Information Technology Infrastructure		3 (2,3)

IT TECHNICAL ELECTIVE: 21 (16, 15)					
SEVEN COURSES (NON-EXHAUSTIVE/EXTENSIBLE LIST OF COURSES)					
Sr.	Sem.	Code	Course Title	Prerequisite	Cr. Hrs. (Cont. Hrs.)
1	6	EI-330	Software Project Management		3 (3,0)

9. Scheme of Studies and Semester-wise Workload

Semester - I						
Sr.	Code	Course Title	Pre-Requisite	Domain	Cr. Hrs.	Cont. Hrs.
1	GE-160	Applications of Information & Communication Technologies		GE	2	(2,0)
2	GE-160-L	Applications of Information & Communication Technologies Lab		GE	1	(0,3)
3	GE-169	Applied Physics		GE	3	(2,3)
5	CC-110	Digital Logic Design		CC	2	(2,0)
6	CC-110-L	Digital Logic Design Lab		CC	1	(0,3)
7	GE-163	Islamic Studies		GE	2	(2,0)
8	GE-168	Ideology and Constitution of Pakistan		GE	2	(2,0)
9	GE-190	Functional English		GE	3	(3,0)
10	MD-001	Math Deficiency - I		MD	3*	(3,0)*
11	HQ-001	Quran Translation - I		HQ	0.5	(0.5,0)
Credit Hours (Semester - I)					16.5	(13.5,9)
Semester - II						
Sr.	Code	Course Title	Pre-Requisite	Domain	Cr. Hrs.	Cont. Hrs.
1	CC-112	Programming Fundamentals		CC	3	(3,0)
2	CC-112-L	Programming Fundamentals Lab		CC	1	(0,3)
3	CC-214	Computer Networks		CC	2	(2,0)
4	CC-214-L	Computer Networks Lab		CC	1	(0,3)
5	GE-167	Discrete Structures		GE	3	(3,0)
6	GE-191	Expository Writing		GE	3	(3,0)
7	UE-272	Introduction to Marketing		UE	3	(3,0)
8	MD-002	Math Deficiency - II		MD	3*	(3,0)*
9	HQ-002	Quran Translation - II		HQ	0.5	(0.5,0)
Credit Hours (Semester - II)					16.5	(14.5,6)
Semester - III						
Sr.	Code	Course Title	Pre-Requisite	Domain	Cr. Hrs.	Cont. Hrs.
1	CC-211	Object Oriented Programming	Programming Fundamentals	CC	3	(3,0)
2	CC-211-L	Object Oriented Programming Lab	Programming Fundamentals	CC	1	(0,3)
3	CC-210	Computer Organization & Assembly Language	Digital Logic Design	CC	2	(2,0)
4	CC-210-L	Computer Organization & Assembly Language Lab	Digital Logic Design	CC	1	(0,3)
5	CC-215	Database Systems		CC	3	(3,0)
6	CC-215-L	Database Systems Lab		CC	1	(0,3)
7	CC-212	Software Engineering		CC	3	(3,0)
8	GE-162	Calculus & Analytical Geometry		GE	3	(3,0)
9	HQ-003	Quran Translation - III		HQ	0.5	(0.5,0)
Credit Hours (Semester - III)					17.5	(14.5,9)

Semester - IV

Sr.	Code	Course Title	Pre-Requisite	Domain	Cr. Hrs.	Cont. Hrs.
1	CC-213	Data Structures	Object Oriented Programming	CC	3	(3,0)
2	CC-213-L	Data Structures Lab	Object Oriented Programming	CC	1	(0,3)
3	CC-311	Operating Systems		CC	2	(2,0)
4	CC-311-L	Operating Systems Lab		CC	1	(0,3)
5	CC-312	Information Security		CC	3	(3,0)
6	MS-253	Multivariable Calculus	Calculus & Analytical Geometry	MS	3	(3,0)
7	MS-251	Probability and Statistics		MS	3	(3,0)
8	GE-192	Introduction to Management		GE	2	(2,0)
9	HQ-004	Quran Translation - IV		HQ	0.5	(0.5,0)
Credit Hours (Semester - IV)					18.5	(16.5,6)

Semester - V

Sr.	Code	Course Title	Pre-Requisite	Domain	Cr. Hrs.	Cont. Hrs.
1	CC-310	Artificial Intelligence	Data Structures	CC	2	(2,0)
2	CC-310-L	Artificial Intelligence Lab	Data Structures	CC	1	(0,3)
3	CC-313	Analysis of Algorithms	Data Structures	CC	3	(3,0)
4	DI-322	Web Technologies		DI	2	(2,0)
5	DI-322-L	Web Technologies Lab		DI	1	(0,3)
6	DI-328	Parallel & Distributed Computing	Operating Systems	DI	3	(3,0)
8	MS-252	Linear Algebra		MS	3	(3,0)
9	GE-262	Professional Practices		GE	2	(2,0)
10	HQ-005	Quran Translation - V		HQ	0.5	(0.5,0)
Credit Hours (Semester - V)					17.5	(15.5,6)

Semester - VI

Sr.	Code	Course Title	Pre-Requisite	Domain	Cr. Hrs.	Cont. Hrs.
1	EI-330	Software Project Management		EI	3	(3,0)
2	EI-333	Mobile Application Development	Object Oriented Programming	EI	2	(2,0)
3	EI-333-L	Mobile Application Development Lab	Object Oriented Programming	EI	1	(0,3)
4	EI-335	Machine Learning	Artificial Intelligence	EI	2	(2,0)
5	EI-335-L	Machine Learning Lab	Artificial Intelligence	EI	1	(0,3)
6	EI-425	Software Quality Engineering		EI	3	(3,0)
7	EI-331	Software Construction & Development	Programming Fundamentals	EI	2	(2,0)
8	EI-331-L	Software Construction & Development Lab	Programming Fundamentals	EI	1	(0,3)
9	GE-362	Entrepreneurship		GE	2	(2,0)
10	HQ-006	Quran Translation - VI		HQ	0.5	(0.5,0)
Credit Hours (Semester - VI)					17.5	(14.5,9)

Semester - VII						
Sr.	Code	Course Title	Pre-Requisite	Domain	Cr. Hrs.	Cont. Hrs.
1	CC-411	Final Year Project – I		CC	2	(0,6)
2	DI-324	Database Administration and Management	Database Systems	DI	2	(2,0)
3	DI-324-L	Database Administration and Management Lab	Database Systems	DI	1	(0,3)
4	DI-323	System and Network Administration	Operating Systems	DI	2	(2,0)
5	DI-323-L	System and Network Administration Lab	Operating Systems	DI	1	(0,3)
6	EI-236	Global IT Services and Workspace		EI	3	(2,3)
8	EI-339	Cloud Computing		EI	3	(2,3)
10	HQ-007	Quran Translation – VII		HQ	0.5	(0.5,0)
Credit Hours (Semester - VII)					14.5	(8.5,18)
Semester - VIII						
Sr.	Code	Course Title	Pre-Requisite	Domain	Cr. Hrs.	Cont. Hrs.
1	CC-412	Final Year Project – II	Final Year Project - I	CC	4	(0,12)
2	DI-327	Information Technology Infrastructure		DI	3	(2,3)
4	DI-325	Cyber Security	Information Security	DI	3	(2,3)
6	MS-254	Technical and Business Writing		MS	3	(3,0)
7	GE-363	Civics and Community Management		GE	2	(2,0)
8	HQ-008	Quran Translation – VIII		HQ	0.5	(0.5,0)
Credit Hours (Semester - VIII)					15.5	(9.5,18)
Total Credit Hours					134	(111,87)

Research Thesis / Project /Internship

Final Year Project (6 credit hours, VII & VIII semesters)

10. Course Outlines

Course outlines of all major categories are shared below (next page).

1) Computing Core

Course Title	Digital Logic Design		
Course Code	CC-110		
Credit Hours	3 (2,1)		
Category	Computing core		
Prerequisite	None		
Co-Requisite	None		
Follow-up	CC-210 Computer Organization & Assembly Language		
Course Introduction	The course introduces the concept of digital logic, gates and the digital circuits. Further, it focuses on the design and analysis combinational and sequential circuits. It also serves to familiarize the student with the logic design of basic computer hardware components.		
Course Learning Outcomes (CLOs)	At the end of the course, the students will be able to:	BT	PLO
	CLO1: Acquire the basic knowledge of logic gates and digital logic circuits	C1 (Acquire)	1
	CLO2: Understand the working of the fundamental digital circuits used in digital systems and computers.	C2 (Understand)	1,2
	CLO3: Designing a digital circuit for implementing a given scenario.	C3 (Apply)	3,4
Syllabus	<p>Topics: Introduction to Digital Systems, Number Systems, Introduction to Boolean Algebra, Basic theorems and properties of Boolean Algebra, Boolean Functions, Logic Gates, NAND and NOR Implementation, Representation of Function in Sum of Minterms or Product of Maxterms, Simplification of Boolean function using Karnaugh Map, Don't care Conditions, The Tabulation Method, Introduction to Combinational Logic, Design of Adders, Design of Subtractors, Code Convertors, Analysis Procedure of Combinational Circuits, Binary Parallel Adders, Decimal Adders, Magnitude Comparator, Decoders and its applications, Multiplexers, Demultiplexers, Encoders, ROM, Programmable Logic Array (PLA), Introduction to Sequential Circuits, Basic Flip Flop, Clocked RS Flip Flop, Clocked D Flip Flop, Clocked JK Flip Flop, Clocked T Flip Flop, Analysis of Clocked Sequential Circuits, State Reduction and Assignment, Flip Flop Excitation tables, Design Procedure, Design of Counters, Design with State Equations, Introduction to Registers, Shift Registers, Ripple Counters, Synchronous Counters, Timing Sequences, Memory Unit, Random Access Memory. Introduction Programmable Logic Devices (CPLD, FPGA), Lab Assignments using tools such as Verilog HDL/VHDL, MultiSim.</p>		
Suggested Instructional/ Reading Material	<ol style="list-style-type: none"> 1. M. Morris Mano, Digital Logic and Computer Design, 1st Edition, Pearson, 1979, ISBN: 0132145103. 2. Thomas L. Floyd, Digital Fundamentals, 10th Edition, Prentice Hall, 2008, ISBN: 0132359235. 3. Fundamental of Digital Logic with Verilog Design, Stephen Brown, 2/e 		

Course Title	Digital Logic Design Lab		
Course Code	CC-110-L		
Credit Hours	1 (0,3)		
Category	Computing core		
Prerequisite	None		
Co-Requisite	None		
Follow-up	CC-210 Computer Organization & Assembly Language		
Course Introduction	The course introduces the concept of digital logic, gates and the digital circuits. Further, it focuses on the design and analysis combinational and sequential circuits. It also serves to familiarize the student with the logic design of basic computer hardware components.		
Course Learning Outcomes (CLOs)	At the end of the course, the students will be able to:	BT	PLO
	CLO1: Acquire the basic knowledge of Digital Electronic Trainer	C1 (Acquire)	1
	CLO2: Understand the pin configuration and working of commonly used ICs for digital circuit design	C2 (Understand)	1,2
	CLO3: Designing a digital circuit for implementing a given scenario.	C3 (Apply)	3,4
Syllabus	Topics: Familiarization with Digital Electronic Trainer, Implementation of logic gates using ICs, Illustration of basic properties and theorems Boolean algebra using circuit design, Implementation of given Boolean functions, Half Adder, Full Adder, Half Subtractor, Full Subtractor, Design of 7-Segment Display, BCD To 7-Segment Display, Decoder, Multiplexer, Demultiplexer, Implementation of Boolean function(s) using Decoder and Multiplexer, Magnitude Comparator, D Latch and Flip-Flop Operation, Latching BCD Data for Displaying On 7- Segment Display, JK Flip-Flop Operation, Random Access Memories		
Suggested Instructional/ Reading Material	<ol style="list-style-type: none"> 1. M. Morris Mano, Digital Logic and Computer Design, 1st Edition, Pearson, 1979, ISBN: 0132145103. 2. Thomas L. Floyd, Digital Fundamentals, 10th Edition, Prentice Hall, 2008, ISBN: 0132359235. 3. Fundamental of Digital Logic with Verilog Design, Stephen Brown, 2/e 		

Course Title	Programming Fundamentals		
Course Code	CC-112		
Credit Hours	3 (3,0)		
Category	Computing Core		
Prerequisite	None		
Co-Requisite	None		
Follow-up	CC-211: Object Oriented Programming, DI-322: Web Technologies, EI-338: Enterprise Systems, DI-327: Information Technology Infrastructure		
Course Introduction	This course provides fundamental concepts of programming to freshmen. The course is prerequisite to many other courses, therefore, students are strongly advised to cover all contents and try to achieve CLOs to the maximum possible level.		
Course Learning Outcomes (CLOs)	At the end of the course, the students will be able to:	BT	PLO
	CLO1: Understand basic problem-solving steps and logic constructs.	C2 (Understand)	1,2
	CLO2: Apply basic programming concepts.	C3 (Apply)	3,4
	CLO3: Design and implement algorithms to solve real world problems.	C3 (Solve)	3,4
Syllabus	<p>Introduction to Problem Solving, Algorithms, Programming, and C Language: Problem Solving, a brief review of Von-Neumann Architecture., The C Programming Language, Pseudo-code, Concept of Variable, Data types in Pseudo-code, The C Standard Library and Open Source, Input/Output, Arithmetic expressions, Assignment statement, Operator precedence, Concept of Integer division, Flowchart and its notations, Typical C Program Development Environment, Role of Compiler and Linker, Test Driving C Application. Introduction to C Programming: A Simple C Program: Printing Text, Adding Two Integer, Memory Concepts, Arithmetic in C, Operators. Decision Making: Equality and Relational Operators. Structured Program Development: The if, if...else, while Nested Control Statements. Program Control: for, switch, do...while, break, continue, Logical Operators. Functions: Modularizing Program in C, Math Library Functions, Function Definitions and Prototypes, Function-Call Stack and Stack Frames, Stack rolling and unrolling, Headers, Passing Arguments by Value and by Reference, Random Number Generation, Scope Rules, Recursion, Recursion vs Iteration. Arrays: Defining Arrays, Character Arrays, Static and Automatic Local Arrays, Passing Arrays to Function, Sorting and Searching Arrays, Multidimensional and Variable Length Arrays. Pointers: Pointer Definitions and Initialization, Pointer Operators, Passing Arguments to Function by Reference, Using the const and sizeof Operator, Pointer Expressions and Arithmetic, Pointers and Arrays, Array of Pointers, Function Pointers. Characters and Strings: Strings and Characters, Character Handling Library, String Functions, Library Functions. Formatted Input/Output: Streams, Formatted Output with printf, Formatted Input with scanf. Structures: Defining Structures, Accessing Structure Member, Structures and Functions, typedef, Unions. Bit Manipulation and Enumeration: Bitwise Operators, Bit Fields, Enumeration Constants. File Processing: Files and Streams, Creating, Reading and Writing data to a Sequential and a Random-Access File. Preprocessor: #include, #define, Conditional Compilation, #error and #pragma, # and ## Operators, Predefined Symbolic Constants, Assertions. Other Topics: Variable Length Argument List, Using Command Line Arguments, Compiling Multiple-Source-File Programs, Program Termination with exit and atexit, Suffixes for Integer and Floating-Point Literals, Signal Handling, Dynamic Memory Allocation calloc and realloc, goto. Advance Topics: Self-Referential Structures, Linked Lists. Efficiency of Algorithms, Selection and Insertion Sort.</p>

Title	Programming Fundamentals Lab		
Code	CC-112-L		
Credit Hours	1 (0,3)		
Category	Computing Core		
Prerequisite	None		
Co-Requisite	None		
Follow-up	CC-211: Object Oriented Programming, DI-322: Web Technologies, EI-338: Enterprise Systems, DI-327: Information Technology Infrastructure		
Course Introduction	This course provides fundamental concepts of programming to freshmen. The course is prerequisite to many other courses; therefore, students are strongly advised to cover all contents and try to achieve CLOs to the maximum possible level.		
Course Learning Outcomes (CLOs)	At the end of the lab, the students will be able to:	BT	PLO
	CLO1: Understand basic problem-solving steps and logic constructs.	C2 (Understand)	1,2
	CLO2: Apply basic programming concepts.	C3 (Apply)	3,4
	CLO3: Design and implement algorithms to solve real world problems.	C3 (Solve)	3,4,5
Syllabus	<p>Implementation and Practice of the concepts studied in “CC-112 Programming Fundamentals”</p> <p>Introduction to Problem Solving, Algorithms, Programming, and C Language: Problem Solving, a brief review of Von-Neumann Architecture., The C Programming Language, Pseudo-code, Concept of Variable, Data types in Pseudo-code, The C Standard Library and Open Source, Input/Output, Arithmetic expressions, Assignment statement, Operator precedence, Concept of Integer division, Flowchart and its notations, Typical C Program Development Environment, Role of Compiler and Linker, Test Driving C Application. Course Title	Computer Networks		
Course Code	CC-214		
Credit Hours	3 (2,1)		
Category	Computing Core		
Prerequisite	None		
Co-Requisite	None		
Follow-up	None		
Course Introduction	This course provides fundamental concepts related to computer networks. After completion of the course, the students will be able to understand Computer Networks basics, network types, layered communication models and protocols.		
Course Learning Outcomes (CLOs)	At the end of the course, the students will be able to:	BT	PLO
	CLO1: Describe the key terminologies and technologies of computer networks	C2 (Describe)	1
	CLO2: Explain the services and functions provided by each layer in the Internet protocol stack	C2 (Explain)	1
	CLO3: Identify various internetworking devices and protocols and their functions in a networking	C4 (Identify)	1,2
	CLO4: Analyze working and performance of key technologies, algorithms and protocols	C4 (Analyze)	3
	CLO5: Build Computer Network on various Topologies.	C5 (Build)	4,5
Syllabus	<p>Introduction: Protocols architecture, basic concepts of networking, network topologies. Layered Architecture: Physical layer functionality, data link layer functionality, multiple access techniques, circuit switching and packet switching, LAN technologies, wireless networks, MAC addressing, networking devices, network layer protocols, IPv4 and IPv6, IP addressing, subnetting, CIDR, routing protocols, transport layer protocols, ports and sockets, connection establishment, flow and congestion control, application layer protocols, latest trends in computer networks.</p>

Course Title	Computer Networks Lab		
Course Code	CC-214-L		
Credit Hours	1 (0,3)		
Category	Computing Core		
Prerequisite	None		
Co-Requisite	None		
Follow-up	None		
Course Introduction	This course provides fundamental hands-on skills related to computer networks. After completion of the course, the students will be familiar with networking, routing, switching, and Setting up of networks from scratch, major protocols involved in communication and their configurations. Students will also be made aware of the state-of-the-art areas in case they would like to pursue this course in future.		
Course Learning Outcomes (CLOs)	At the end of the lab, the students will be able to:	BT	PLO
	CLO1: Describe the fundamental components, technologies, and devices of computer networks	C2 (Describe)	1
	CLO2: Explain the services and functions provided by each layer in the Internet protocol stack	C2 (Explain)	1
	CLO3: Identify various internetworking devices and protocols and their functions in a networking	C4 (Identify)	1,2
	CLO4: Analyze working and performance of key technologies, algorithms and protocols	C4 (Analyze)	3
	CLO5: Build Computer Network on various Topologies.	C5 (Build)	4,5
Syllabus	Introduction to Wireshark, HTTP GET/response interaction, DNS role in the Internet infrastructure, TCP segments sent and received in transferring, UDP transport protocol IP investigate the IP protocol, NAT behavior of the NAT protocol, DHCP examine the DHCP packets captured, ICMP capturing the packets generated by the Ping program, Ethernet and ARP investigate the Ethernet protocol and the ARP protocol, 802.11 Wireless investigate the 802.11 wireless network protocol, SSL investigate the Secure Sockets Layer (SSL) protocol

Title	Object Oriented Programming		
Code	CC-211		
Credit Hours	3 (3,0)		
Category	Computing Core		
Prerequisite	CC-112 Programming Fundamentals		
Co-Requisite	None		
Follow-up	CC-213 Data Structures, CC-310 Artificial Intelligence, DI-328 Parallel and Distributed Computing, EI-333 Mobile Application Development		
Course Introduction	The course aims to focus on object-oriented concepts, analysis and software development. The basic concept of OOP is covered in this course.		
Course Learning Outcomes (CLOs)	At the end of the lab, the students will be able to:	BT	PLO
	CLO1: Understand principles of object-oriented paradigm.	C2 (Understand)	1
	CLO2: Identify the objects & their relationships to build object-oriented solution	C4 (Identify)	2,3,4
	CLO3: Model a solution for a given problem using object-oriented principles	C3 (Apply)	4
	CLO4: Examine an object-oriented solution	C4 (Examine)	4
Syllabus	<p>Introduction to Object-oriented Design, History and Advantages of Object-oriented Design. Introduction to OOP and C++: Brief description of C++ concepts, Introduction to OOP. Introduction to Classes Objects and Member Functions: Encapsulation and Abstraction, Class and Object, Getter/Setter Functions, Access Specifiers, Constructors, Overloaded Constructor, Default Constructor, Destructor. Functions: Inline Functions, Function Overloading. Class Templates array: Function Templates, Class Templates array, Vectors and Multidimensional Array, Reference to private Data Members, Default Member wise Assignment, const Objects, const Member Functions. Composition and Aggregation: Object Composition and Aggregation, Class Separation using header. Friend Classes and Functions: Friend Functions, Friend Classes. static Members: "this" pointer, static Data Members, static Member Functions. Copy Constructor: Default Copy Constructor. Operator Overloading: Overloaded Operators of Standard Library, Operator Overloading, Overloading Binary Operators, Overloading Unary Operators, Overloading ++ Operator, Overloading – Operator, Dynamic Memory Management, Operators as Members vs Non-Members, Conversion between Types, Explicit Constructor and Conversion Operators, Overloading the Function call Operator. Stream I/O: Introduction, Streams, Streams Input, Streams Output, Object Streams, data and object serialization using object streams. Inheritance: Introduction, Base and Derived Classes, Relationships between Base and Derived Classes, Constructors in Derived Classes, Destructor in Derived Classes, public protected and private Inheritance. Polymorphism: Relationship among Objects in Inheritance, Virtual Functions, Virtual Destructors, Pure Virtual Functions, Abstract and Concrete Classes. File Processing: Files and Streams, create a Sequential File, read a Sequential File, update a Sequential File, Random Access File, create a Random-Access File, read a Random-Access File, update a Random-Access File, Exception Handling: Flow of Control, Rethrowing an Exception, Constructor Destructor and Exception handling. Generic Programming Concepts: Custom Templates, Class Templates, Function Templates, Arguments to Templates, Overloading Function Templates. Standard Library: Containers, Iterators, Adapters, Sequence Containers, Associative Containers, Container Adapters, Minimum Iterator Requirements, Lambda Expressions, Function Objects.</p>

Course Title	Computer Organization and Assembly Language		
Course Code	CC-210		
Credit Hours	2 (2,0)		
Category	Computing core		
Prerequisite	CC-110 Digital Logic Design		
Co-Requisite	None		
Follow-up	None		
Course Introduction	The main objective of this course is to introduce the organization of computer systems and usage of assembly language for optimization and control. Emphasis should be given to expose the low-level logic employed for problem solving while using assembly language as a tool. At the end of the course the students should be capable of writing moderately complex assembly language subroutines and interfacing them to any high-level language.		
Course Learning Outcomes (CLOs)	At the end of the course, the students will be able to:	BT	PLO
	CL01: Acquire the basic knowledge of computer organization computer architecture and assembly language	C1 (Acquire)	1
	CL02: Understand the concepts of basic computer organization, architecture, and assembly language techniques	C2 (Understand)	2
	CL03: Solve the problems related to computer organization and assembly language	C3 (Apply)	3,4,5
Syllabus	<p>Topics: Introduction to computer systems, Information is bits + context, Evolution of Intel Microprocessor, Introduction to Assembly Language, Computer Organization, Storage devices hierarchy, The Components of a Microcomputer System, Instruction Cycle, Memory Architecture, Memory Representation & Hierarchy, Data, Address, Control Busses, Processor architecture: the Y86 instruction set architecture, logic design and the Hardware Control Language (HCL), sequential Y86 implementations, general principles of pipelining, pipelined Y86 implementations, Intel 8086 family of Microprocessors, Organization of Intel 8088/8086 Processor, Machine-level representation of programs: a historical perspective, program encodings, data formats, accessing information, arithmetic and logical operations, control, procedures, array allocation and access, heterogeneous data structures, putting it together: understanding pointers, Registers and their categories Function of Registers, Memory Addressing, Real Mode Memory Structure, Memory Segmentation (Segment/Offset Scheme), Computer Instructions for Basic computer (Memory Reference, Register Reference and I/O instructions), Addressing modes, Instruction Cycle, Timing and Decoding, RTL of the instructions, Complete flow chart for the Basic Computer Operation, Addressing Modes, Design of the CPU of a basic computer</p>

Course Title	Database Systems		
Course Code	CC-215		
Credit Hours	3 (3,0)		
Category	Computing Core		
Prerequisite	None		
Co-Requisite	None		
Follow-up	DI-324: Database Administration and Management		
Course Introduction	The course aims to introduce basic database concepts, different data models, data storage and retrieval techniques and database design techniques. The course primarily focuses on relational data model and DBMS concepts		
Course Learning Outcomes (CLOs)	At the end of the course, the students will be able to:	BT	PLO
	CLO1: To understand the basic concepts of database systems and Database System environment.	C2 (Understand)	1
	CLO2: To develop strong concepts of data modeling techniques	C2 (Understand)	1,2
	CLO3: Understanding of database design phases and techniques for performance improvement	C2 (Understand)	1,2
	CLO4: To understand the concept of transaction management, concurrency control, database recovery, and distributed databases	C2 (Understand)	1,2
	CLO5: To learn SQL and develop expertise in writing SQL queries	C3 (Apply)	3,4,5
	CLO6: To develop the fundamental knowledge of PL/SQL, stored procedures, and database triggers	C3 (Apply)	3,4,5
	CLO7: To be able to design a database system for small business organizations	C5 (Design)	3,4,5,7
Syllabus	<p>File Systems and Databases: Introduction, A File system Critique, Database Systems, Database approach vs file-based system, database architecture, three level schema architecture, data independence, Database Models. Introduction to RDBMS: Logical view of Data; Entities and Attributes, Tables and their Characteristics, Keys; relational data model, attributes, schemas, tuples, domains, relation instances, keys of relations, integrity constraints. Relational Algebra: Relational Database Operators, selection, projection, Cartesian product, types of joins. Entity Relationship (E-R) Modeling: Basic Modeling Concepts, entity sets, attributes, relationship, entity-relationship diagrams, Normalization of Database Tables: Objectives, Forms, Normalization and Database Design, functional dependencies, normal forms, Denormalization, Structured Query Language (SQL): Introduction, DDL Commands, Joins and subqueries in SQL, Grouping and aggregation in SQL, DML Commands, DCL Commands, Complex Queries and SQL Functions, Procedural SQL; Triggers, Stored procedures. Database Design: The System Development Life Cycle (SDLC), The Database Life Cycle (DBLC), Database Design Strategies, Transaction Management and Concurrency Control: Introduction, Transaction Properties and Types, Concurrency Control Issues, Database Recovery Management. DDBMS: Evolution, Components, Distributed processing and distributed databases, Distributed database transparency features. Distributed database design, Data fragmentation, Data replication, NoSQL systems.</p>

Course Title	Database Systems Lab		
Course Code	CC-215-L		
Credit Hours	1 (0,3)		
Category	Computing Core		
Prerequisite	None		
Co-Requisite	None		
Follow-up	DI-324: Database Administration and Management		
Course Introduction	The course aims to introduce the Structured Query Language (SQL). It covers the set of commands related to Data Retrieval, Data Definition Language (DDL), Data Manipulation Language (DML), Data Control Language (DCL). It will followed up by procedural flavor of SQL (PL/SQL).		
Course Learning Outcomes (CLOs)	At the end of the lab, the students will be able to:	BT	PLO
	CLO1: To learn SQL and develop expertise in writing SQL queries	C3 (Apply)	3,4,5
	CLO2: To develop the fundamental knowledge of PL/SQL, stored procedures, and database triggers	C3 (Apply)	3,4,5
	CLO3: To be able to design a database system for small business organizations	C5 (Design)	3,4,5,7
Syllabus	<p>Introduction to SQL environment: Writing Basic SQL Statements; SELECT Statement: Arithmetic Expressions, Operator Precedence, Null Value, Column Alias, Concatenation Operator, FROM Clause: Table list, Table Alias. Restricting and Sorting Data; WHERE Clause: Comparison operators, Logical operators, ORDER BY clause, Display table Structure.</p> <p>Single row functions: character functions, number functions, date functions, type conversion functions. Multi row Functions: Sum, Average, Standard deviation, Variance, Subgrouping of data, Group by Clause, use of Having clause. Join: Cross product, natural join, Equi-join, Non equi-join, left outer-join, right outer-join, self-join. Subquery: use of subquery, subquery syntax, Multiple Column Subqueries, pairwise comparison, Non-pair wise comparison, Null Value in a subquery, Subquery in From Clause. Creating and Altering SQL tables: Create table statement, Defining Constraints, Column Level and Table Level, NOT NULL Constraint, UNIQUE Key Constraint, PRIMARY Key Constraint, FOREIGN Key Constraint, CHECK Constraint, Alter table statement, drop statement, Data Manipulation: Insert, Update, Delete statements. SQL Objects: Views, Sequences, Indexes. User Management: Create user, user privileges, user groups, Grant, Revoke statements.</p> <p>Introduction to Procedural SQL (PL/SQL), Sections of a PL/SQL block, Variable declaration and initialization, SELECT statement in PL/SQL, Arithmetic expressions, Selection, Repetition, Exception Handling, Cursors, Stored Procedures and Functions, Introduction to Database Triggers</p>

Course Title	Software Engineering		
Course Code	CC-212		
Credit Hours	3 (3,0)		
Category	Computing Core		
Prerequisite	None		
Co-Requisite	None		
Follow Up	None		
Course Learning Outcomes (CLOs)	At the end of the course, the students will be able to:	BT	PLO
	CLO1: Describe various software engineering processes and activates	C1 (Describe)	1
	CLO2: Apply the system modeling techniques to model a medium size software system	C3 (Apply)	1,2
	CLO3: Apply software quality assurance and testing principles to medium size software systems	C3 (Apply)	2,3
Syllabus	Introduction: Nature of Software, Overview of Software Engineering, Professional software development, Software engineering practice, Software process structure, Software Process Models: Waterfall Model, Incremental Model, Prototyping Model, Spiral Model, RAD Model. Agile Software Development: Agile process models, Agile development techniques. Introduction to Project Management, Introduction to Requirements Engineering, Functional and non-functional requirements. Analysis Model: Context models, Interaction models, Structural models, behavioral models, model driven engineering, Data modeling, Functional Modeling, Behavioral Modeling. Software Design: Data Design, Architectural Design, Component Level Design, User Interface Design. Object Oriented Analysis & Design Basics: Introduction to UML, UML Diagrams. Use Case Modeling, Rational Rose overview, Use case modeling in Rational Rose. Domain Model: Identifying business classes, Domain Model Associations, Domain Model Attributes, Implementation of Sequence Diagram and Domain model in Rational Rose. Interaction Diagram: Sequence diagrams, Collaboration Diagrams, Implementation of Sequence and Collaboration diagrams in Rational Rose. Design Class Diagram, Mapping Design to Code. Software Testing Fundamentals. Design patterns, Software testing and quality assurance. Software evolution. Project Management: Project planning, configuration management. Software Process improvement.

Title	Data Structures		
Code	CC-213		
Credit Hours	3 (3,0)		
Category	Computing Core		
Prerequisite	CC-211 Object Oriented Programming		
Co-Requisite	None		
Follow-up	CC-313 Analysis of Algorithms, DI-325 Cyber Security, CC-311 Operating Systems		
Course Introduction	The course is designed to teach students structures and schemes, which allow them to write programmer to efficiently manipulate, store, and retrieve data. Students are exposed to the concepts of time and space complexity of computer programs.		
Course Learning Outcomes (CLOs)	At the end of the course, the students will be able to:	BT	PLO
	CLO1: Implement various data structures and their algorithms and apply them in implementing simple applications	C3 (Apply)	1,2
	CLO2: Analyze simple algorithms and determine their complexities.	C4 (Analyze)	3
	CLO3: Apply the knowledge of data structure to other application domains	C3 (Apply)	3,4
	CLO4: Design new data structures and algorithms to solve problems	C6 (Design)	4,5
Syllabus	<p>Algorithm Specification: Properties of Algorithm, examples, performance, analysis, measurement, and Big Oh notation. Introduction to ADTs: Array and Polynomial as an ADT, Sparse Matrices, and Representation of Arrays. The Stack ADT: Linked list and array implementations, Expressions, Postfix Notation, and Infix to postfix conversion. The Queue ADT: Linked and array implementations of circular and double ended queue. Recursion: Recursive Definition and Processes, Writing Recursive Programs. Divide and Conquer Algorithms, Self-Referencing Classes and Dynamic Memory Allocation, Garbage Collection. Linked List: Singly Linked Lists, Circular Lists, Linked Stacks and Queues (Double Ended List), Doubly Linked Lists. Trees: Introduction to Trees, Logical construction and Traversing of Binary Trees, Implementation of Binary Trees (Insertion and Traversing), Searching and deletion in Binary Trees, Binary Search Tree, Introduction to Balanced and AVL Trees. Heaps: Heaps and Heaps as Priority Queues, Double Ended Priority Queue. Searching: Linear Search, Binary Search, and Types of Indexing. Hashing: Hash Functions: Division, Open Addressing; Overflow Handling: Chaining; Introduction to advanced topics: B-Trees, M-Way Trees, Generalized List etc. Sorting: Selection, Insertion, Merge, Quick, Bubble, Heap, Shell, Radix, and Bucket sorts. Graphs: Graph terminology, Adjacency List and Adjacency Matrix and Adjacency list representation of Graph; Elementary Graph Operations: Breadth First Search and Depth First Search, Spanning Trees (BFSST, DFSST), topological order, shortest path.</p>

Course Title	Operating Systems		
Course Code	CC-311		
Credit Hours	2 (2,0)		
Category	Computing Core		
Prerequisite	None		
Co-Requisite	None		
Follow-up	DI-323: System and Network Administration		
Course Introduction	To help students gain a general understanding of the principles and concepts governing the functions of operating systems and acquaint students with the layered approach that makes design, implementation and operation of the complex OS possible.		
Course Learning Outcomes (CLOs)	At the end of the course, the students will be able to:	BT	PLO
	CLO1: Understand the characteristics of different structures of the Operating Systems and the core functions of the Operating Systems	C2 (Understand)	1,2
	CLO2: Analyze and evaluate the algorithms of the core functions of the Operating Systems and explain the major performance issues with regard to the core functions	C4 (Analyze)	3
	CLO3: Demonstrate the knowledge in applying system software and tools available in modern operating systems.	C3 (Demonstrate)	3,4
Syllabus	<p>Introduction: Operating systems basics, system calls, process concept and scheduling, inter-process communication, multithreaded programming, multithreading models, threading issues. Process Scheduling: Algorithms, thread scheduling, multiple-processor scheduling, synchronization, critical section, synchronization hardware, synchronization problems, deadlocks, detecting and recovering from deadlocks. Memory Management: swapping, contiguous memory allocation, segmentation & paging, virtual memory management, demand paging, thrashing, memory-mapped files. File Systems: file concept, directory and disk structure, directory implementation, free space management, disk structure and scheduling, swap space management. System Protection: Virtual machines, operating system security.</p>

Syllabus	<p>Interacting with Linux Operating System: Virtualization and Hypervisors. Installation of VMWare and Ubuntu, Installation G++ the C++ Compiler on Ubuntu VMWare, Basic commands of Linux, Working with VIM editor, Compiling and executing a C/C++ program in VIM, File System Architecture: Schematic view of a standard UNIX file system. File System Mounting: Introduction to the concept of file system mounting. Linux configuration files related to file system mounting. File Permissions: standard file permissions. Use of chmod and chown commands. Device files: Seven File Types in Linux and the concept of device files. Terminal Attributes: Overview of Terminal Devices and current attributes of the terminal driver. Hard and Soft Links. Managing services using systemd: Introduction to Linux system daemon. Shell commands to manage services using systemctl. Booting process of a Linux system.</p> <p>Linux Shell Programming: Linux System Call Interface, Use of GNU gcc compiler, Implementation of process scheduling algorithms, Process Creation and Termination: getpid(), getppid(), fork(), exit(), wait() and execl() system calls. File management in Linux. Concept of PPFDT. Concept of input, output and error redirection. Inter Process Communication: Linux IPC tools, Pipes, FIFOS and Sockets. Use of pipes and fifos on a Linux terminal. Signals: Signal delivery and execution of a signal handler. Synchronous and Asynchronous signals. Threads and Scheduling: Writing multi-threaded C programs using library calls from the POSIX pthread library like pthread_create(), pthread_join(), and pthread_exit(), Socket programming using threads in Linux, Implementation of process synchronization techniques</p>

Course Title	Information Security		
Course Code	CC-312		
Credit Hours	3 (2,3)		
Category	Computing Core		
Prerequisite	None		
Co-Requisite	None		
Follow-up	None		
Course Introduction	This course provides a broad overview of the threats to the security of information systems, the responsibilities and basic tools for information security, and the levels of training and expertise needed in organizations to reach and maintain a state of acceptable security. It covers concepts and applications of system and data security. Areas of particular focus include secure network design, implementation and transition issues, and techniques for responding to security breaches.		
Course Learning Outcomes (CLOs)	At the end of the course, the students will be able to:	BT	PLO
	CLO1: Explain key concepts of information security such as design principles, cryptography, risk management, and ethics.	C2 (Explain)	1,2
	CLO2: Discuss legal, ethical, and professional issues in information security.	C2 (Discuss)	1,2
	CLO3: Apply various security and risk management tools for achieving information security and privacy.	C3 (Apply)	3,4,5
Syllabus	CLO4: Identify appropriate techniques to tackle and solve problems in the discipline of information security.		
	Information security foundations, security design principles; security mechanisms, symmetric and asymmetric cryptography, encryption, hash functions, digital signatures, key management, authentication and access control; software security, vulnerabilities and protections, malware, database security; network security, firewalls, intrusion detection; security policies, policy formation and enforcement, risk assessment, cybercrime, law and ethics in information security, privacy and anonymity of data.		
Suggested Instructional/ Reading Material	<ol style="list-style-type: none"> 1. M. Whitman and H. Mattord, Principles of Information Security, 6th edition. 2. William Stallings, Computer Security: Principles and Practice, 3rd edition. 3. Dieter Gollmann, Computer Security, 3rd edition. 4. William Easttom, Computer Security Fundamentals, 3rd edition. 		

Course Title	Artificial Intelligence		
Course Code	CC-310		
Credit Hours	2 (2,0)		
Category	Computing core		
Prerequisite	CC-213: Data Structures		
Co-Requisite	None		
Follow-up	None		
Course Introduction	Artificial Intelligence has emerged as one of the most significant and promising areas of computing. This course focuses on the foundations of AI and its basic techniques like Symbolic manipulations, Pattern Matching, Knowledge Representation, Decision Making and Appreciating the differences between Knowledge, Data and Code. AI programming language Python has been proposed for the practical work of this course.		
Course Learning Outcomes (CLOs)	At the end of the course, the students will be able to:	BT	PLO
	CL02: Understand the fundamental concepts in the field of artificial intelligence	C2 (Understand)	1,2
	CL03: Implement artificial intelligence techniques and case studies	C3 (Apply)	3,4,5
	CL03: Understand and apply the Object-oriented concepts in the programming languages.	C4 (Identify)	1,2,3
Syllabus	An Introduction to Artificial Intelligence and its applications towards Knowledge Based Systems; Symbolic AI: the physical symbol system hypothesis. Search: exhaustive & heuristic search techniques. Introduction to Reasoning and Knowledge Representation, Problem Solving by Searching (Informed searching, Uninformed searching, Heuristics, Local searching, Minmax algorithm, Alpha beta pruning, Game-playing); Case Studies: General Problem Solver, Eliza, Student, Macsyma; Learning from examples; ANN and Natural Language Processing; Recent trends in AI and applications of AI algorithms, Game playing, Genetic algorithms, Introduction to Machine Learning for AI, Decision Trees, Bayesian classification, Artificial Neural Networks, Computer Vision.		
Suggested Instructional/ Reading Material	<ol style="list-style-type: none"> 1. Stuart Russell and Peter Norvig, Artificial Intelligence. A Modern Approach, 3rd edition, Prentice Hall, Inc., 2015. 2. Luger, G.F. and Stubblefield, W.A., 2009. AI algorithms, data structures, and idioms in Prolog, Lisp, and Java. Pearson Addison-Wesley. 3. George F. Luger, Artificial Intelligence - Structures and Strategies for Complex Problem Solving, 6th Edition, Pearson, 2008, ISBN-13: 978-0321545893. 4. Hart, P.E., Stork, D.G. and Duda, R.O., Pattern classification. John Wiley & Sons, 2001. 5. P. Winston, Artificial Intelligence, 3rd Edition, Pearson, 1992, ISBN-13: 978-0201533774. 		

Course Title	Artificial Intelligence Lab		
Course Code	CC-310-L		
Credit Hours	1 (0,3)		
Category	Computing core		
Prerequisite	CC-213: Data Structures		
Co-Requisite	None		
Follow-up	None		
Course Introduction	The objective of the course is to introduce and then build the proficiency of students in different AI programming languages. Python is proposed for the course.		
Course Learning Outcomes (CLOs)	At the end of the course, the students will be able to:	BT	PLO
	CLO1: Understand the fundamental constructs of Python programming language.	C2 (Understand)	1,2
	CLO2: Comprehend the fundamental constructs of programming languages for data analysis and representation.	C3 (Apply)	1,2,3
	CLO3: Understand and apply the Object-oriented concepts in the programming languages.	C4 (Identify)	1,2,3
	CLO4: Apply various libraries for plotting, interpreting and analyzing data in Python.	C3 (Apply)	3,4,5
Syllabus	Introduction to Python programming, variables, expressions, operands and operators, loops, control structures, debugging, error messages, functions, strings, lists, object-oriented constructs and basic graphics in the languages. Logic programming: knowledge representation & search in the context of logic programming. Reasoning in logic programming: unification, horn clause logic, and resolution, Knowledge Representation Schemas: Logic, frames, semantic nets, scripts; problems in knowledge representation. Expert systems.

Course Title	Analysis of Algorithms		
Course Code	CC-313		
Credit Hours	3 (3,0)		
Category	Computing Core		
Prerequisite	CC-213: Data Structures		
Co-Requisite	None		
Follow Up	None		
Course Introduction	Detailed study of the basic notions of the design of algorithms and the underlying data structures. Several measures of complexity are introduced. Emphasis on the structure, complexity, and efficiency of algorithms.		
Course Learning Outcomes (CLOs)	At the end of the course, the students will be able to:	BT	PLO
	CLO1: Explain what is meant by “best”, “expected”, and “worst” case behavior of an algorithm.	C2 (Explain)	1,2
	CLO2: Identify the characteristics of data and/or other conditions or assumptions that lead to different behaviors.	C3 (Identify)	1,2
	CLO3: Determine informally the time and space complexity of simple algorithms.	C3 (Determine)	2,3
	CLO4: List and contrast standard complexity classes.	C1 (Know)	1,2
	CLO5: Use big O, Omega, Theta notation formally to give asymptotic upper bounds on time and space complexity of algorithms.	C3 (Apply)	3,4
	CLO6: Use of the strategies (brute-force, greedy, divide-and-conquer, and dynamic programming) to solve an appropriate problem.	C3 (Apply)	3,4
	CLO7: Solve problems using graph algorithms, including single source and all-pairs shortest paths, and at least one minimum spanning tree algorithm.	C3 (Apply)	3,4
	CLO8: Trace and/or implement a string-matching algorithm.	C3 (Apply)	3,4
Syllabus	Topics: Role of Algorithm in Computing, Analysis on nature of input and size of input , Designing Algorithms, Growth of Functions, Asymptotic Notations, Big-O, Big Ω , Big Θ , little-o, little- ω , loop invariants, Brute Force Approach, Divide-and-conquer approach; Sorting Algorithm analysis, Merge, Quick Sort, Greedy approach; Recursion and recurrence relations, Time Complexity of Recursive Algorithms, Algorithm Design Techniques, Dynamic Programming, Greedy Algorithms, String Matching, Search trees; Heaps; Hashing; Graph algorithms, sparse graphs, DFS, BFS, Minimum Spanning Trees, Shortest Path Algorithms, NP Completeness, Polynomial Time Algorithm, Polynomial Time verification.		
Suggested Instructional/ Reading Material	<ol style="list-style-type: none"> 1. Thomas H. Cormen, Charles E. Leiserson, Ronald L. Rivest and Clifford Stein, Introduction to Algorithms, 3rd Edition, The MIT Press, 2009, ISBN-10: 0262033844, ISBN-13: 978-0262033848 2. Algorithm Design, (1st edition, 2013/2014), Jon Kleinberg, Eva Tardos 3. Algorithms, (4th edition, 2011), Robert Sedgwick, Kevin Wayne 		

2) Mathematics & Supporting

Course Title	Multivariable Calculus		
Course Code	MS-253		
Credit Hours	3 (3,0)		
Category	Mathematics & Supporting		
Prerequisite	GE-162: Calculus and Analytical Geometry		
Co-Requisite	None		
Follow Up	None		
Course Learning Outcomes (CLOs)	At the end of the course, the students will be able to:	BT	PLO
	CL01: Know the concepts and applications of multivariable calculus	C1 (Know)	1
	CL02: Describe scalar and vector products related techniques.	C2 (Describe)	1
	CL03: Identify and solve problems related to differentiation and integration.	C3 (Apply)	1,3
	CL04: Know the concepts of divergence, curl, vector fields and related theorems.	C1 (Know)	1
Syllabus	<p>Topics: Motivation and applications of the course, Rectangular coordinates in 3-space, spheres, cylindrical surfaces, Vectors, Scalar (dot) products, projections, Vector (cross) products, Parametric Equations of Lines, Planes in 3-space, Quadric surfaces, Spherical and cylindrical coordinates, Introduction to vector-valued functions, Calculus of vector-valued functions, Change of parameter, Arc length, Unit tangent, normal, and binormal vectors, Curvature, Functions of two or more variables, Limits, Continuity, Partial derivatives, Differentiability, Local Linearity, Differentials, The Chain rule, Directional derivatives and Gradients, Tangent planes and normal vectors, Maxima and minima of functions of two variables, Lagrange multipliers, Double integral, Double integrals over Nonrectangular Regions, Double integrals in Polar Coordinates, Parametric surfaces, Surface area, Triple integrals, Triple Integrals in Cylindrical and Spherical Coordinates, Divergence and Curl of vector valued functions, Line integrals, Conservative Vector Fields, Green's Theorem, Surface integrals, application of surface integrals(Flux), Divergence Theorem, Stokes' theorem.</p>		
Suggested Instructional/ Reading Material	Howard Anton, Irl C. Bivens and Stephen Davis, Calculus, 11 th Edition, Wiley, 2016, ISBN-10: 1119228581, ISBN-13: 978-1119228585.		

Course Title	Probability and Statistics		
Course Code	MS-251		
Credit Hours	3 (3,0)		
Category	Mathematics & Supporting		
Prerequisite	None		
Co-Requisite	None		
Follow-up	None		
Course Learning Outcomes (CLOs)	At the end of the course, the students will be able to:	BT	PLO
	CLO1: Know the concept and applications of probability and statistics.	C1 (Know)	1
	CLO2: Describe expectation and distributions	C2 (Describe)	1
	CLO3: Solve single sample and one- and two- sample estimation.	C3 (Apply)	1,3
	CLO4: Use regression techniques.	C3 (Apply)	1,3
Syllabus	<p>Introduction: Statistics and Data Analysis, Statistical Inference, Samples, Populations, and the Role of Probability. Sampling Procedures, Discrete and Continuous Data, Statistical Modeling, Types of Statistical Studies. Probability: Sample Space, Events, Counting Sample Points, Probability of an Event, Additive Rules, Conditional Probability, Independence, and the Product Rule, Bayes' Rule. Random Variables and Probability Distributions. Mathematical Expectation: Mean of a Random Variable, Variance and Covariance of Random Variables, Means and Variances of Linear Combinations of Random Variables, Chebyshev's Theorem. Probability Distributions: Discrete Probability Distributions, Continuous Probability Distributions. Fundamental Sampling Distributions: Sampling Distributions and Data Descriptions, Random Sampling, Sampling Distributions, Sampling Distribution of Means and the Central Limit Theorem. Sampling Distribution of S^2, t-Distribution, F-Quantile and Probability Plots. Single Sample & One- and Two-Sample Estimation Problems: Single Sample & One- and Two-Sample Tests of Hypotheses. The Use of P-Values for Decision Making in Testing Hypotheses (Single Sample & One- and Two-Sample Tests). Regression: Linear Regression and Correlation, Least Squares and the Fitted Model, Multiple Linear Regression and Certain, Nonlinear Regression Models, Linear Regression Model Using Matrices, Properties of the Least Squares Estimators.</p>

Course Title	Linear Algebra		
Course Code	MS-252		
Credit Hours	3 (3,0)		
Category	Mathematics & Supporting		
Prerequisite	None		
Co-Requisite	None		
Follow-up	None		
Course Learning Outcomes (CLOs)	At the end of the course, the students will be able to:	BT	PLO
	CLO1: Know the concept and application of leaner algebra.	C1 (Know)	1
	CLO2: Describe geometry of vector spaces and optimization.	C2 (Describe)	1
	CLO3: Perform matrix algebra.	C3 (Apply)	1,3
Syllabus	<p>Linear Equations in Linear Algebra: Systems of Linear Equations, Row Reduction and Echelon Forms, Vector Equations, The Matrix Equation $Ax = b$, Solution Sets of Linear Systems, Applications of Linear Systems, Linear Independence, Introduction to Linear Transformations, The Matrix of a Linear Transformation, Linear Models in Business, Science, and Engineering. Matrix Algebra: Matrix Operations, The Inverse of a Matrix, Characterizations of Invertible Matrices, Partitioned Matrices, Matrix Factorizations, Applications to Computer Graphics, Subspaces of R^n, Dimension and Rank. Determinants: Introduction to Determinants, Properties of Determinants, Cramer's Rule, Volume, and Linear Transformations. Vector Spaces: Vector Spaces and Subspaces, Null Spaces, Column Spaces, and Linear Transformations, Linearly Independent Sets; Bases, Coordinate Systems, The Dimension of a Vector Space, Rank, Change of Basis. Eigenvalues and Eigenvectors: Eigenvectors and Eigenvalues, The Characteristic Equation, Diagonalization, Eigenvectors and Linear Transformations, Complex Eigenvalues, Discrete Dynamical Systems. Orthogonality and Least Squares: Inner Product, Length, and Orthogonality, Orthogonal Sets, Orthogonal Projections, The Gram–Schmidt Process, Least-Squares Problems, Applications to Linear Models, Inner Product Spaces, Applications of Inner Product Spaces. Symmetric Matrices and Quadratic Forms: Diagonalization of Symmetric Matrices, Quadratic Forms, Constrained Optimization, The Singular Value Decomposition, Applications to Image Processing and Statistics. The Geometry of Vector Spaces: Affine Combinations, Affine Independence, Convex Combinations, Hyperplanes. Optimization: Matrix Games, Linear Programming—Geometric Method, Linear Programming—Simplex Method, Duality.</p>

Course Title	Technical and Business Writing		
Course Code	MS-254		
Credit Hours	3 (3,0)		
Category	Mathematics & Supporting		
Prerequisite	None		
Co-Requisite	None		
Follow-up	None		
Course Learning Outcomes (CLOs)	At the end of the course, the students will be able to:	BT	PLO
	CLO1: Understanding of technical reporting.	C2 (Understand)	1,6,7,10
	CLO2: Organizing information and generation of solution	C3 (Apply)	1,6,7,10
	CLO3: Writing Proposals and Reports	C3 (Demonstrate)	1,6,7,10
Syllabus	<p>Overview of technical reporting, use of library and information gathering, administering questionnaires, reviewing the gathered information; Technical exposition; topical arrangement, exemplification, definition, classification and division, causal analysis, effective exposition, technical narration, description and argumentation, persuasive strategy, Organizing information and generation solution: brainstorming, organizing material, construction of the formal outline, outlining conventions, electronic communication, generation solutions. Polishing style: paragraphs, listening sentence structure, clarity, length and order, pomposity, empty words, pompous vocabulary, document design: document structure, preamble, summaries, abstracts, table of contents, footnotes, glossaries, cross-referencing, plagiarism, citation and bibliography, glossaries, index, appendices, typesetting systems, creating the professional report; elements, mechanical elements and graphical elements. Reports: Proposals, progress reports, Leaflets, brochures, handbooks, magazines articles, research papers, feasibility reports, project reports, technical research reports, manuals and documentation, thesis. Electronic documents, Linear versus hierarchical structure documents, Business Letters; Proposals and Business Plans; Writing Proposals and Reports; Short Reports; Long Formal Reports; Specification Documents; Review of Language; Writing Technical Research Reports; Documentation and Research Citation; Job Application and Resumes.</p>		
Suggested Instructional/ Reading Material	<ol style="list-style-type: none"> 1. D. O'Hair, J. S. O'Rourke, M.J. O'Hair, Business Communication: A Framework for Success, 1st Edition, Cengage Learning, 2000, ISBN-13: 978-0324073508. 2. Herta A. Murphy, Herbert W. Hildebrandt and Jane P. 3) Math Deficiency

Course Title	Math Deficiency - I		
Course Code	MD-001		
Credit Hours	3* (3,0)		
Category	Math Deficiency		
Prerequisite	None		
Co-Requisite	None		
Follow Up	Math Deficiency-II		
Course Learning Outcomes (CLOs)	At the end of the course, the students will be able to:	BT	PLO
	CLO1: Know the concepts and applications of sets, relations, functions, systems of equations, trigonometric functions and matrix algebra	C1 (Know)	1
	CLO2: Describe system of linear equations, matrix algebra, trigonometry and related techniques.	C2 (Describe)	1
	CLO3: Solve problems related to system of linear equations, matrix algebra, and trigonometry.	C3 (Apply)	1,3
	CLO4: Know the general form of Conic, polar coordinate and parametric equations.	C1 (Know)	1
Syllabus	<p>Sets: Definition, various types of set representation and operations. Relation and Function: Graphical transformation of one and two dimensional functions, Properties of functions, composition and inverses of functions, domain and range of the functions, Maximum and minimum values of functions, increasing and decreasing functions, zeros and intercept of functions, piecewise functions, continuity and Discontinuity of functions, Polynomials and rational functions, Polynomial long division and Synthetic division, Solution of rational functions, Absolute valued function, properties of absolute valued functions, Asymptotes (Horizontal, vertical and oblique), Exponential functions and their properties, Logs functions and their properties. Systems of Equations: Systems of Two Equations and Two Unknowns, Systems of Three Equations and Three Unknowns. Matrix Algebra: Addition, subtraction and multiplication. Row Operations and Row Echelon Forms, Augmented Matrices, Determinant of Matrices (2 x 2 and higher order matrices), Cramer's Rule, Inverse Matrices. Series and Sequences. Trigonometry: Angles in Radians and Degrees, Right Triangle Trigonometry, Law of Cosines & Sines, Area of Triangle, Graphs of Other Trigonometric Functions , Graphs of Inverse Trigonometric Functions, Basic Trigonometric Identities (Pythagorean, Sum and Difference, Double, Half, and Power Reducing), Trigonometric Equations. General Form of a Conic: Parabolas, Circles, Ellipses, Hyperbolas, Degenerate Conics. Polar and Parametric Equations: Polar and Rectangular Coordinates.</p>		
Suggested Instructional/ Reading Material	<ol style="list-style-type: none"> 1. Textbook of Algebra and Trigonometry Class XI is published by Punjab Textbook Board (PTB) Lahore, Pakistan. 2. Calculus and Analytic Geometry, MATHEMATICS 12 (Mathematics FSc Part 2 or HSSC-II), Punjab Text Book Board Lahore, Pakistan 3. Gilbert, S. S., B. C. Andy and B. Andrew, B. 2005. Linear Algebra and Its Applications. 4th Ed. Thomson Brooks/Cole, Belmont, CA, USA. 		

Course Title	Math Deficiency - II		
Course Code	MD-002		
Credit Hours	3* (3,0)		
Category	Math Deficiency		
Prerequisite	None		
Co-Requisite	None		
Follow Up	Calculus and analytic Geometry		
Course Learning Outcomes (CLOs)	At the end of the course, the students will be able to:	BT	PLO
	CLO1: Know the concepts and applications of complex number, sequences, series, permutations and combinations, integration and differentiation	C1 (Know)	1
	CLO2: Describe functions, limit, continuity chain rule and related techniques.	C2 (Describe)	1
	CLO3: Identify and solve problems related to differentiation and integration.	C3 (Apply)	1,3
Syllabus	<p>Complex Numbers: Complex Numbers, Arithmetic with Complex Numbers (Add, subtract, multiply and divide complex numbers), Trigonometric Polar Form of Complex Numbers, De Moivre's Theorem and nth Roots, Recursion. Sequences and Series: Sigma Notation, Arithmetic Series, Geometric Series (Sum infinite and finite geometric series and categorize geometric series). Counting with Permutations and Combinations. Basic Probability. Binomial Theorem. Limit: Notation, Graphs to Find Limits, Tables to Find Limits, Substitution to Find Limits, Rationalization to Find Limits, One Sided Limits and Continuity. Rate of Change: Instantaneous Rate of Change, Tangent Lines and Rates of Change. Derivatives: The Derivative Function, Introduction to Techniques of Differentiation, The Product and Quotient Rules, Derivatives of Trigonometric Functions, The Chain Rule, Derivatives of Logarithmic Functions, Derivatives of Exponential and Inverse Trigonometric Functions. Increase, Decrease, and Concavity, Relative Extrema, Absolute Maxima and Minima. Integrals: An Overview of the Area Problem, Area Under a Curve, The Indefinite Integral, Integration by Substitution, The Definition of Area as a Limit; Sigma Notation, The Definite Integral.</p>		
Suggested Instructional/ Reading Material	<ol style="list-style-type: none"> 1. Textbook of Algebra and Trigonometry Class XI is published by Punjab Textbook Board (PTB) Lahore, Pakistan. 2. 4) Domain (IT) Core

Course Title	Web Technologies		
Course Code	DI-322		
Credit Hours	2 (2,0)		
Category	Domain Core		
Prerequisite	None		
Co-Requisite	None		
Follow Up	EI-338: Enterprise Systems		
Course Learning Outcomes (CLOs)	At the end of the course, the students will be able to:	BT	PLO
	CLO1: Know web application architecture and, languages and application.	C1 (Know)	1
	CLO2: Describe various approaches to web application development.	C2 (Describe)	1
	CLO3: Develop web applications.	C3 (Apply)	1,3
Syllabus	<p>Introduction: Web Applications, TCP/IP Application Services. Web Servers: Basic Operation, Virtual hosting, Chunked transfers, Caching support, Extensibility. SGML, HTML5, CSS3. XML Languages and Applications: Core XML, XHTML, XHTML MP. Web Services: SOAP, REST, WML, XSL. Operations, Processing HTTP Requests, Processing HTTP Responses, Cookie Coordination, Privacy and P3P, Complex HTTP Interactions, Dynamic Content Delivery. Server Configuration. Server Security. Web Browsers Architecture and Processes: Active Browser Pages: JavaScript, DHTML, AJAX. JSON. Approaches to Web Application Development: Programing in any Scripting language. Search Technologies, Search Engine Optimization. XML Query Language, Semantic Web, Future Web Application Framework.</p> <p>Implementation on compiler of all the concepts/topics discussed in the course which includes, Introduction to Java, Variables, data types, Control Structures, Methods, Classes, Interfaces, Method Overloading and Overriding, Revision of Object oriented programming courses in Java, GUI development, Event Handling, Database Connectivity, Exception Handling, File handling, HTML, CSS, Java Script, Server side Programming in Java, Http Request and Response, Servlets, Servlet Life Cycle, Java Beans, MVC.</p>		
Suggested Instructional/ Reading Material	<ol style="list-style-type: none"> 1. Paul J. Deitel and Harvey Deitel, Java How to Program, 11th Edition, Pearson, 2017, ISBN-10: 0134743350, ISBN-13: 978-0134743356. 2. Marty Hall and Larry Brown, Core Servlets and Java Server Pages, 2nd Edition, Pearson, 2017, ISBN-10: 8131701638, ISBN-13: 978-8131701638. 		

Course Title	Web Technologies Lab		
Course Code	DI-322-L		
Credit Hours	1 (0,3)		
Category	Domain Core		
Prerequisite	None		
Co-Requisite	None		
Follow Up	EI-338: Enterprise Systems		
Course Learning Outcomes (CLOs)	At the end of the course, the students will be able to:	BT	PLO
	CLO1: Know web application architecture and, languages and application.	C1 (Know)	1
	CLO2: Describe various approaches to web application development.	C2 (Describe)	1
	CLO3: Develop web applications.	C3 (Apply)	1,3
Syllabus	Implementation on compiler of all the concepts/topics discussed in the course which includes, Introduction to Java, Variables, data types, Control Structures, Methods, Classes, Interfaces, Method Overloading and Overriding, Revision of Object oriented programming courses in Java, GUI development, Event Handling, Database Connectivity, Exception Handling, File handling, HTML, CSS, Java Script, Server side Programming in Java, Http Request and Response, Servlets, Servlet Life Cycle, Java Beans, MVC.

Course Title	System & Network Administration		
Course Code	DI-323		
Credit Hours	3 (2,1)		
Category	Domain Core		
Prerequisite	CC-311: Operating Systems		
Co-Requisite	None		
Follow-up	None		
Course Learning Outcomes (CLOs)	At the end of the course, the students will be able to:	BT	PLO
	CL01: Know components and environments of System Administration.	C1 (Know)	1
	CL02: Perform operating system and network, installation and management.	C3 (Demonstrate)	3.4.5
	CL03: Manage servers, traffic, access points.	C3 (Apply)	3.4.5
Syllabus	<p>Introduction: System Administration (SA), SA Components, Server Environment (Microsoft and Linux), Reliable Products, Server Hardware Costing, Maintenance Contracts and Spare Parts, Maintaining Data Integrity, Client Server OS Configuration, Providing Remote Console Access. Comparative Analysis of OS: Important Attributes, Key Features, Pros and Cons. Configuring Local Services and Managing Basic System Issues. Administer Users and Groups. System and Network Management: Software Management. Managing Network Services and Network Monitoring Tools. Boot Management and Process Management. IP Tables and Filtering. Securing Network Traffic. Advanced File Systems and Logs. Bash Shell Scripting. Configuring Servers (FTP, NFS, Samba, DHCP, DNS and Apache).</p>		
Suggested Instructional/ Reading Material	<ol style="list-style-type: none"> 1. The Practice of System and Network Administration, Second Edition by Thomas Limoncelli, Christina Hogan and Strata Chalup, Addison-Wesley Professional; 2nd Edition (2007). ISBN-10: 0321492668. 2. Course Title	Database Administration & Management		
Course Code	DI-324		
Credit Hours	3(2,1)		
Category	Domain Core		
Prerequisite	CC-215: Database Systems		
Co-Requisite	None		
Follow-up	None		
Course Introduction	Introduction to advanced data models such as object relational, object oriented. File organization concepts, Transactional processing and Concurrency control techniques, Recovery techniques, Query processing and optimization, Database Programming, Integrity and security, Database Administration, Physical database design and tuning, Distributed database systems, Emerging research trends in database systems.		
Course Learning Outcomes (CLOs)	At the end of the course, the students will be able to:	BT	PLO
	CLO1: Know about Oracle Architectural Components.	C1 (Know)	1
	CLO2: Managing Control Files and Redo Log Files, Tablespaces, users, indexes, data integrity and roles.	C3 (Demonstrate)	3.4.5
	CLO3: Configure archives, backups and recovery.	C3 (Apply)	3.4.5
Syllabus	<p>Oracle Architectural Components: Introduction to Enterprise Database Systems, Responsibilities of Database Administrator. Oracle Server; Oracle Instance; Physical Structure. Creating Database and Data dictionary: Creation Prerequisites; Creating Database; Starting Instance. Data Dictionary; Data Dictionary Contents. Dynamic Performance Views. Managing Control Files and Redo Log Files: Control File; Control File Contents; Multiplexing Control File; Using Redo Log Files; Structure of Redo Log File; Adding Redo Log Groups and Members; s. Managing Tablespaces: Database Storage Hierarchy; Kinds of Tablespaces; Managing Data files. Storage Structure and Relationships: Adding Data files and other Operations with Data files; Types of Segments. Managing Undo Data: Undo Segment; Read Consistency; Automatic undo Management; Managing Tables. Managing Users: Creating Users; Managing Users; Creating Tables; Managing Tables. Managing Indexes: types of Indexes; Creation and Management of Indexes. Maintaining Data Integrity: Types of Constraints; Managing Constraints. Managing Privileges: System Privileges; Object Privileges. Managing Roles: Assign and Revoke Roles and Roles Management. Network overview, Configuring Listener; Sessions. Client Side Configuration: Host Naming Method; Local Naming Method; Net Assistant; Configurations of Different Methods. Usage and Configuration of Oracle Shared Server: Server Configuration; Dedicated Server Process; Shared Server Process. Backup and Recovery: overview, Instance and Media Recovery, Categories of Failure; Defining Backup and Recovery Strategy. Configuration of Archive log mode: Switching to Archive Log Mode; Archive Process. User Managed Backups: User Managed backups and Issues. User Managed Complete Recovery: How To recover a Database Manually Using Manual Backups. User Managed Incomplete Recovery: How to DO an Incomplete Recovery. Import/Export: Different export and import modes.</p>

Course Title	Parallel & Distributed Computing		
Course Code	DI-328		
Credit Hours	3 (2,3)		
Category	Domain Core		
Prerequisite	CC-311: Operating Systems		
Co-Requisite	None		
Follow-up	None		
Course Introduction	The demand of huge computation and storage resources has been increasing exponentially. The course provides the methods for dealing with the emerging challenges of enhancing the power of the computational resources. This course will introduce topics related to parallel and distributed computing and also expose students to the latest tools and technologies.		
Course Learning Outcomes (CLOs)	At the end of the course, the students will be able to:	BT	PLO
	CLO1: Learn about parallel and distributed computers.	C1 (Know)	1
	CLO2: Write portable programs for parallel or distributed architectures using Message-Passing Interface (MPI) library.	C3 (Demonstrate)	3.4.5
	CLO3: Analyze complex problems with shared memory programming with openMP.	C4 (Analyze)	3
Syllabus	Asynchronous/synchronous computation/communication, concurrency control, fault tolerance, GPU architecture and programming, heterogeneity, interconnection topologies, load balancing, memory consistency model, memory hierarchies, Message passing interface (MPI), MIMD/SIMD, multithreaded programming, parallel algorithms & architectures, parallel I/O, performance analysis and tuning, power, programming models (data parallel, task parallel, process-centric, shared/distributed memory), scalability and performance studies, scheduling, storage systems, synchronization, and tools (Cuda, Swift, Globus, Condor, Amazon AWS, OpenStack, Cilk, gdb, threads, MPICH, OpenMP, Hadoop, FUZE).		
Suggested Instructional/ Reading Material	<ol style="list-style-type: none"> 1. Distributed Systems: Principles and Paradigms, A. S. Tanenbaum and M. V. Steen, Prentice Hall, 2nd Edition, 2007 2. Distributed and Cloud Computing: Clusters, Grids, Clouds, and the Future Internet, KHwang, J Dongarra and GC. C. Fox, Elsevier, 1st Ed. 		

Course Title	Cyber Security		
Course Code	DI-325		
Credit Hours	3 (2,3)		
Category	Domain Core		
Prerequisite	CC-312: Information Security		
Co-Requisite	None		
Follow-up	None		
Course Learning Outcomes (CLOs)	At the end of the course, the students will be able to:	BT	PLO
	CLO1: To develop knowledge about forensic law, standards, regulations and ethical values	C2 (Understand)	1,2
	CLO2: To be able to conduct digital forensics for multiple platforms and applications by various tools	C3 (Apply)	3.4.5
	CLO3: To be able to generate reports based on digital forensic tools for security systems and platforms	C3 (Apply)	3.4.5
Syllabus	Topics: Basic security concepts, Information security terminology, Malware classifications, Types of malware. Server side web applications attacks. Cross-site scripting, SQL Injection, Cross-site request forgery, Planning and policy, Network protocols and service models. Transport layer security, Network layer security, Wireless security, Cloud & IoT security.		
Suggested Instructional/ Reading Material	<ol style="list-style-type: none"> 1. Mark Ciampa, Security+ Guide to Network Security Fundamentals, 4th Edition. 2. Randall J. Boyle, Corporate Computer Society, 3rd Edition. 		

Course Title	Information Technology Infrastructure		
Course Code	DI-327		
Credit Hours	3 (2,3)		
Category	Domain Core		
Prerequisite	None		
Co-Requisite	None		
Follow-up	None		
Course Learning Outcomes (CLOs)	At the end of the course, the students will be able to:	BT	PLO
	CLO1: Define and explain, non-functional attributes of IT infrastructure.	C2 (Explain)	1,2
	CLO2: Describe various objects of an IT infrastructure including networking, operating systems, an end user devices.	C2 (Describe)	1,2
	CLO3: Understand and explain fundamentals of an Enterprise and Industries artifacts.	C2 (Understand)	1,2
	CLO4: Knowledge of Enterprise Resource Planning. C1(Knowledge)	C1(Knowledge)	1
	CLO5: Know emerging trends potential and applications of data storage technologies.	C1(Knowledge)	1.5
Syllabus	<p>IT Infrastructure: Definition, Non-functional Attributes. Availability Concepts: Sources of Unavailability, Availability Patterns. Performance. Security Concepts. Data centers. Servers: Availability, Performance, Security. Networking: Building Blocks, Availability, Performance, Security. Storage: Availability, Performance, Security. Virtualization: Availability, Performance, Security. Operating Systems: Building Blocks, Implementing Various OSs, OS availability, OS Performance, OS Security. End User Devices: Building Blocks, Device Availability, Performance, Security. IT Infrastructure Management: Service Delivery Processes. Service Support Processes. Ethics, Trends, organizational and technical issues related to IT infrastructure. Fundamentals of an Enterprise and Industries artifacts. Introduction to Enterprise Resource Planning (ERP): ERP Implementation life cycle methodologies and strategy. Business processes, architecture, User Interface Designs and their modeling. ERP Security, workflows, data integration, applications migration and data migration. Study of Business Modules: Human Resource, Procurement, Sales and Distribution, Material Management, and Manufacturing. Concepts and tools of designing and implementing an ERP system. Emerging Trends: special topics such as Supply Chain Management (SCM), Customer Relationship Management (CRM), Business Intelligence (BI).</p>

ISBN-10: 1447881281 2. IT Infrastructure and its Management by Prof Phalguni Gupta, Tata McGraw Hill Education Private Limited (October 6, 2009). ISBN-10: 0070699798 3. IT Architecture for Dummies by Kalani Kirk Hausman and Susan Cook, For Dummies; 1st Edition (November 9, 2010). ISBN-10: 0470554231 		

5) Domain (IT) Elective

Course Title	Software Project Management		
Course Code	EI-330		
Credit Hours	3 (3,0)		
Category	Domain Elective		
Prerequisite	None		
Co-Requisite	None		
Follow Up	None		
Course Introduction	This course provides an introduction to the key concepts, methods, and best practices needed to effectively manage software projects. Through a combination of lectures, case studies, and interactive discussions, students will gain insights into the entire software development lifecycle, from ideation to deployment, while emphasizing time management, budgeting, stakeholder communication, and risk management.		
Course Learning Outcomes (CLOs)	At the end of the course, the students will be able to:	BT	PLO
	CLO1: Articulate the various phase in project management stages of SDLC and recognize the importance of each phase in the context of project management.	C2 (Explain)	1,2
	CLO2: Allocate and manage project resources, including human capital, time, and budget, to maximize efficiency and effectiveness.	C3 (Apply)	1,2,3,4
	CLO3: Identify potential project risks, assess their impact, and devise strategies to mitigate or respond to these risks.	C4 (Identify)	3,4
	CLO4: Implement modern project management tools and software to aid in task tracking, collaboration, and project monitoring.	C3 (Apply)	3,4,5
	CLO5: Determine the criteria for project success and employ evaluation techniques post-project to assess outcomes and derive lessons for future projects.	C4 (Differentiate)	3,4
Syllabus	<p>Introduction: Project Management. The Project Management Process Groups. Scope triangle, The S curve. Five Phases of Project Management Life Cycle: Defining, planning, executing, controlling, closing, Scope of project, Project Work Breakdown Structure (WBS), Project Time Management. Estimate Activity Duration: Causes of variation in activity duration, five methods of Estimating Activity Duration. Project Networks: Critical Path Method (CPM), Build the project network, Analysis of the project network, Project Evaluation Review Technique (PERT), Activity on Arrow, Activity on Node, GANTT Chart, Using MS-Project to draw GANTT chart and project Networks. Project Proposal: Purpose of the project proposal, Contents of the project proposal, Format of the Project Proposal. Staffing and Personnel Planning: Personnel Plan, Team structures, Democratic decentralized, Controlled Decentralized, Controlled Centralized, Coordination and communication issues, Maslow's need theory of motivation, Software Project Team Roles and Responsibilities, Risk Identification, Analysis and Management. Project Management: Integration Management. Scope Management. Cost Management. Quality Management. Human Resource Management. Communications Management. Risk Management. Procurement Management. Management Tools. Configuration Management: Change Management and Control, baselines, Version Control, Earned Value Analysis for Project Monitoring and Control. Examples of Earned Value Analysis, Project Quality Assurance Plans, SQA Process Project Quality Standards, Project Documents.</p>		
Suggested Instructional/ Reading Material	<ol style="list-style-type: none"> 1. Guide to the Project Management Body of Knowledge (PMBOK® Guide), 6th Edition, Project Management Institute, 2017, ISBN-10: 1628251840. 2. Course Title	Mobile Application Development		
Course Code	EI-333		
Credit Hours	3 (2,1)		
Category	Domain Elective		
Prerequisite	CC-211: Object Oriented Programming		
Co-Requisite	None		
Follow-up	None		
Course Learning Outcomes (CLOs)	At the end of the course, the students will be able to:	BT	PLO
	CLO1: Explain characteristics of mobile application.	C2 (Explain)	1,2
	CLO2: Use Android platform for application development.	C3 (Apply)	1,2,3
	CLO3: Identify potential and applications of data storage technologies.	C4 (Identify)	1,2,3
	CLO4: Use Android Native Development Kit in a mobile application development.	C3 (Apply)	3,4,5
Syllabus	<p>Introduction: Mobile Computing Domain, Comparison of different Mobile Platforms, Revision of Java. Android Platform: Dalvik Virtual Machine, Android Constructs (Activity, Intent, Content Provider, Service, Broadcast Receiver), Activity Lifecycle, Project Structure, Manifest File, Emulators (AVD), Debugging (DDMS), R.java, Inter Activity Communication (Intent), Event Handlers, Layout XML, @ Sign, Layouts, Adapters, Dynamic Lists, Holder Pattern, Menus and dialogs, Menu, Menu Group, Menu Item, Icon Menu, Sub Menu, Context Menu, Sub Menu, Dynamic Menu, Using XML Files for Menus, Services, Intents. Data Storage: Key Value Sets, Files, Intro to SQLite, Web Service Integration, JSON, HTTPClient, Graphics, Widgets & Notifications, Multimedia and telephony API, Android Native Development Kit (NDK).</p>		
Suggested Instructional/ Reading Material	<ol style="list-style-type: none"> 1. Mark L. Murphy, Beginning Android 2, Apress, ISBN 978-1-4302-2629-1 2. Zigurd Mednieks, Laird Dornin, G. Title	Machine Learning		
Code	EI-335		
Credit Hours	3 (2,1)		
Category	Domain Elective		
Prerequisite	None		
Co-Requisite	None		
Follow-up	EI-436: Applications of Machine Learning		
Course Introduction	Machine learning is one of the fastest growing areas of computer science, with far-reaching applications. The aim of this course is to: a) Present the basic machine learning concepts; b) Present a range of machine learning algorithms along with their strengths and weaknesses; c) Apply machine learning algorithms to solve problems of moderate complexity.		
Course Learning Outcomes (CLOs)	At the end of the course, the students will be able to:	BT	PLO
	CLO1: Understand the key concepts and principles of machine learning algorithms and their applications in various domains.	C2 (Understand)	1,2
	CLO2: Demonstrate proficiency in implementing and fine-tuning supervised and unsupervised ML models to solve moderately complex problems.	C3 (Demonstrate)	1,2,3
	CLO3: Selection and evaluation of appropriate evaluation metrics to assess the performance and generalization of ML models.	C3 (Differentiate)	1,2,3
	CLO4: Effectively preprocess and transform data	C3 (Apply)	2,3,4
	CLO5: Apply machine learning techniques to analyze and extract insights from large datasets	C3 (Apply)	2,3,4,5
	CLO6: Gain practical experience in designing and conducting experiments, analyzing model results, and iteratively improving model performance	C3 (Apply)	2,3,4,5
Syllabus	<p>Topics: Machine learning course begins with foundational concepts, such as understanding supervised and unsupervised learning, feature engineering, and model evaluation techniques. As the course progresses, students delve into various supervised machine learning algorithms, including linear and nonlinear regression, logistic regression, decision trees, random forest, support vector machines, and neural networks. For each of the aforementioned algorithms, students learn about their hypothesis functions, cost functions, optimization functions and regularization techniques to avoid overfitting. The topics related to unsupervised machine learning are also part of the course. The students learn clustering techniques such as k-mean's clustering, and dimensionality reduction algorithms like principal component analysis and auto-encoders.</p> <p>Implementation of the theoretical concepts using Python, Different libraries and frameworks such as NumPy, Pandas, Scikit Learn and TensorFlow, Libraries for supervised and unsupervised machine learning algorithms such as linear and nonlinear regression, logistic regression, decision trees, random forest, support vector machines, neural networks (forward and backward propagation), k-mean's clustering, and dimensionality reduction algorithms like principal component analysis and auto-encoders. Publicly available datasets are used for practical demonstration of the aforementioned algorithms.</p>

Course Title	Software Quality Engineering		
Course Code	EI-425		
Credit Hours	3 (3,0)		
Category	Domain Elective		
Prerequisite	CC-212: Software Engineering		
Co-Requisite	None		
Follow Up	None		
Course Introduction	This course is designed to introduce students to the core principles, methods, and practices of Software Quality Assurance. Through a blend of theory and hands-on exercises, learners will gain a deeper understanding of what it takes to ensure software products meet the required standards of quality before they reach the end-user.		
Course Learning Outcomes (CLOs)	At the end of the course, the students will be able to:	BT	PLO
	CLO1: Recognize the importance and business value of high-quality software.	C4 (Recognize)	1,2,3
	CLO2: Differentiate between various software testing methods and strategies.	C4 (Differentiate)	1,2,3
	CLO3: Implement best practices in defect detection, reporting, and management.	C3 (Apply)	3,4,5
	CLO4: Use essential tools for automating tests and managing defects.	C3 (Apply)	3,4,5
	CLO5: Understand the SQA role in modern software development methodologies.	C2 (Understand)	1,2
Syllabus	Introduction to Software Quality Assurance; Software Quality in Business Context; QA, QC and QE; Product Quality and Process Quality; Software Quality Measurement and Metrics; Personal Software Process; Walkthroughs and Inspections; Software Configuration Management; Quality System Documentation; Software Testing Techniques; Software Testing Strategies; Automated Testing; Capability Maturity Model; CMM-Integration, People-CMM; ISO; Six Sigma; Testing Tools, Trends and Perspectives.		
Suggested Instructional/ Reading Material	<ol style="list-style-type: none"> 1. Daniel Galin, Software Quality Assurance From theory to implementation, 1st Edition, Pearson, 2003, ISBN: 0201709457. 2. Roger S. Pressman, B. Maxim, Software Engineering: A Practitioner's Approach, 8th Edition, McGraw-Hill, 2014, ISBN: 0078022126. 		

Course Title	Software Construction & Development		
Course Code	EI-331		
Credit Hours	3 (2,1)		
Category	Domain Elective		
Prerequisite	CC-211: Object Oriented Programming		
Co-Requisite	None		
Follow-up	None		
Course Introduction	The demand of huge computation and storage resources has been increasing exponentially. The course provides the methods for dealing with the emerging challenges of enhancing the power of the computational resources. This course will introduce topics related to parallel and distributed computing and also expose students to the latest tools and technologies.		
Course Learning Outcomes (CLOs)	At the end of the course, the students will be able to:	BT	PLO
	CLO1: Understand the role of design and its major activities within the OO software development process, with focus on the Unified process.	C1 (Remember)	1.2.3
	CLO2: Develop Object-oriented design models and refine them to reflect implementation details.	C3 (Apply)	4
	CLO3: Evaluate different architectures for a medium size software.	C4 (Analyze)	3
Course Description	CLO4: Implement design model using an object-oriented programming language.		
	Software development process, Software engineering process infrastructure, Software engineering process improvement, Systems engineering life cycle models, Process implementation, Levels of process definition, Life cycle model characteristics, Individual and team software process, Lehman's Laws, code salvaging, and configuration management. Martin Fowler's refactoring concepts and their application to small projects. Apply Michael Feathers' "legacy code" concepts. Exception handling, making methods robust by having them check their inputs sent from calling objects. Software configuration management, Release management, Software configuration management processes, Software deployment processes, Distribution and backup, Evolution processes and activities, Basic concepts of evolution and maintenance, Working with legacy systems, Refactoring, Error handling, exception handling, and fault tolerance. Personal reviews (design, code, etc.), Peer reviews (inspections, walkthroughs, etc.).		
Text Book(s)	1. Clean Code: A Handbook of Agile Software Craftsmanship, Robert C. Martin, Prentice Hall, 2008.		
Reference Material	1. The Pragmatic Programmer: From Journeyman to Master, Andrew Hunt and David Thomas, Addison-Wesley Professional, 1999. 2. Working Effectively with Legacy Code, Michael C. Feathers. Pearson Education, Prentice-Hall, 2004. 3. Refactoring: Improving the Design of Existing Code, Martin Fowler, Addison-Wesley Professional. 1999.

Course Title	Cloud Computing		
Course Code	EI-339		
Credit Hours	3 (2,3)		
Category	Domain Elective		
Prerequisite	CC-214: Computer Networks		
Co-Requisite	None		
Follow-up	None		
Course Introduction	Nowadays cloud computing becomes popular for individuals' users as well as for the business community. It provides on-demand huge computation and storage resources which is attractive for a large number of users mainly due to pay-per-usage charging model. This course will introduce topics related to Cloud Computing and also expose students to the latest tools and technologies used in Cloud Computing. The aim of this course is to provide an in-depth knowledge of Cloud Computing topics. The course would also expose students to important methods and tools used Cloud Computing.		
Course Learning Outcomes (CLOs)	At the end of the course, the students will be able to:	BT	PLO
	CLO1: Explain Cloud computing, virtualization, Docker and scalable web applications.	C2 (Explain)	1,2
	CLO2: Familiarize with Load Balancing AWS ELB, Nginx, Ipvadm, Ldirectord.	C1 (Know)	1,2
	CLO3: Demonstrate the use of NoSQL, MongoDB and DynamoDB, Revision, MapReduce	C3 (Apply)	3,4,5
	CLO4: Explain Big Data transformation methods.	C2 (Explain)	2,4,5
Syllabus	Introduction To Cloud Computing, Introduction To Cloud Computing (Cont.), AWS Services, EC2 hands, Accessing AWS S3 , Virtualization , Containerization/Dockers, Scalable Web Application in The Cloud, Scalable Web Application in The Cloud (Cont.), Load Balancing AWS ELB, Nginx, Ipvadm, Ldirectord, Web Application Deployment Models, Introduction to Big Data, Introduction to Big Data (Cont.), Introduction to NoSQL, MongoDB and DynamoDB, Revision, MapReduce, Distributed Systems, Consistency and Fault Tolerance in Distributed Systems, Big Data Transformation Methods , Blockchain, Practical Considerations in Cloud Computing, Future of the Cloud Computing and Big Data

Kyle Banker, Peter Bakkum, Shaun Verch, Douglas Garrett, and Tim Hawkins; MongoDB in Action, Second Edition. 4. Clinton W. Brownley; Foundations for Analytics with Python from Non-Programmer to Hacker. 		

Course Title	Global IT Services and Workspace		
Course Code	EI-236		
Credit Hours	2 (2,0)		
Category	IT Elective		
Prerequisite	Programming Fundamentals		
Co-Requisite	None		
Follow Up	None		
Course Introduction	<p>This course is designed to prepare students in the Associate Degree Program in Information Technology for global IT services and employment, equipping them with the necessary knowledge and skills to leverage their programming, web and mobile development, databases, and software engineering expertise in the global market. It covers global IT services, remote working, freelancing, self-employment, and lifelong learning, including relevant processes, procedures, tools, methods, techniques, legislation, rules, ethics, and critical considerations. Additionally, it explores Free and Open Source Software (FOSS) and entrepreneurship, providing insights into FOSS impact, benefits, and challenges, as well as guiding students in starting and managing IT businesses. This course bridges the gap between academic learning and real-world IT practices, preparing students for successful careers in the global IT market.</p>		
Course Learning Outcomes (CLOs)	At the end of the course, the students will be able to:	BT	PLO
	CLO1: Analyze the structure and dynamics of the global IT market, identifying key players, service models, and emerging trends.	C4 (Analyze)	1, 2, 8
	CLO2: Apply and evaluate effective remote working models and freelancing practices, utilizing appropriate tools and platforms to manage virtual workspaces and teams.	C3 (Apply)	5, 6, 7
	CLO3: Demonstrate proficiency in using essential communication, collaboration, and project management tools, as well as version control systems and cloud services, to facilitate global IT employment.	C3 (Apply)	4, 5
	CLO4: Assess and apply ethical, legal, and regulatory considerations in global IT work, including data protection laws, intellectual property rights, and cross-border legal issues.	C6 (Evaluate)	8, 9
	CLO5: Explain the benefits and challenges of Free and Open Source Software (FOSS), and develop entrepreneurial skills by creating business plans, managing clients, and understanding the essentials of starting and running an IT business.	C3 (Apply)	4, 10
Course Description	<p>Comprehensive overview of global IT services, service models, key players, and emerging trends in the market. Remote working and freelancing, platforms, tools, and techniques for setting up remote workspaces and managing virtual teams. Communication and project management tools, version control systems, and cloud services. Agile and Scrum methodologies, DevOps practices, and CI/CD pipelines. Ethical, legal, and regulatory aspects of global IT work, data protection laws, intellectual property rights, and cross-border legal issues. Free and Open Source Software (FOSS), benefits, challenges, major projects, and legal considerations. Entrepreneurship, starting an IT business, business planning, personal branding, marketing, client management, and financial management for freelancers and entrepreneurs. Lifelong learning, online learning platforms and obtaining professional certifications.</p>

6) General Education

Course Title	Applications of Information & Communication Technologies		
Course Code	GE-160		
Credit Hours	3 (2,1)		
Category	General Education		
Prerequisite	None		
Co-Requisite	None		
Follow Up	None		
Course Introduction	This course is designed to provide students with an exploration of the practical applications of Information and Communication Technologies (ICT) and software tools in various domains. Students will gain hands-on experience with a range of software applications, learning how to leverage ICT to solve daily life problems, enhance productivity and innovate in different fields. Through individual and interactive exercises and discussions, students will develop proficiency in utilizing software for communication, creativity, and more.		
Course Learning Outcomes (CLOs)	At the end of the course, the students will be able to:	BT	PLO
	CLO1: Explain the fundamental concepts, components, and scope of ICT.	C2 (Explain)	1,2
	CLO2: Identify uses of various ICT platforms and tools for different purposes.	C4 (Identify)	1,2,3
	CLO3: Apply ICT platform and tools for different purposes to address basic needs in different domains of daily, academic, and professional life.	C3 (Apply)	3,4,5
	CLO4: Understand the ethical and legal considerations in use of ICT platforms and tools.	C2 (Understand)	1,2,3
Syllabus	<p>Introduction to ICT Components of ICT (basics of hardware, software, ICT platforms, networks, local and cloud data storage, etc.), Scope of ICT (use of ICT in education, business, governance, healthcare, digital media and entertainment, etc.), Emerging technologies and future trends.</p> <p>Basic ICT Productivity Tools: Effective use of popular search engines to explore WWW, Formal communication tools and etiquettes (Gmail, Microsoft Outlook, etc.) Microsoft Office Suites (Word, Excel, PowerPoint), Google Workspace (Google Docs, Sheets, Slides), Google Drive, Dropbox (cloud storage and file sharing), Google Drive (Cloud storage with Google Docs integration) and Microsoft OneDrive (Cloud storage with Microsoft integration), Evernote (Note-taking and organization applications) and OneNote (Microsoft's digital notebook for capturing and organizing ideas), Video conferencing (Google Meet, Microsoft Teams, Zoom, etc.), social media applications (LinkedIn, Facebook, Instagram, etc.)</p> <p>ICT in Education: Working with learning management systems (Moodle, Canvas, Google Classrooms, etc.), Sources of online education courses (Coursera, edX, Udemy, Khan Academy, etc.), Interactive multimedia and virtual classrooms</p> <p>ICT in Health and Well-being: Health and fitness tracking devices and applications (Google Fit, Samsung Health, Apple Health, Xiaomi Mi Band, Runkeeper, etc.), Telemedicine and online health consultations (OLADOC, Sehat Kahani, Mahram, etc.)</p> <p>ICT in Personal Finance and Shopping: Online banking and financial management tools (JazzCash, Easypaisa, Zong PayMax, 1Link and MNET, Keenu Wallet, etc.), E-commerce platforms.</p> <p>Digital Citizenship and Online Etiquette: Intellectual property and copyright issues, Ensuring originality in content creation by avoiding plagiarism and unauthorized use of information sources, Content accuracy and integrity (ensuring that the content share through ICT platforms is free from misinformation, fake news, and manipulation).</p>		
Practical Requirements	1. Guided tutorials and exercises to ensure that students are proficient in commonly used software applications such as word processing software (e.g., Microsoft Word), presentation software, (e.g., Microsoft PowerPoint), spreadsheet software (e.g., Microsoft Excel) among such other tools. Students may be assigned practical tasks that require them to create documents, presentations, and spreadsheets etc.		

	<p>2. Assigning of tasks that involve creating, managing, and organizing files and folders on both local and cloud storage systems. Students will practice file naming conventions, creating directories, and using cloud storage solutions (e.g., Google Drive, OneDrive).</p> <p>3. The use of online learning management systems (LMS) where students can access course materials, submit assignments, participate in discussion forums, and take quizzes or tests. This will provide students with the practical experience with online platforms commonly used in education and the workplace.</p>
<p>Suggested Instructional/ Reading Material</p>	<ol style="list-style-type: none"> 1. "Discovering Computers" by Vermaat, Shaffer, and Freund. 2. Deborah Morley and Charles S. Parker, Understanding Computers: Today and Tomorrow, 16th edition, Cengage Learning, 2016, ISBN-13: 978-1337251853 3. "Computing Essentials" by Morley and Parker. 4. "GO! Course Title	Applications of Information & Communication Technologies Lab		
Course Code	GE-160-L		
Credit Hours	1 (0,3)		
Category	General Education		
Prerequisite	None		
Co-Requisite	None		
Follow Up	None		
Course Learning Outcomes (CLOs)	At the end of the course, the students will be able to:	BT	PLO
	CLO1: Explain the fundamental concepts, components, and scope of ICT.	C2 (Explain)	1,2
	CLO2: Identify uses of various ICT platforms and tools for different purposes.	C4 (Identify)	1,2,3
	CLO3: Apply ICT platform and tools for different purposes to address basic needs in different domains of daily, academic, and professional life.	C3 (Apply)	3,4,5
	CLO4: Understand the ethical and legal considerations in use of ICT platforms and tools.	C2 (Understand)	1,2,3
Syllabus	<p>Implementation of courses contents applications of Information and Communication Technologies: Interaction with components of ICT (basics of hardware, software, ICT platforms, networks, local and cloud data storage, etc.), Basic ICT Productivity Tools: Effective use of popular search engines to explore WWW, Formal communication tools and etiquettes (Gmail, Microsoft Outlook, etc.) 1. Guided tutorials and exercises to ensure that students are proficient in commonly used software applications such as word processing software (e.g., Microsoft Word), presentation software, (e.g., Microsoft PowerPoint), spreadsheet software (e.g., Microsoft Excel) among such other tools, Google Workspace (Google Docs, Sheets, Slides), Dropbox (cloud storage and file sharing), Google Drive (Cloud storage with Google Docs integration) and Microsoft OneDrive (Cloud storage with Microsoft integration), Evernote (Note-taking and organization applications) and OneNote (Microsoft's digital notebook for capturing and organizing ideas), Video conferencing (Google Meet, Microsoft Teams, Zoom, etc.), social media applications (LinkedIn, Facebook, Instagram, etc.). ICT in Education: Working with learning management systems (Moodle, Canvas, Google Classrooms, etc.), Sources of online education courses (Coursera, edX, Udemy, Khan Academy, etc.), Interactive multimedia and virtual classrooms. ICT in Health and Well-being: Health and fitness tracking devices and applications (Google Fit, Samsung Health, Apple Health, Xiaomi Mi Band, Runkeeper, etc.), Telemedicine and online health consultations (OLADOC, Sehat Kahani, Mahram, etc.). ICT in Personal Finance and Shopping: Online banking and financial management tools (JazzCash, Easypaisa, Zong PayMax, 1Link and MNET, Keenu Wallet, etc.), E-commerce platforms. Digital Citizenship and Online Etiquette: Intellectual property and copyright issues, Ensuring originality in content creation by avoiding plagiarism and unauthorized use of information sources, Content accuracy and integrity (ensuring that the content share through ICT platforms is free from misinformation, fake news, and manipulation). Students may be assigned practical tasks that require them to create documents, presentations, and spreadsheets etc.</p>

Course Title	Applied Physics			
Course Code	GE-169			
Credit Hours	3 (2,1)			
Category	General Education			
Prerequisite	None			
Co-Requisite	None			
Follow Up	None			
Course Introduction	The primary objective of the course is to teach student calculus based general physics, particularly basic concepts of electrostatics, electricity, magnetism and optics. To equip the learner with the basic philosophy of different physical phenomenon. To make them able to solve to given physical problems related to the subject. To lay strong foundations of their basic scientific knowledge.			
Course Learning Outcomes (CLOs)	At the end of the course, the students will be able to:		BT	PLO
	CLO1: To understand the fundamental concepts of Physics.		C2 (Understand)	1,2
	CLO2: To understand about charges and their interactions.		C2 (Understand)	1,2
	CLO3: To develop strong concepts of numerical techniques related to vectors and electrostatics and magnetism.		C2 (Understand)	1,2
	CLO4: To develop the relation between electricity and magnetism.		C4 (Analyze)	1,2,3
Syllabus	<p>Electric force: Introduction to electric force, its applications and related problems, conservation of charge, charge quantization, Electric fields due to point charge and lines of force. Ring of charge, Disk of charge, A point charge in an electric field, Dipole in a n electric field, The flux of vector field, The flux of electric field, Gauss' Law, Application of Gauss' Law, Spherically symmetric charge distribution, A charged isolated conductor. Electric potential energy: Electric potentials, Calculating the potential from the field and related problem Potential due to point and continuous charge distribution, Potential due to dipole, equipotential surfaces, Calculating the field from the potential. Electric current: Current density, Resistance, Resistivity and conductivity, Ohm's law and its applications, The Hall effect, The magnetic force on a current, The Biot- Savart law, Line of B, Two parallel conductors, Amperes' s Law, Solenoid, Toroids, Faraday's experiments, Faraday's Law of Induction, Lenz's law, Motional emf. Induced electric field, Induced electric fields. Electromagnetics: The basic equation of electromagnetism, Induced Magnetic field, The displacement current, Reflection and Refraction of light waves, Total internal reflection, Two source interference, Double Slit interference, related problems, Interference from thin films, Diffraction and the wave theory, related problems, Single-Slit Diffraction, related problems, Polarization of electromagnetic waves, Polarizing sheets, related problems.</p>

Walker, Fundamentals of Physics, 6th Ed., Wiley, 2010, ISBN: 978-0470469118. 			

Title	Functional English		
Code	GE-190		
Credit Hours	3 (3,0)		
Category	General Education		
Prerequisite	None		
Co-Requisite	None		
Follow-up	GE-191 Expository Writing		
Course Introduction	This course is designed to equip students with essential language skills for effective communication in diverse real-world scenarios. It focuses on developing proficiency in English language usage: word choices, grammar and sentence structure. In addition, the course will enable students to grasp nuanced messages and tailor their communication effectively through application of comprehension and analytical skills in listening and reading. Moreover, the course encompasses a range of practical communication aspects including professional writing, public speaking, and everyday conversation, ensuring that students are equipped for both academic and professional spheres. An integral part of the course is fostering a deeper understanding of the impact of language on diverse audiences. Students will learn to communicate inclusively and display a strong commitment to cultural awareness in their language use. Additionally, the course will enable them to navigate the globalized world with ease and efficacy, making a positive impact in their functional interactions.		
Course Learning Outcomes (CLOs)	At the end of the course, the students will be able to:	BT	PLO
	CLO1: Apply enhanced English communication skills through effective use of word choices, grammar and sentence structure.	C4 (Apply)	1,6,7,10
	CL2: Comprehend a variety of literary / non-literary written and spoken texts in English.	C2 (Understand)	1,6,7,10
	CLO3: Effectively express information, ideas and opinions in written and spoken English.	C2 (Explain)	1,6,7,10
	CLO4: Recognize inter-cultural variations in the use of English language and to effectively adapt their communication style and content based on diverse cultural and social contexts.	C4 (Identify)	1,6,7,10
Course Description	Foundations of Functional English: Vocabulary building (contextual usage, synonyms, antonyms and idiomatic expressions), Communicative grammar (subject-verb-agreement, verb tenses, fragments, run-ons, modifiers, articles, word classes, etc.), Word formation (affixation, compounding, clipping, back formation, etc.), Sentence structure (simple, compound, complex and compound-complex), Sound production and pronunciation. Comprehension and Analysis: Understanding purpose, audience and context, Contextual interpretation (tones, biases, stereotypes, assumptions, inferences, etc.), Reading strategies (skimming, scanning, SQ4R, critical reading, etc.), Active listening (overcoming listening barriers, focused listening, etc.). Effective Communication: Principles of communication (clarity, coherence, conciseness, courteousness, correctness, etc.), Structuring documents (introduction, body, conclusion and formatting), Inclusivity in communication (gender-neutral language, stereotypes, cross-cultural communication, etc.), Public speaking (overcoming stage fright, voice modulation and body language), Presentation skills (organization content, visual aids and engaging the audience), Informal communication (small talk, networking and conversational skills), Professional writing (business e-mails, memos, reports, formal letters, etc.)		
Practical Requirements	As part of the overall learning requirements, students will also be exposed to relevant simulations, role-plays and real-life scenarios and will be required to apply skills acquired throughout the course in the form of a final project.		
Suggested Instructional / Reading Material	<ol style="list-style-type: none"> 1. "Understanding and Using English Grammar" by Betty Schramper Azar. 2. "English Grammar in Use" by Raymond Murphy. 3. "The Blue Book of Grammar and Punctuation" by Jane Straus. 4. "English for Specific Purposes: A Learning-Centered Approach" by Tom Hutchinson and Alan Waters. 5. "Cambridge English for Job-hunting" by Colm Downes. 6. "Practical English Usage" by Michael Swan. 7. "Reading Literature and Writing Argument" by Missy James and Alan P. Merickel. 8. "Improving Reading: Strategies, Resources, and Common Core Connections" by Jerry Johns and Susan Lenski. 9. "Comprehension: A Paradigm for Cognition" by Walter Kintsch. 10. "Communication Skills for Business Professionals" by J.P. Verma and Meenakshi Raman. 		

Title	Expository Writing		
Code	GE-191		
Credit Hours	3 (3,0)		
Category	General Education		
Prerequisite	GE-190: Functional English		
Co-Requisite	None		
Follow-up	MS-254: Technical and Business Writing		
Course Introduction	Expository Writing is a sequential undergraduate course aimed at refining writing skills in various contexts. Building upon the foundation of the pre-requisite course, Functional English, this course will enhance students' abilities of producing clear, concise and coherent written texts in English. The course will also enable students to dissect intricate ideas, to amalgamate information and to express their views and opinions through well-organized essays. The students will further be able to refine their analytical skills to substantiate their viewpoints using credible sources while adhering to established ethical writing norms. Additionally, the course will highlight the significance of critical thinking enabling students to produce original and engaging written texts.		
Course Learning Outcomes (CLOs)	At the end of the course, the students will be able to:	BT	PLO
	CLO1: Understand the essentials of the writing process integrating pre-writing, drafting, editing and proof reading to produce well-structured essays.	C2 (Understand)	1,6,7,10
	CLO2: Demonstrate mastery of diverse expository types to address different purposes and audiences.	C3 (Apply)	1,6,7,10
	CLO3: Uphold ethical practices to maintain originality in expository writing.	C3 (Demonstrate)	1,6,7,9
Syllabus	<p>Introduction to Expository Writing: Understanding expository writing (definition, types, purpose and applications), Characteristics of effective expository writing (clarity, coherence and organization), Introduction to paragraph writing. The Writing Process: Pre-writing techniques (brainstorming, free-writing, mind-mapping, listing, questioning and outlining etc.), Drafting (three stage process of drafting techniques), Revising and editing (ensuring correct grammar, clarity, coherence, conciseness etc.), Proof reading (fine-tuning of the draft), Peer review and feedback (providing and receiving critique). Essay Organization and Structure: Introduction and hook (engaging readers and introducing the topic), Thesis statement (crafting a clear and focused central idea), Body Paragraphs (topic sentences, supporting evidence and transitional devices), Conclusion (types of concluding paragraphs and leaving an impact), Ensuring cohesion and coherence (creating seamless connections between paragraphs). Different Types of Expository Writing: Description, Illustration, Classification, Cause and effect (exploring causal relationships and outcomes), Process analysis (explaining step-by-step procedures), Comparative analysis (analyzing similarities and differences). Writing for Specific Purposes and Audiences: Different types of purposes (to inform, to analyze, to persuade, to entertain etc.), Writing for academic audiences (formality, objectivity, and academic conventions), Writing for public audiences (engaging, informative and persuasive language), Different tones and styles for specific purposes and audiences. Ethical Considerations: Ensuring original writing (finding credible sources, evaluating information etc.), Proper citation and referencing (APA, MLA, or other citation styles), Integrating quotes and evidences (quoting, paraphrasing, and summarizing), Avoiding plagiarism (ethical considerations and best practices)</p>		
Practical Requirements	As part of the overall learning requirements, students will be required to build a writing portfolio having a variety of expository texts and present the same at the end of the course showcasing proficiency in expository writing.		
Suggested Instructional / Reading Material	<ol style="list-style-type: none"> "The St. Martin's Guide to Writing" by Rise B. Axelrod and Charles R. Cooper. "They Say / I Say: The Moves That Matter in Academic Writing" by Gerald Graff and Cathy Birkenstein. "Writing Analytically" by David Rosenwasser and Jill Stephen. "Style: Lessons in Clarity and Grace" by Joseph M. Williams and Joseph Bizup. "The Elements of Style" by William Strunk Jr. and E.B. White. "Good Reasons with Contemporary Arguments" by Lester Faigley and Jack Selzer. "Writing to Learn; How to Write – and Think – Clearly About Any Subject at All" by William Zinsser. "The Norton Field Guide to Writing" by Richard Bullock, Maureen Daly Goggin, and Francine Weinberg. "The Art of Styling Sentences" by Ann Longknife and K.D. Sullivan. "Writing Today" by Richard Johnson-Sheehan and Charles Paine. 		

Course Title	Calculus and Analytical Geometry		
Course Code	GE-162		
Credit Hours	3 (3,0)		
Category	General Education		
Prerequisite	None		
Co-Requisite	None		
Follow Up	MS-253: Multivariable Calculus		
Course Learning Outcomes (CLOs)	At the end of the course, the students will be able to:	BT	PLO
	CLO1: Know the concepts and applications of calculus and analytical geometry.	C1 (Know)	1
	CLO2: Describe functions, limit, continuity chain rule and related techniques.	C2 (Describe)	1
	CLO3: Identify and solve problems related to differentiation and integration.	C3 (Apply)	1,3
	CLO4: Know the concepts analytical geometry.	C1 (Know)	1
Syllabus	Motivation and applications of the course. Introduction to limits: Limits and Continuity, Techniques of finding limits, Indeterminate forms of limits, Introduction to functions: Continuous and discontinuous functions and their applications, Differential calculus: Concept and idea of differentiation, Geometrical and Physical meaning of derivatives, Rules of differentiation, Techniques of differentiation, Rates of change, Tangents and Normal lines, Chain rule, implicit differentiation, linear approximation, Applications of differentiation: Extreme value functions, Mean value theorems, Maxima and Minima of a function for single-variable, Concavity. Integral calculus: Concept and idea of Integration, Indefinite Integrals, Techniques of integration, Riemann sums and Definite Integrals, Applications of definite integrals, Improper integral, Applications of Integration; Area under the curve. Analytical Geometry: Straight lines in R ³ , Equations for planes.		
Suggested Instructional/ Reading Material	<ol style="list-style-type: none"> Howard Anton, Irl C. Bivens and Stephen Davis, Calculus, 11th Edition, Wiley, 2016, ISBN-10: 1119228581, ISBN-13: 978-1119228585. Thomas and Finney, Calculus and Analytic Geometry, 9th Edition, ISBN-13: 978-0201531749, ISBN-10: 0201531747. 		

Title	Islamic Studies		
Code	GE-163		
Credit Hours	2 (2,0)		
Category	General Education		
Prerequisite	None		
Co-Requisite	None		
Follow-up	None		
Course Introduction	This course is designed to provide students with a comprehensive overview of the fundamental aspects of Islam, its benefits, practices, history and influence on society. It will further familiarize the students with a solid foundation in understanding Islam from an academic and cultural perspective. Through this course, students will have an enhanced understanding of Islam's multifaceted dimensions which will enable them to navigate complex discussions about Islam's historical and contemporary role, fostering empathy, respect, and informed dialogue.		
Course Learning Outcomes (CLOs)	At the end of the course, the students will be able to:	BT	PLO
	CLO1: Demonstrate enhanced knowledge of Islamic foundational beliefs, practices, historical development, fundamental sources of Shiarah, spiritual values and ethical principles.	C1 (Knowledge)	1,7,9,10
	CLO2: Describe basic sources of Islamic law and their application in daily life.	C2 (Understand)	1,7,9,10
	CLO3: Identify and discuss contemporary issues being faced by the Muslim world including social challenges, gender roles and interfaith interactions.	C4 (Analyze)	1,6,7,9,10
Syllabus	<p>1- قرآن مجيد 1- قرآن مجيد: معنى ومفهوم، ايهيت وقوييل، آداب وشرايط تلاوت 2- وحى كاصحنى ومفهوم، وحى كى اقسام 3- قرآن مجيد كى جمع وتدوين، حفاظة قرآن 2- حديث: نبوى صلى الله عليه وآله وسلم 1- حديث: كاصحنى ومفهوم، اقسام حديثه (قولى- فعلى- تقريرى) 2- ضرورت وايهيت حديثه 3- مطالعة حديثه (ترجمه+6 تفریح=4=10 نمبر) 1. عن عمر بن الخطاب لم يوحى - الله عزه قل سمعت رسول الله يقول: هذا الرجل بالذي يليه، ولا يهلك امرئ منا حتى ، فمن كان من جبرته الى الله ورسوله فخيرته الى الله ورسوله، ومن كان من جبرته الى الدنيا فهو حرام، او حرام اقرب وجنبا فخيرته الى ما هاجر اليه (صحيح بخارى: 1) 2. عن عثمان بن عفان عن النبي صلى الله عليه وآله وسلم قال: سمعت رسول الله يقول: هذا الرجل بالذي يليه، ولا يهلك امرئ منا حتى ، فمن كان من جبرته الى الله ورسوله فخيرته الى الله ورسوله، ومن كان من جبرته الى الدنيا فهو حرام، او حرام اقرب وجنبا فخيرته الى ما هاجر اليه (صحيح بخارى: 502) 3. عن مالك بن انس عن النبي صلى الله عليه وآله وسلم قال: سمعت رسول الله يقول: هذا الرجل بالذي يليه، ولا يهلك امرئ منا حتى ، فمن كان من جبرته الى الله ورسوله فخيرته الى الله ورسوله، ومن كان من جبرته الى الدنيا فهو حرام، او حرام اقرب وجنبا فخيرته الى ما هاجر اليه (صحيح مسلم: 113) 4. عن عبد الله بن عمر بن الخطاب عن النبي صلى الله عليه وآله وسلم قال: سمعت رسول الله يقول: هذا الرجل بالذي يليه، ولا يهلك امرئ منا حتى ، فمن كان من جبرته الى الله ورسوله فخيرته الى الله ورسوله، ومن كان من جبرته الى الدنيا فهو حرام، او حرام اقرب وجنبا فخيرته الى ما هاجر اليه (صحيح بخارى: 6011) 5. عن النبي صلى الله عليه وآله وسلم قال: سمعت رسول الله يقول: هذا الرجل بالذي يليه، ولا يهلك امرئ منا حتى ، فمن كان من جبرته الى الله ورسوله فخيرته الى الله ورسوله، ومن كان من جبرته الى الدنيا فهو حرام، او حرام اقرب وجنبا فخيرته الى ما هاجر اليه (صحيح بخارى: 6011)</p>		

Syllabus	<p>5- خلافتِ راشدہ</p> <p>1- خلفائے راشدین (حضرت ابو بکر صدیقؓ، حضرت عمر فاروقؓ، حضرت عثمان غنیؓ، حضرت علی المرتضیٰؓ) کے شخص احوال</p> <p>2- عہدِ خلافتِ راشدہ کے اہم خصائص</p> <p>6- فقہِ اسلامی</p> <p>1- فقہِ اسلامی کے مکتبہ (حنبل، شافعی، مالکی، حنبلی، حنفی، اہل بیت، اہل بیت، اہل بیت، اہل بیت)</p> <p>2- ائمہ اربعہ کا تعارف (امام ابو حنیفہؒ، امام مالکؒ، امام شافعیؒ، امام احمد بن حنبلؒ)</p> <p>7- اسلام کی سماجی تعلیمات</p> <p>1- خاندان کا تعارف و اہمیت</p> <p>2- اسلام میں عورت کا مقام</p> <p>3- اسلام کا تصور حقوق العباد</p> <p>4- اسلام کی اخلاقی تعلیمات</p> <p>8- اسلام اور جدید دنیا</p> <p>1- عالمگیریت اور اس کے مسائل و تقاضے</p> <p>2- اسلاموفوبیا</p> <p>3- کثیرتبی معاشرہ Pluralistic Society اور اسلامی تعلیمات</p>

Title	Ideology and Constitution of Pakistan		
Code	GE-168		
Credit Hours	2 (2,0)		
Category	General Education		
Prerequisite	None		
Co-Requisite	None		
Follow-up	None		
Course Introduction	This course is designed to provide students with a fundamental exploration of the ideology and the constitution of Pakistan. The course focuses on the underlying principles, beliefs, and aspirations that have been instrumental in shaping the creation and development of Pakistan as a sovereign state. Moreover, the course will enable students to understand the core provisions of the Constitution of the Islamic Republic of Pakistan concerning the fundamental rights and responsibilities of Pakistan citizens to enable them function in a socially responsible manner.		
Course Learning Outcomes (CLOs)	At the end of the course, the students will be able to:	BT	PLO
	CLO1: Demonstrate enhanced knowledge of the basis of the ideology of Pakistan with special reference to the contributions of the founding father of Pakistan.	C3 (Demonstrate)	1,10
	CLO2: Demonstrate fundamental knowledge about the Constitution of Pakistan 1973 and its evolution with special reference to state structure.	C3 (Demonstrate)	1,10
	CLO3: Explain about the guiding principles on rights and responsibilities of Pakistan citizens as enshrined in the Constitution of Pakistan 1973.	C2 (Understand)	1,3,10
Syllabus	<p>1. Introduction to the Ideology of Pakistan: Definition and significance of ideology, Historical contest of the creation of Pakistan (with emphasis on socio-political religious and cultural dynamics of British India between 1857 till 1947), Contributions of founding fathers of Pakistan of Pakistan in the freedom movement including but not limited to Allama Muhammad Iqbal, Muhammad Ali Jinnah., etc. Contributions of women and students in the freedom movement for separate homeland for Muslims of British India. Two-Nation Theory: Evolution of the Two-Nation Theory (Urdu-Hindi controversy, Partition of Bengal, Simla Deputation 1906, Allama Iqbal's Presidential Address 1930, Congress Ministries 1937 Lahore Resolution 1940). Introduction to the Constitution of Pakistan: Definition and importance of a constitution, Ideological factors that shaped the Constitution(s) of Pakistan (Objectives Resolution 1949). Constitution and State Structure: Structure of Government (executive, legislature, and judiciary), Distribution of powers between federal and provincial governments, 18th Amendment and its impact on federalism. Fundamental Right, Principles of Policy and Responsibilities: Overview of fundamental rights guaranteed to citizens by the Constitution of Pakistan 1973 (Articles 8-28), Overview of Principles of Policy (Articles 29-40), Responsibilities of the Pakistan citizens (Article 5). Constitutional Amendments: Procedures for amending the Constitution, Notable Constitutional amendments and their implications</p>		
Suggested Instructional / Reading Material	<ol style="list-style-type: none"> 1. "The Idea of Pakistan" by Stephen P. Cohen. 2. "Ideology of Pakistan" by Javed Iqbal. 3. "The Struggle for Pakistan" by I.H. Qureshi. 4. "Pakistan the Formative Phase" by Khalid Bin Sayeed. 5. "Pakistan: Political Roots and Development" by Safdar Mahmood. 6. "Ideology of Pakistan" by Sharif-ul-Mujahid. 7. "The Struggle for Pakistan: A Muslim Homeland and Global Politics" by Ayesha Jala. 8. "Jinnah, Pakistan and Islamic Identity: The Search for Saladin" by Akbar S. Ahmed. 9. "The Making of Pakistan: A Study in Nationalism" by K.K. Aziz. 10. "Pakistan: A New History" by Lan Talbot. 11. "Pakistan in the Twentieth Century: A Political History" by Lawrence Ziring. 12. "The Constitution of Pakistan 1973". Original. 13. "Constitutional and Political Development of Pakistan" by Hamid Khan. 14. "The Parliament of Pakistan" by Mahboob Hussain. 15. "Constitutional Development in Pakistan" by G.W. Choudhury. 16. "Constitution-Making in Pakistan: The Dynamics of Political Order" by G.W. Choudhury. 		

Course Title	Discrete Structures		
Course Code	GE-167		
Credit Hours	3 (3,0)		
Category	General Education		
Prerequisite	None		
Co-Requisite	None		
Follow-up	None		
Course Learning Outcomes (CLOs)	At the end of the course, the students will be able to:	BT	PLO
	CLO1: Understand the key concepts of Discrete Structures such as Sets, Permutations, Relations, Graphs and Trees etc.	C2 (Understand)	1,3
	CLO2: Apply formal logic proofs and/or informal, but rigorous, logical reasoning to real problems, such as predicting the behavior of software or solving problems such as puzzles.	C3 (Apply)	1,3
	CLO3: Apply discrete structures into other computing problems such as formal specification, verification, databases, artificial intelligence, and cryptography.	C3 (Apply)	1,2,3,4
	CLO4: Differentiate various discrete structures and their relevance within the context of computer science, in the areas of data structures and algorithms, in particular	C4 (Differentiate)	1,2,3,4
Course Description	<p>Mathematical Reasoning: Propositional and predicate logic. Propositional Logic: Logical operators, translations between symbolic expressions and formal English expression, logical equivalences. Predicate Logic: Quantifiers, Nested quantification, equivalences, translations between symbolic forms and formal English. Rules of Inference: Proof methods and strategies, Direct proof, Proof by contraposition, proof by induction, proof by implication, Existence proof, Uniqueness proofs, trivial proofs, vacuous proofs. Sets: Notations, set operations, Venn diagrams, countable and uncountable sets, relations, equivalence relations and partitions, partial orderings, recurrence relations, functions, mappings. Functions: Injective, surjective, bijective, special types of functions, function composition, inverse functions, recursive functions, compositions, number theory, sequences, series, counting, inclusion and exclusion principle, pigeonhole principle, permutations and combinations. Integers and Divisibility: Division theorem, modular arithmetic, LCM, GCD, Euclidean and Extended Euclidean method, finding solutions to congruence. Primes: Fundamental theorem of arithmetic, characterizations of primes, Mersenne primes. Induction: Weak induction, strong induction. Recursion and Recurrences: Formulation of recurrences, closed formulas, Counting: product rule, sum rule, principle of inclusion-exclusion, combinations and permutations, binomial coefficients, Pascal's identity and Pascal's triangle, binomial theorem, pigeonhole principle. Relations: Reflexive, symmetric, transitive, antisymmetric, equivalence relations and equivalence classes, partial orders. Graph Theory: Terminologies, elements of graph theory, planar graphs, graph coloring, Euler graph, Hamiltonian path, rooted trees, traversals, handshaking lemma and corollary, special families of graphs, isomorphism, planarity, Eulerian and Hamiltonian graphs, trees.</p>		
Suggested Instructional/ Reading Material	<ol style="list-style-type: none"> 1. Kenneth H. Rosen, Discrete Mathematics and Its Applications, 7th Edition, McGraw Higher-Ed, 2011, ISBN: 0073383090. 2. Kolman, Busby & Ross, Discrete Mathematical Structures, 4th Edition. 5. Ralph P. Grimaldi, Discrete and Combinatorial Mathematics: An Applied Introduction, 5th Edition. 		

Title	Civics and Community Management		
Code	GE-363		
Credit Hours	2		
Category	General Education		
Prerequisite	None		
Co-Requisite	None		
Follow-up	None		
Course Introduction	This course is designed to provide students with fundamental knowledge about civics, citizenship, and community engagement, Students will learn about the essentials of civil society, government, civic responsibilities, inclusivity, and effective ways to participate in shaping the society which will help them apply theoretical knowledge to the real-world situations to make a positive impact on their communities.		
Course Learning Outcomes (CLOs)	At the end of the course, the students will be able to:	BT	PLO
	CLO1: Demonstrate fundamental understanding of civics, government, citizenship and civil society.	C3 (Demonstrate)	1
	CLO2: Understand the concept of community and recognize the significance of community engagement for individuals and groups.	C2 (Understand)	1,3,6,7,9,10
	CLO3: Recognize the importance of diversity and inclusivity for societal harmony and peaceful co- existence.	C4 (Identify)	1,6,7,9,10
Syllabus	<p>Introduction to Civics and Citizenship: Definition of civics, citizenship, and civic engagement, Historical evolution of civic participation, Types of citizenship: active, participatory, digital, etc., The relationship between democracy and citizenship. Civics and Citizenship: Concepts of civics, citizenship, and civic engagement, Foundations of modern society and citizenship, Types of citizenship: active, participatory, digital, etc., State, Government and Civil Society: Structure and functions of government in Pakistan, the relationship between democracy and civil society, right to vote and importance of political participation and representation. Rights and Responsibilities: Overview of fundamental rights and liberties of citizens under Constitution of Pakistan 1973, Civic responsibilities and duties, Ethical considerations in civic engagement (accountability, non-violence, peaceful dialogue, civility, etc.) Community Engagement: Concept, nature and characteristics of community, Community development and social cohesion, Approaches to effective community engagement, Case studies of successful community driven initiatives. Advocacy and Activism: Public discourse and public opinion, Role of advocacy in addressing social issues, Social action movements.
